Generation Games Genetic Engineering And The Future For Our Lives:

Generation Games Patricia Spallone,1992 *Genetic Engineering* Mark Y. Herring,2005-12-30 Genetic engineering has quickly become one of the more controversial issues of our time Herring provides a detailed history of the debate in a fair and balanced manner using proponents points of view to make individual cases both pro and con Narrative chapters cover such topics as the Human Genome Project gene splicing cloning genetically altered foods and DNA and crime solving Students and the general public will find a comprehensive survey of the genetic engineering debate Appendices include statements from Robert P George and Peter Singer two of the most prominent scholars on the subject and a bibliography of print and electronic resources for further research

The New Genetics and the Public's Health Alan R. Petersen,Robin Bunton,2002 This volume addresses the emerging social and political consequences of the new genetics and provides a critique of current research and practice in public health

Embodied Progress Sarah Franklin,2002-09-11 New reproductive technologies such as in vitro fertilization have been the subject of intense public discussion and debate worldwide In addition to difficult ethical moral personal and political questions new technologies of assisted conception also raise novel socio cultural dilemmas How are parenthood kinship and procreation being redefined in the context of new reproductive technologies Has reproductive choice become part of consumer culture Embodied Progress offers a unique perspective on these and other cultural dimensions of assisted conception techniques Based on ethnographic research in Britain this study foregrounds the experiences of women and couples who undergo IVF whilst also asking how such experiences may be variously understood

The Embryo Research Debate Michael Joseph Mulkay,1997-02-13 Scientific research involving human embryos was a major topic of public debate in Britain during the 1980s Despite strong support from the scientific community embryo research was initially condemned by many ordinary people as well as by special interest groups and came close to being banned by Act of Parliament Michael Mulkay describes the dynamics of the parliamentary struggle over the future of embryo research focusing on such issues as the clash between the anti abortion and pro research lobbies the tactics of the Government political ideology the media s role the importance of gender religion the impact of science fiction the lure of medical advance and the difficulty of maintaining ethical control He explains how the advocates of embryo research eventually triumphed and ends with an examination of the cultural tensions which linger after the debate

The Concept of Nature in Science and Theology Niels Henrik Gregersen,Michael W. S. Parsons,Christoph Wassermann,1997 Body/Politics Thomas Shevory,2000-02-28 Negotiating the terrain between techno optimism and eco pessimism this work establishes the political connections between technologies of the body property and the environment Specific technologies of the body such as surrogacy and in vitro fertilization are examined in relation to their political and legal constructions Next Shevory analyzes private property as an evolving historical concept that implicates environmental and biological transformations with particular attention given to biotechnology cases He then considers the body s

appearance and its alterations through plastic surgery dieting or piercing as political constructions A theoretical overview specifies technoprogressivist liberal and technophobic traditions especially as they have evolved in the United States during the second half of the 20th century Drawing upon critical and feminist theories Shevory specifies a body politics that negotiates the terrain between these two traditions Body technologies and markets he argues interact to consolidate and reinforce dominant systems of power while at the same time resisting and sometimes subverting them Technology is often a factor in the fragmentation of evolving political ideological discourses on the left and right however the resulting instabilities create the potential for both the expansion of global capital and its subversion via democratic interventions

Technologies of Procreation Jeanette Edwards,Sarah Franklin,Eric Hirsch,Frances Price,Marilyn Strathern,2005-08-18 Technologies of Procreation bridges the gap between medical technology and cultural values It looks at the ways in which the technologies of procreation affect society from an anthropological perspective *History After Lacan* Teresa Brennan,2002-09-11 Lacan was not an ahistorical post structuralist Starting from this controversial premiss Teresa Brennan tells the story of a social psychosis She begins by recovering Lacan s neglected theory of history which argued that we are in the grip of a psychotic s era which began in the seventeenth century and climaxes in the present By extending and elaborating Lacan s theory Brennan develops a general theory of modernity Contrary to postmodern assumptions she argues we need general historical explanation An understanding of historical dynamics is essential if we are to make the connections between the outstanding facts of modernity ethnocentrism the relationship between the sexes and ecological catastrophe

