Dynamics of Regulatory Change David Vogel, Robert A. Kagan, 2004-12-31 Critics of globalization claim that economic liberalization leads to a lowering of regulatory standards As capital and corporations move more freely across national boundaries a race to the bottom results as governments are forced to weaken labor and environmental standards to retain current contracts or attract new business The essays in this volume argue that on the contrary under certain circumstances global economic integration can actually lead to the strengthening of consumer and environmental standards This volume extends the argument of David Vogel's book *Trading Up* which discussed environmental standards by focusing on the impact of globalization on labor rights women's rights and capital market regulations

Globalisation and Trilateral Labor Markets Niels Thygesen, 1997

The New Politics of the Welfare State Paul Pierson, 2001 The welfare states of the affluent democracies now stand at the centre of political discussion and social conflict In these path breaking essays an international team of leading analysts rejects simplistic claims about the impact of economic globalization Economic demographic and social pressures on the welfare state are very real but many of the most fundamental challenges have little to do with globalization Nor do the authors detect signs of a convergence of national social policies towards an American style lowest common denominator The contemporary politics of the welfare state takes shape against a backdrop of both intense pressures for austerity and enduring popularity Thus in most of the affluent democracies the politics of social policy centre on the renegotiation restructuring and modernization of the post war social contract rather than its dismantling The authors examine a wide range of countries and public policies arenas including health care pensions and labour markets They demonstrate how different national settings affect whether and on what terms centrist efforts to restructure the welfare state can succeed

O'Sullivan, 2001-11-14 How can we explain the persistent worsening of the income distribution in the United States in the 1980s and 1990s What are the prospects for the re emergence of sustainable prosperity in the US economy over the next generation Situating these questions within a wider context through historical analysis and comparisons with Germany and Japan this book focuses on the microeconomics of corporate investment behaviour and the macroeconomics of household saving behaviour Specifically the contributors analyze how the combined pressures of excessive corporate growth international competition and intergenerational dependence have influenced corporate investment over the past two decades They also offer a perspective on how corporate investment in skill bases can support sustainable prosperity with studies drawn from the machine tool aircraft engine and medical equipment industries

Nominations of Harry J. Bowie, Armando Falcon, Jr., Martin N. Baily, Robert Z. Lawrence, Dorian Vanessa Weaver, and Dan Renberg United States. Congress. Senate. Committee on Banking, Housing, and Urban Affairs, 2001

Women's Labor in the Global Economy Sharon Harley, 2007-06-05 Globalization is not a new phenomenon women throughout the world have been dealing with the circumstances and consequences of an international economy long before the advent of the transnational corporate conglomerate However in a mercenary example of the tried cliché the more things change the more they stay the same women particularly those of color continue to be relegated to the lowest rung of the occupational ladder where their indispensable contributions to global market capitalism are downplayed or invalidated completely through the perpetuation of stereotypes and the denial of access to better job opportunities and resources How women of color around the world adapt and challenge the economic political and social effects of globalization is the subject of this broad minded and incisive anthology From Mexico Jamaica Ghana Zimbabwe and Sri Lanka to immigrant and non immigrant communities in the United States the women documented in these essays are agricultural and factory workers artists and entrepreneurs mothers and activists Their stories bear stark witness to how globalization continues to develop new sites and forms of exploitation while its apparent victims continue to be women men and children of color
