**America** Donald M. Pattillo,2020-03-09 The industry known as general aviation encompassing all flying outside of the military and commercial airlines dates from the early days of powered flight As technology advanced making possible smaller aircraft that could be owned and operated by civilians manufacturers emerged to serve a growing market Increasingly this meant business flying as companies used aircraft in a variety of roles The industry struggled during the Great Depression but development continued small aircraft manufacturers became vital to the massive military production effort during World War II After the war rapid technological advancement and a robust prosperous middle class were expected to result in a

existing regulations must be changed to permit overland flight restrictions and the product still needs to be economically viable All of the above aspects must be considered and will be subject for discussion within this Master Thesis See also figure
