Adam Jones, 2022-05-17 Genocide may be the most powerful word in the English language What is the significance and relevance of this formative concept today In an extraordinarily wide ranging collection of essays and interviews Adam Jones one of the world's leading genocide scholars explores the uses and controversies surrounding the term that Raphael Lemkin coined during the Second World War to describe and prohibit mass atrocities against defined human groups In a style that is learned but always accessible and engaging Jones addresses key historical and contemporary issues such as What were the motivations and proclaimed justifications for genocide in the long nineteenth century that shaped our modern world How can humanitarian interventions in genocide avoid sliding into new imperialism What are the connections between religion and genocide How can the gender variable in genocide perpetration and victimization be understood A wide range of historical and contemporary genocides and crimes against humanity from the eighteenth century slave rebellion in Haiti to Myanmar s destruction of the Rohingya and to the forms of structural and systemic violence that Jones argues should be encompassed by any global historical understanding of genocide Sites of Genocide is illustrated with photos from Jones s own collection and other sources It will be of interest to all students and scholars of human rights and for general readers seeking a point of entry to the rich and provocative debates in comparative genocide studies The SAGE Handbook of Feminist Theory Mary Evans, Clare Hemmings, Marsha Henry, Hazel Johnstone, Sumi Madhok, Ania Plomien, Sadie Wearing, 2014-08-12 At no point in recorded history has there been an absence of intense and heated discussion about the subject of how to conduct relations between women and men This Handbook provides a comprehensive guide to these omnipresent issues and debates mapping the present and future of thinking about feminist theory. The chapters gathered here present the state of the art in scholarship in the field covering Epistemology and marginality Literary visual and cultural representations Sexuality Macro and microeconomics of gender Conflict and peace The most important consensus in this volume is that a central organizing tenet of feminism is its willingness to examine the ways in which gender and relations between women and men have been and are organized The authors bring a shared commitment to the critical appraisal of gender relations as well as a recognition that to think theoretically is not to detach concerns from lived experience but to extend the possibilities of understanding With this focus on theory and theorizing about the world in which we live this Handbook asks us across all disciplines and situations to abandon our taken for granted assumptions about the world and interrogate both the origin and the implications of our ideas about gender relations and feminism It is an essential reference work for advanced students and academics not only of feminist theory but of gender and sexuality across the humanities and social sciences Genocide Andrea Graziosi, Frank E. Sysyn, 2022-01-15 Since the 1980s the study of genocide has exploded both historically and geographically to encompass earlier epochs other continents and new cases The concept of genocide has proved its worth but that expansion has also compounded the tensions between a rigid legal concept and the manifold realities researchers have discovered The legal and political benefits that accompany genocide status have also reduced complex discussions of

historical events to a simplistic binary is it genocide or not a situation often influenced by powerful political pressures Genocide addresses these tensions and tests the limits of the concept in cases ranging from the role of sexual violence during the Holocaust to state induced mass starvation in Kazakh and Ukrainian history while considering what the Armenian Rwandan and Burundi experiences reveal about the uses and pitfalls of reading history and conducting politics through the lens of genocide Contributors examine the pressures that great powers have exerted in shaping the concept the reaction Rapha l Lemkin originator of the word genocide had to the United Nations final resolution on the subject France's long held choice not to use the concept of genocide in its courtrooms the role of transformative social projects and use of genocide memory in politics and the relation of genocide to mass violence targeting specific groups Throughout this comprehensive text offers innovative solutions to address the limitations of the genocide concept while preserving its usefulness as an analytical framework State Violence and Genocide in Latin America Marcia Esparza, Henry R. Huttenbach, Daniel Feierstein, 2009-09-10 This edited volume explores political violence and genocide in Latin America during the Cold War examining this in light of the United States hegemonic position on the continent Using case studies based on the regimes of Argentina Chile Guatemala Peru and Uruquay this book shows how U S foreign policy far from promoting long term political stability and democratic institutions has actually undermined them The first part of the book is an inquiry into the larger historical context in which the development of an unequal power relationship between the United States and Latin American and Caribbean nations evolved after the proliferation of the Monroe Doctrine The region came to be seen as a contested terrain in the East West conflict of the Cold War and a new US inspired ideology the National Security Doctrine was used to justify military operations and the hunting down of individuals and groups labelled as communists Following on from this historical context the book then provides an analysis of the mechanisms of state and genocidal violence is offered demonstrating how in order to get to know the internal enemy national armies relied on US intelligence training and economic aid to carry out their surveillance campaigns This book will be of interest to students of Latin American politics US foreign policy human rights and terrorism and political violence in general Marcia Esparza is an Assistant Professor in Criminal Justice Department at John Jay College of Criminal Justice in New York City Henry R Huttenbach is the Founder and Chairman of the International Academy for Genocide Prevention and Professor Emeritus of City College of the City University of New York Daniel Feierstein is the Director of the Center for Genocide Studies at the Universidad Nacional de Tres de Febrero Argentina and is a Professor in the Faculty of Genocide at the University of Buenos Aires Argentina Scourge of Genocide Adam Jones, 2013-06-26 The Scourge of Genocide collects essays reviews and reportage on the subjects of genocide and crimes against humanity by Adam Jones recently selected as one of Fifty Key Thinkers on the Holocaust and Genocide The volume includes a number of previously unpublished essays and explores a range of debates and approaches in comparative genocide studies such as Genocide pedagogy and visual representation Gender and gendercide

The role of media and communications in genocide The historiography of genocide studies Subaltern genocide or genocides by the oppressed Strategies of genocide prevention and intervention Covering a broad spectrum of theoretical perspectives as well as case studies from the former Yugoslavia Rwanda Guatemala Afghanistan Iraq and Israel Palestine this book is essential reading for all scholars and students of genocide studies political violence and international relations by the Oppressed Nicholas A. Robins, Adam Jones, 2009-05-12 In the last two decades the field of comparative genocide studies has produced an increasingly rich literature on the targeting of various groups for extermination and other atrocities throughout history and around the contemporary world However the phenomenon of genocides by the oppressed that is retributive genocidal actions carried out by subaltern actors has received almost no attention The prominence in such genocides of non state actors combined with the perceived moral ambiguities of retributive genocide that arise in analyzing genocidal acts from below have so far eluded serious investigation Genocides by the Oppressed addresses this oversight opening the subject of subaltern genocide for exploration by scholars of genocide ethnic conflict and human rights Focusing on case studies of such genocide the contributors explore its sociological anthropological psychological symbolic and normative dimensions Genocide and Gender in the Twentieth Century Amy E. Randall, 2021-12-16 Focusing on events in Rwanda Armenia and the former Yugoslavia as well as the Holocaust Genocide and Gender in the Twentieth Century investigates how historically and culturally specific ideas led to genocidal sexual violence Expert contributors also consider how these ideas in conjunction with issues relating to femininity masculinity and understandings of gendered identities contributed to perpetrators tools and strategies for ethnic cleansing and genocide The 2nd edition features Five brand new chapters which explore imperialism race gender and genocide the Cambodian genocide memory and intergenerational transmission of Holocaust trauma and genocide gender and memory in the Armenian case An extended and enhanced introduction which makes use of recent scholarship on gender and violence Historiographical and bibliographical updates throughout Key primary document excerpt from the 1948 UN Convention on the Prevention and Punishment of Genocide Updated and revised in its second edition Genocide and Gender in the Twentieth Century is the authoritative study on the complex gender dimensions of ethnic cleansing and genocide in the 20th century
