presents field experiences of managing the politically sensitive agenda of promoting gender equality in the NGOs and negotiating the contradictions between using Organizational Development tools and promoting gender equality In doing so it shows how organizational change for gender equality is an integral part of gender mainstreaming processes As a decade of evidence suggests gender mainstreaming is vulnerable to becoming technocratic and ineffective These seven organizations unable to separate entirely the integral change process from their external work as NGOs experiences a spillover of gender justice concerns into their work in the field with a variety of program results *The Future of Women's Rights* Joanna Kerr, Ellen Sprenger, Alison Symington, 2004-09 The Future of Women's Rights identifies the emergence of various trends threatening the advance of gender equality women's human rights and sustainable human development These phenomena include the impacts of globalization and neoliberal economics developments in biotechnology the neo conservative backlash against women's rights monopolistic ownership patterns over information technologies the rise of identity politics marginalizing women's issues and the increase in violent conflict and war The contributors to this volume are united in seeing a pressing need for women's movements to evaluate their methods with a view to making their future political work more effective They identify current issues and trends in the world thinking through how these may impact women and the work of women's movements *Inclusive Aid* Leslie Christine Groves, Rachel Barbara Hinton, 2013 Rapid and profound changes are taking place in international development The past two decades have promoted the ideals of participation and partnership yet key decisions affecting people's lives continue to be made without sufficient attention to the socio political realities of the countries in which they live Embedded working traditions vested interests and institutional inertia mean that old habits and cultures persist among the development community Planning continues as though it were free of unpredictable interactions among stakeholders This book is about the need to recognise the complex non linear nature of development assistance and how bureaucratic procedures and power relations hinder poverty reduction in the new aid environment The book begins with a conceptual and historical analysis of aid exposing the challenges and opportunities facing aid professionals today It argues for greater attention to accountability and the adoption of rights based approaches In section two practitioners policy makers and researchers discuss the realities of power and relationships from their experiences across sixteen countries Their accounts from government donors and civil society expose the highly politicised and dynamic aid environment in which they work Section three explores ways forward for aid agencies challenging existing political institutional and personal ways of working Authors describe procedural innovations as strategic ways to leverage change Breaking the barriers to ensure more inclusive aid will require visionary leadership and a courageous commitment to change Crucially the authors show how translating rhetoric into practice relies on changing the attitudes and behaviours of individual actors Only then is the ambitious agenda of the Millennium Development Goals likely to be met The result is an indispensable contribution to the understanding of how development assistance and poverty reduction can be most
