Work Intensity, Gender and Well-being Cecile Jackson, Richard Palmer-Jones, 1998. **Female Well-Being** Carolyn Fluehr-Lobban, Janet Mancini Billson, 2013-07-04. This global survey starts from the assumption that the significant transformations in women's lives deserve to be fully documented and interpreted. Janet Mancini Billson and Carolyn Fluehr Lobban tackle the complexities of social change by using data from countries in every world region to illustrate the most critical challenges that women faced during the last century, challenges that are also likely to shape the 21st century. Global knowledge and feminism dovetailed in the 20th century, fed by international air travel, telecommunications, the internet and a growing awareness that solving female oppression would improve the lot of all humankind. The authors therefore adopt a strong international comparative cross-cultural and feminist framework that uncovers the fundamental processes that promote, sustain or degrade the female condition. At the heart of *Female Well-Being* are case studies written by country teams of scholars, educators and policy analysts in Canada, The United States, Colombia, Iceland, the United Kingdom, Croatia, Japan, Bangladesh, Thailand, South Africa and Sudan. Female well-being is measured by analysing trends in infant mortality, maternal mortality, literacy, life expectancy, education, work, income, family structure and political power. These trends are contextualised in the light of the century's major events, legislative initiatives, social policies and leadership to illustrate the processes that enhance, sustain or detract from the female condition. This book will be a critical resource for academics, development experts and policy analysts.

Gender and Well-Being in Europe Lina Gálvez, 2016-04-22. This book is the first of four books based on a series of symposia funded by COST, which is an intergovernmental framework for the promotion of European Cooperation in the field of Scientific and Technical Research. It draws on both historical and contemporary European case studies to offer a sophisticated account of the relationship between gender and well-being. The authors focus on key discussions of the changing conceptions of well-being from early twentieth-century calculations of the relationship between

income and the cost of living to more recent critiques from feminist writers Their fascinating answers allow them to significantly challenge the issue with the idea that well being is not only associated with income or opulence but also relates to more abstract concepts including capabilities freedom and agency of different women and men and will be of considerable interest to economic and social historians sociologists of health gender sexuality and economists **Trends in the**

Harriss-White, 1998 **Toward a Humanist Justice** Debra Satz, Rob Reich, 2009-06-15 The late Susan Moller Okin was a leading political theorist whose scholarship integrated political philosophy and issues of gender, the family, and culture. Okin argued that liberalism properly understood as a theory opposed to social hierarchies and supportive of individual freedom and equality provided the tools for criticizing the substantial and systematic inequalities between men and women. Her thought was deeply informed by a feminist view that theories of justice must apply equally to women as men, and she was deeply engaged in showing how many past and present political theories failed to do this. She sought to rehabilitate political theories, particularly that of liberal egalitarianism, in such a way as to accommodate the equality of the sexes and with an eye toward improving the condition of women and families in a world of massive gender inequalities. In her lifetime, Okin was widely respected as a scholar whose engagement went well beyond the world of theory, and her premature death in 2004 was considered by many a major blow to progressive political thought and women's interests around the world. This volume stems from a conference on Okin and contains articles by some of the top feminist and political philosophers working today. They are organized around a set of themes central to Okin's work: namely, liberal theory, gender, and the family; feminist and cultural differences; and global justice. Included are major figures such as Joshua Cohen, David Miller, Cass Sunstein, Alison Jaggar, and Iris Marion Young, among others. Their aim is not to celebrate Okin's work but to constructively engage with it and further its goals. Economic Woman Frances Raday, 2019-05-14 The author introduces the concept of economic woman and makes her visible in duality with and opposition to the exclusive model of economic man. Economic man has epitomized neo-liberal capitalism, which embraces competition and maximization of profit, resulting in a steep increase in economic inequality. The book demonstrates that women's inequality is a crucial factor in economic inequality, which cannot be fully understood without relating to women's situation and that economic woman cannot thrive in the conditions of economic inequality created under global neo-liberalism. Emphasising the international human rights guarantees of women's right to equality in all fields of life, the author documents women's increased participation in political, public, financial, and corporate institutions, employment, and entrepreneurship, with some women reaching high profile positions. Nevertheless, using global data, she

reveals that economic woman lags behind with a severe economic power deficit an unfulfilled promise of equal employment opportunity a gendered impact of poverty and barriers to gender equality in the family The book analyses the trap of women s increased burden of breadwinning in the context of discriminatory laws and practices infrastructural failures and policy gaps which preempt achievement of gender equality in economic life The book is intended for the general reader academics students policy makers and NGOs It shows economic woman at a global crossroads between a universal paradigm of gender equality and pervasive barriers to equal economic opportunity The author demonstrates that tackling gender inequality restoring welfare priorities and reducing economic inequality are inextricably linked Human rights and governments have a vital role to play in addressing them all to create a sustainable economic infrastructure for the lives of women and men
