## **Gendering The City Women Boundaries And Visions Of Urban Life:**

Gendering the City Kristine B. Miranne, Alma H. Young, 2000 Extrait de la couverture Gendering the city provides a significant contribution to urban studies balancing critiques of domination with analyses of how groups and individuals have actively carved out spaces that resist and reconfigure dominant gender regimes The collection draws on a wide range of empirical work conducted in both Canada and the United States to explore the diversity of women's experiences It is both grounded and provocative Ann Forsyth Harvard University Graduate School of Design **The Fear that Stalks** Lora Prabhu, Sarah Pilot, 2014-03-11 This book is an attempt to understand the causes nature and consequences of gender based violence in public spaces It provides a framework that locates gender based violence within the politics and dynamics of public space and helps us to understand the commonality between these diverse forms of violence ranging from sexual harassment sexual assault moral policing honour killing acid throwing witch hunting parading naked tonsuring rape and homicide The writers unpack and examine the idea of a public space although by and large a notional space they begin by identifying it as the geographical space between the home and the workplace and then go beyond this to look at the violation faced by homeless women and girls who live on the streets as well as those who work in public spaces in the unorganised sector Published by Zubaan **Psychology of Women** Florence L. Doan, 2016-05-23 Current planning practices have largely neglected the needs of the Lesbian Gay Bisexual and Transgender LGBT community for safe urban spaces in which to live work and play This volume fills the gap in the literature on the planning and development of

queer spaces and highlights some of the resistance within the planning profession to incorporate gay and lesbian concerns into the planning mainstream. Planning lags behind other disciplines concerned with queer urban issues. In contrast, the field of geography has developed a rich sub-specialty in the geographies of sex and gender that examines spaces and the variety of non-heteronormative populations that inhabit them. This volume brings together both planners and geographers with experience in planning to examine some of the fundamental assumptions of urban planning as they relate to the LGBT community. The first few chapters are substantial revisions and expansions of earlier influential work on planning for non-conformist populations and the preservation of LGBT neighborhoods. Subsequent chapters comprise original contributions that draw on the rich literature from queer theory, planning theory, and the geography of sexualities to explore the ways that nonconformist populations struggle with heteronormative expectations embedded in planning theory and procedures. These chapters consider the intersection of planning and a range of populations including transgendered and gender variant individuals. Subsequent chapters examine the ways that variations in the scale of urban and regional governance influence local politics around the implementation of more equitable policies at the city level. In addition, several chapters critically examine the implications of using the tolerance component of Richard Florida's creative cities arguments. The final section consists of two chapters that explore the ways that urban planning regimes have been used to regulate sexually oriented businesses and the way this regulation of sexualized spaces has implications on the heteronormativity of plans and planners. In summary, these chapters interrogate planning practice and pose questions for academic and professional planners about the ways that the queer community and its needs for spaces have shifted. What do those changes mean for the practice of planning 40 years after the North American Stonewall rebellion and looking forward to the next 40 years? To what extent does existing planning practice constrain the evolution of queer communities or seek to commercialize such spaces to the benefit of large developers and the detriment of marginalized members of the community? How might planning practice change to provide more direct support to the evolution of queer people and the spaces in which they live? This volume draws on these insights as well as the experiences of the various authors to lay out possible future directions for the field of planning to create truly inclusive urban areas.

Reger, Rachel L. Einwohner, 2017 The Oxford Handbook of U S Women s Social Movement Activism provides a comprehensive  
examination of scholarly research and knowledge on a variety of aspects of women s collective activism in the United States  
tracing both continuities and critical changes over time **Planning and LGBTQ Communities** Petra L. Doan, 2015-03-24

Although the last decade has seen steady progress towards wider acceptance of lesbian gay bisexual transgendered and  
queer LGBTQ individuals LGBTQ residential and commercial areas have come under increasing pressure from gentrification  
and redevelopment initiatives As a result many of these neighborhoods are losing their special character as safe havens for  
sexual and gender minorities Urban planners and municipal officials have sometimes ignored the transformation of these  
neighborhoods and at other times been complicit in these changes Planning and LGBTQ Communities brings together  
experienced planners administrators and researchers in the fields of planning and geography to reflect on the evolution of  
urban neighborhoods in which LGBTQ populations live work and play The authors examine a variety of LGBTQ residential  
and commercial areas to highlight policy and planning links to the development of these neighborhoods Each chapter  
explores a particular urban context and asks how the field of planning has enabled facilitated and or neglected the  
specialized and diverse needs of the LGBTQ population A central theme of this book is that urban planners need to think  
beyond queer space because LGBTQ populations are more diverse and dispersed than the white gay male populations that  
created many of the most visible gayborhoods The authors provide practical guidance for cities and citizens seeking to  
strengthen neighborhoods that have an explicit LGBTQ focus as well as other areas that are LGBTQ friendly They also  
encourage broader awareness of the needs of this marginalized population and the need to establish more formal linkages  
between municipal government and a range of LGBTQ groups Planning and LGBTQ Communities also adds useful material  
for graduate level courses in planning theory urban and regional theory planning for multicultural cities urban geography

Hayden, 2002-09-03 In a provocative critique of American housing patterns that perpetuate Victorian stereotypes of the home  
as woman s place and the city as man s world urban historian and architect Dolores Hayden tallies the personal and social  
costs that an architecture of gender creates for the two earner family the single parent family and single people She traces  
three models of home in historical perspective to document innovative alternatives for reconstructing neighborhoods
