The Routledge Handbook of Gender Archaeology Marianne Moen, Unn Pedersen, 2024-12-02 This volume presents a comprehensive overview of gender archaeology both theory and practice and contributes a substantial and definitive reference work by bringing together state of the art research theoretical overviews and the latest debates in the field Responding to the shifts in the theoretical landscape and the societal and political frameworks within which we produce our knowledge chapters create both a solid theoretical baseline which help readers grasp the significance of gender in archaeology as well as offer perspectives on how to engender produced knowledge about the past In line with recent focus on the shortcomings of gender and archaeological representation chapters also detangle academic discourse and popular representations in order to present novel ways of successfully negotiating the pitfalls of gendered ideas about past behaviours By encouraging novel ways of integrating theoretical perspectives with scrutiny of gender stereotypes original empirical examinations of identity markers and behaviours and re examinations of static representations of identities through new lenses such as intersectional perspectives personhood and materiality debates the volume is theoretically rich and will simultaneously provide a necessary benchmark for future archaeological discourses Finally it will incorporate perspectives from researchers with diverse backgrounds and viewpoints to provide a truly comprehensive overview It will not shy away from engaging with politically contentious issues surrounding knowledge production but will include perspectives from researchers whose focus is less on feminist critiques and more on gender and identities Thus the volume bridges the two most prominent directions currently discernible within

the focus area namely feminist re examinations on the one hand and research focused more on bodily practice and gendered experiences on the other The Routledge Handbook of Gender Archaeology is an invaluable resource for students and researchers in gender archaeology as well as gender studies more widely *Gender in Archaeology* Sarah M. Children, Spaces and Identity Margarita Sánchez Romero, Eva Alarcón García, Gonzalo Aranda Jiménez, 2015-10-31 How do children construct negotiate and organize space The study of social space in any human group is fraught with limitations and to these we must add the further limits involved in the study of childhood Here specialists from archaeology history literature architecture didactics museology and anthropology build a body of theoretical and methodological approaches about how space is articulated and organized around children and how this disposition affects the creation and maintenance of social identities Children are considered as the main actors in historic dynamics of social change from prehistory to the present day Notions on space childhood and the construction of both the individual and the group identity of children are considered as a prelude to papers that focus on analyzing and identifying the spaces which contribute to the construction of children's identity during their lives the places they live learn socialize and play A final section deals with these same aspects but focuses on funerary contexts in which children may lose their capacity to influence events as it is adults who establish burial strategies and practices In each case authors ask questions such as how do adults construct spaces for children How do children manage their own spaces How do people adults and children build invisible and or physical boundaries and spaces

Gender and Power in Prehispanic Mesoamerica Rosemary A. Joyce, 2009-06-23 Gender was a fluid potential not a fixed category before the Spaniards came to Mesoamerica Childhood training and ritual shaped but did not set adult gender which could encompass third genders and alternative sexualities as well as male and female At the height of the Classic period Maya rulers presented themselves as embodying the entire range of gender possibilities from male through female by wearing blended costumes and playing male and female roles in state ceremonies This landmark book offers the first comprehensive description and analysis of gender and power relations in prehispanic Mesoamerica from the Formative Period Olmec world ca 1500 500 BC through the Postclassic Maya and Aztec societies of the sixteenth century AD Using approaches from contemporary gender theory Rosemary Joyce explores how Mesoamericans created human images to represent idealized notions of what it meant to be male and female and to depict proper gender roles She then juxtaposes these images with archaeological evidence from burials house sites and body ornaments which reveals that real gender roles were more fluid and variable than the stereotyped images suggest
