*Uncertainty and Imprecision in Decision Making and Decision Support: New Challenges, Solutions and Perspectives*

Krassimir T. Atanassov, Vassia Atanassova, Janusz Kacprzyk, Andrzej Kaluszko, Maciej Krawczak, Jan W. Owsinski, Sotir Sotirov, Evdokia Sotirova, Eulalia Szmidt, Slawomir Zadrozny, 2020-06-26 This book gathers selected papers from two important conferences held on October 24-28, 2018 in Warsaw, Poland: the Fifteenth National Conference of Operational and Systems Research BOS 2018, one of the leading conferences in the field of operational and systems research not only in Poland but also at the European level, and the Seventeenth International Workshop on Intuitionistic Fuzzy Sets and Generalized Nets IWIFSGN 2018, one of the premiere conferences on fuzzy logic. The papers presented here constitute a fair and comprehensive representation of the topics covered by both BOS 2018 and IWIFSGN 2018, including extensions of the traditional fuzzy sets, in particular on the intuitionistic fuzzy sets, as well as other topics in uncertainty and imprecision modeling. The Generalized Nets (GNs) are a powerful extension of the traditional Petri net paradigm, and InterCriteria Analysis is a new method for feature selection and analyses in multicriteria and multi-attribute decision making problems. The Workshop was dedicated to the memory of Professor Beloslav Riečan (1936-2018), a regular participant at the IWIFSGN workshops.

**Innovative Issues in Intelligent Systems** Vassil Sgurev, Ronald R. Yager, Janusz Kacprzyk, Vladimir Jotsov, 2016-02-05

This book presents a broad variety of different contemporary IT methods and applications. In Intelligent Systems, is displayed. Every book chapter represents a detailed, specific, far-reaching and original research in a respective scientific and practical field. However, all of the chapters share the common point of strong similarity in a sense of being innovative, applicable and mutually compatible with each other. In other words, the methods from the different chapters can be viewed as bricks for building the next generation thinking machines, as well as for other futuristic logical applications that are rapidly changing our world nowadays.

**Imprecision and Uncertainty in Information Representation and Processing** Plamen

Angelov, Sotir Sotirov, 2015-12-22 The book offers a comprehensive and timely overview of advanced mathematical tools for both uncertainty analysis and modeling of parallel processes, with a special emphasis on intuitionistic fuzzy sets and generalized nets. The different chapters, written by active researchers in their respective areas, are structured to provide a coherent picture of this interdisciplinary yet still evolving field of science. They describe key tools and give practical insights into and research perspectives on the use of Atanassov's intuitionistic fuzzy sets and logic and generalized nets for describing and dealing with uncertainty in different areas of science, technology and business. In a single, to-date unique book, here readers find theoretical chapters dealing with intuitionistic fuzzy operators, membership functions and algorithms, among other topics, as well as application-oriented chapters reporting on the implementation of methods and relevant case studies in management science, the IT industry, medicine and/or education. With this book, the editors wish to pay homage to Professor Krassimir Todorov Atanassov for his pioneering work on both generalized nets and intuitionistic fuzzy set.
