Multidisciplinarity Luisa Santos,2018-06-27 In Manifesto for an Independent Revolutionary Art Andr Breton and Diego Rivera under the effects of German fascism and Russian Stalinism in society argued that art can only impact society and be revolutionary if it becomes independent of any social constructs Almost six decades later in the rise of what became known as relational aesthetics the field of multidisciplinarity is expanding and many artistic projects for social change claim to be multidisciplinarity However such projects show that we are still far from a broad discourse of multidisciplinarity Multidisciplinarity takes a step towards a down to earth discussion of the relation between disciplinary discourses and grand narratives in three different projects focusing mainly on its artistic cultural and management aspects Indeed drawing from the eclectic construction of these three multidisciplinary projects this volume serves to bridge the gap between the theoretical debates of disciplinary discourses and the harshness of everyday life in communities where projects for social change are being implemented Presenting a panoptical view that places academic research side by side with daily life Multidisciplinarity unveils the bigger picture of both projects and interdisciplinary discourses This insightful volume will appeal to students and researchers interested in fields such as Project Management Multidisciplinarity Culture Studies and Organisational Studies The Management of Non-Governmental Development Organizations David Lewis,2006-12-11 The first edition of this book was published in 2001 by Routledge and was the first academic text on the important new emerging field of NGO management It sets out the field for researchers with a new and original conceptual framework contains a comprehensive review of existing literature from a variety of disciplines including management development studies and social policy and provides wide ranging examples from the author s own practical and research experience New to this edition twelve new detailed case studies of NGO management issues and challenges new discussion points lessons learned and questions for debate to guide the reader through each chapter definitions of key terms highlighted key ideas to illustrate

each chapter Revealing the distinctive organizational challenges faced by NGOs this second edition provides a fully updated and revised text that will prove invaluable to all those studying or working in NGOs the voluntary sector or development studies Visit the Companion website at www.routledge.com/textbooks/9780415370936
