Gendered Cyborg A Reader:

The Gendered Cyborg Fiona Hovenden, Linda Janes, Gill Kirkup, Kathryn Woodward, 2013-09-13 The Gendered Cyborg explores the relationship between representation technoscience and gender through the metaphor of the cyborg The contributors argue that the figure of the cyborg offers ways of thinking about the relationship between culture and technology people and machines which disrupt the power of science to enforce the categories through which we think about being human male and female Taking inspiration from Donna Haraway's groundbreaking Manifesto for Cyborgs the articles consider how the cyborg has been used in cultural representation from reproductive technology to sci fi and question whether the cyborg is as powerful a symbol as is often claimed The different sections of the reader explore the construction of gender categories through science the interaction of technoscience and gender in contemporary science fiction film such as Blade Runner and the Alien series debates around modern reproductive technology such as ultrasound scans and IVF assessing their benefits and constraints for women issues relating to artificial intelligence and the internet **The Gendered Cyborg**, 2000 **Gendered Bodies and New Technologies** Amanda du Preez, 2009-10-02 In this era of ubiquitous information flow heightened mobility and limitless consumer convenience human interaction with new technologies has become increasingly seamless In the process the human body is effectively and steadily reduced to just another interface or a second life so to speak What is easily forgotten during this translucent transaction is that being human also necessarily implies being embodied In other words to constitute a body in its non negotiable physicality is still what it entails to be human amongst other things To live daily in and through the complicated and dynamic intersection between mind and body psychology and physiology also known as embodiment is what makes us human **The Methuen Drama Handbook of Gender and Theatre** Sean Metzger, Roberta Mock, 2023-12-28 Shortlisted for the 2024 TaPRA Edited Collection Prize This is a guide to contemporary debates and theatre practices at a time when gender paradigms are both in flux and at the centre of explosive political battlegrounds The confluence of gender and theatre has long created intense debate about representation identification social conditioning desire embodiment and lived experience As this handbook demonstrates from the conventions of early modern English Chinese Japanese and Hispanic theatres to the subversion of racialized binaries of masculinity and femininity in recent North American African Asian Caribbean and European productions the matter of gender has consistently taken centre stage This handbook examines how critical discourses on gender intersect with key debates in the field of theatre studies as a lens to illuminate the practices of gender and theatre as well as the societies they inform and represent across space and time Of interest to scholars in the interrelated areas of feminist gender and sexuality studies theatre and performance studies cultural studies and globalization and diasporic studies this book demonstrates how researchers are currently addressing theatre about gender issues and gendered theatre practices While synthesizing and summarizing foundational and evolving debates from a contemporary perspective this

collection offers interpretations and analyses that do not simply look back at existing scholarship but open up new possibilities and understandings. Featuring essential research tools including a survey of keywords and an annotated play list, this is an indispensable scholarly handbook for anyone working in theatre and performance. **Gendered Bodies** Shuqin Cui, 2015-10-31. *Gendered Bodies* introduces readers to women's visual art in contemporary China by examining how the visual process of gendering reshapes understandings of historiography, sexuality, pain, and space. When artists take the body as the subject of female experience and the medium of aesthetic experiment, they reveal a wealth of noncanonical approaches to art. The insertion of women's narratives into Chinese art history rewrites a historiography that has denied legitimacy to the woman artist. The gendering of sexuality reveals that the female body incites pleasure in women themselves, reversing the dynamic from woman as desired object to woman as desiring subject. The gendering of pain demonstrates that for those haunted by the sociopolitical past, the body can articulate traumatic memories and psychological torment. The gendering of space transforms the female body into an emblem of landscape devastation, remaps ruin aesthetics, and extends the politics of gender identity into cyberspace and virtual reality. The work presents a critical review of women's art in contemporary China in relation to art traditions, classical and contemporary. Inscripting the female body into art generates not only visual experimentation but also interaction between local art, cultural production, and global perception. While artists may seek inspiration and exhibition space abroad, they often reject the Western label, feminist artist. An extensive analysis of artworks and artists, both well and little known, provides readers with discursively persuasive and visually provocative evidence. *Gendered Bodies* follows an interdisciplinary approach that general readers as well as scholars will find inspired and inspiring. *Women's Studies Quarterly* Lee Quinby, 2001-08. A timely and vital issue of this leading journal examines the impact of new technologies on the lives of women. *Figures of Fantasy* Susanna Paasonen, 2005. *Figures of Fantasy* explores the popularization of the idea of the Internet as a cyberspace and considers the implications this has for discussions of gender and identity. The book analyzes the standard figures used to conceptualize and explain technology and gender and traces the ways in which these concepts have served to create the figure of the Internet as a cyberspace, a manner of thinking that has come to dominate Internet research internationally, making visible its historicity, limitations, and implications. *Figures of Fantasy* offers an innovative theoretical approach to Internet research and provides a highly original, systematic critique of the canonical works in the field. **Mediating Post-Socialist Femininities** Nadia Kaneva, 2017-10-02. Twenty-five years after the fall of the Berlin Wall, this collection of essays examines the ways in which popular media re-construct ideas and ideals of femininity in the post-socialist cultural space.
