Meakin,2017-07-05 Lady Anne Bacon Drury 1572 1624 was the granddaughter and niece of two of England s Lord Keepers of the Great Seal Sir Nicholas Bacon and Sir Francis Bacon Lady Anne was also the friend and patroness of John Donne and Joseph Hall however she deserves to be remembered in her own right Within her massive country house Lady Anne created a tiny painted room that she seems to have used as a kind of three dimensional book The walls consisted of panels of pictures and mottoes grouped under Latin sentences These panels can still be viewed in a Suffolk museum Christchurch Mansion in Ipswich Some panels point to classical and Biblical sources and to popular emblem books The sources of other panels are more recondite while still others are original compositions by Lady Anne The panels exhibit a contemptus mundi theme and reflect a struggle with ambition pride and even despair Some panels also appear to register carefully veiled but pointed critiques of political and religious events and figures Lady Anne s painted closet or architext is thus relevant to a wide range of early modern scholarship in various disciplines but is as yet largely unappreciated For the first time in four hundred years this book fully describes the closet and places it in its personal social intellectual and aesthetic contexts It argues for the painted closet s importance for understanding early modern conceptualizations of private and public spaces and for illuminating fundamental early modern habits of seeing and reading especially combinations of text and image Finally this book explores the closet as an example of the ingenious ways in which female subjectivity found ways to express itself even within the constraints of early modern patriarchal society in England     **Margaret Cavendish** Lisa Walters,2014-08-28 Exploring connections between Cavendish s science literature and politics Walters challenges the view that Cavendish s thought was characterised by conservative royalism     *The London Encyclopaedia* ,1829     *London Encyclopædia, Or, Universal Dictionary of Science, Art, Literature, and Practical Mechanics* ,1845     **Natural Computing Algorithms** Anthony Brabazon,Michael O'Neill,Seán McGarraghy,2015-10-08 The field of natural computing has been the focus of a substantial research effort in recent decades

One particular strand of this research concerns the development of computational algorithms using metaphorical inspiration from systems and phenomena that occur in the natural world. These naturally inspired computing algorithms have proven to be successful problem solvers across domains as diverse as management science, bioinformatics, finance, marketing, engineering, architecture, and design. This book is a comprehensive introduction to natural computing algorithms suitable for academic and industrial researchers and for undergraduate and graduate courses on natural computing in computer science, engineering, and management science.

Who was Mother Goose? Where did she come from and when? Although she is one of the most beloved characters in Western literature, Mother Goose's origins have seemed lost in the mists of time. Several have tried to pin her down, claiming she was the mother of Charlemagne, the wife of Clovis, King of the Franks, the Queen of Sheba, or even Elizabeth Goose of Boston, Massachusetts. Others think she is related to mysterious goose-footed statues in old French churches called Queen Pedauque. This book delves deeply into the surviving evidence for Mother Goose's origins from her nursery rhymes and fairy tales as well as from relevant historical, mythological, and anthropological data. Until now, no one has ever confidently identified this intriguing yet elusive literary figure. So who was the real Mother Goose? The answer might surprise you.
