EBOOK: First Generation Entry into Higher Education Liz Thomas, Jocey Quinn, 2006-12-16 This book does not focus simply on the employment prospects of first generation higher education entrants but rather engages with the wider possibilities of social engagement and transformation that can arise from participation in higher education It provides essential reading for administrators policy makers managers academics and indeed anyone else interested in how to widen the socio economic base of higher education so that the process is informed by a significant concern with social justice and reducing inequality Rosemary Deem Professor of Education University of Bristol This book examines the proposition that parental education is a key factor contributing to the access and success of students but that insufficient attention is paid to this by researchers national systems and institutional interventions Analysis of research findings from ten countries plus a UK wide study indicates that parental education is more important in determining access to higher education than parental employment or financial status The book provides a clear conceptualisation of first generation entry exploring its complex interrelationship with social class Furthermore it demonstrates that when first generation entry is used as a lens it disrupts the taken for granted assumptions regarding widening participation and helps produce much more effective approaches to targeting access and supporting student success First Generation Entry into Higher Education provides a unique and insightful examination of how first generation entrants are supported or otherwise by different national approaches and institutional responses The book is essential reading for all with an interest in widening participation in higher education

Sport and Democracy in the Ancient and Modern Worlds Paul Christesen, 2012-10-15 This book explores the relationship between sport and democratization Drawing on sociological and historical methodologies it provides a framework for understanding how sport affects the level of egalitarianism in the society in which it is played The author distinguishes between horizontal sport which embodies and fosters egalitarian relations and vertical sport which embodies and fosters hierarchical relations Christesen also differentiates between societies in which sport is played and watched on a mass scale and those in which it is an ancillary activity Using ancient Greece and nineteenth century Britain as case studies Christesen analyzes how these variables interact and finds that horizontal mass sport has the capacity to both promote and inhibit democratization at a societal level He concludes that horizontal mass sport tends to reinforce and extend democratization

The Paradox of Diversity Wahideh Achbari, 2016-09-09 This book is about ethnic diversity in voluntary organizations and seeks to explain whether intergroup contact contributes to the development of generalized trust It relies on a novel multilevel design and data from Amsterdam in which 40 voluntary organizations and 463 participants have been sampled Contrary to conventional wisdom this book argues that cognitive processes are contributing more toward the evaluation of strangers or generalized trust than interethnic contact Since trusting unknown people is essentially a risky endeavor this suggests that participants of both association types who report trusting strangers can afford to do so because they are better educated have a more positive worldview and have had fewer negative life experiences That is to say they are socially more successful and view their future as more promising Previous findings are inconclusive since most studies that conclude diversity has led to less generalized trust do not include interethnic contact directly in their analyses These studies also downplay the importance of cognitive processes which may shape generalized trust What is more people join ethnically diverse civic groups because they already have more trustful

attitudes rather than learning to trust through interethnic contact Despite the recent multiculturalist backlash this book demonstrates that participation in ethno national organizations does not pose a threat to social cohesion The analysis in this book serves to build a general theory of trust that moves beyond emphasizing interaction between people who are different from each other but one that includes the importance of cognition Emerging Technology-Based Services and Systems in Libraries, Educational Institutions, and Non-Profit Organizations Chiu, Dickson K.