National Library of Medicine Current Catalog National Library of Medicine (U.S.),1993 **Earthy Realism** Mary Midgley,2012-07-27 GAIA named after the ancient Greek mother goddess is the notion that the Earth and the life on it form an active self maintaining whole By its use of personification it attacks the view that the physical world is inert and lifeless It has a scientific side as shown by the new university departments of earth science which bring biology and geology together to study the continuity of the cycle It also has a visionary or spiritual aspect What the contributors to this book believe is needed is to bring these two angles together With global warming now an accepted fact the lessons of GAIA have never been more relevant and urgent **Towards Prescribing Practice** John McKinnon,2007-04-09 The variety and number of non medical practitioners identified for prescribing activity is growing rapidly Across the country universities have validated prescribing programmes designed for generic health care practice with a distance learning component Towards Prescribing Practice offers readers a comprehensive guide to the principles and practice of prescribing The subject matter relates to the government content standards for study programmes and takes its cue from recent research in prescribing and patient care in practice This book embraces the perennial core principles of prescribing practice management and leadership Content is organised to facilitate progressive learning with space allocated in each chapter to practice application through discussion and exercises The early inclusion of a section on patient centred planning and concordance enables the reader to assimilate

new knowledge within an individualised care approach The final three chapters are written from different clinical perspectives mental health palliative care and emergency care providing assistance to specific areas of prescribing practice

Strategies for Theory R. L. Rutsky, Bradley J. Macdonald, 2003-05-08 Interdisciplinary essays on the role of high theory in politics and popular culture **Current Catalog** National Library of Medicine (U.S.), 1993 First multi year cumulation covers six years 1965 70 Conceiving the New World Order Faye D. Ginsburg, Rayna Rapp, 1995-07-31 This volume provides an investigation of the dynamics of reproduction Using reproduction as an entry point the authors examine how cultures are produced contested and transformed as people imagine their collective future in the creation of the next generation **Encyclopedia of Religion in American Politics** Jeffrey Schultz, John G. West, Iain Maclean, 1998-12-14 Today such issues as abortion capital punishment sex education racism prayer in public schools and family values keep religion and politics closely entwined in American public life This encyclopedia is an A to Z listing of a broad range of topics related to religious issues and politics ranging from the religious freedom sought by the Pilgrims in the 1620s to the rise of the religious right in the 1980s The Perfect Baby Glenn McGee, 2000 The Perfect Baby is the most popular introduction to ethical issues in genetics This new edition has been updated to discuss and debate advances in high tech reproduction genetic testing gene therapy human cloning and stem cell research It includes a new epilogue by cloning pioneer Ian Wilmut and Glenn McGee **The Meanings of the Gene** Celeste Michelle Condit, 1999 The Meanings of the Gene is a compelling look at societal hopes and fears about genetics in the course of the twentieth century The work of scientists and doctors in advancing genetic research and its applications has been accompanied by plenty of discussion in the popular press from Good Housekeeping and Forbes to Ms and the Congressional Record about such topics as eugenics sterilization DNA genetic counseling and sex selection By demonstrating the role of rhetoric and ideology in public discussions about genetics Condit raises the controversial question Who shapes decisions about genetic research and its consequences for humans scientists or the public Analyzing hundreds of stories from American magazines and later television news from the 1910s to the 1990s Condit identifies three central and enduring public worries about genetics that genes are deterministic arbiters of human fate that genetics research can be used for discriminatory ends and that advances in genetics encourage perfectionistic thinking about our children Other key public concerns that Condit highlights are the complexity of genetic decision making and potential for invasion of privacy conflict over the human genetic code and experimentation with DNA and family genetics and reproductive decisions Her analysis reveals a persistent debate in the popular media between themes of genetic determinism such as eugenics and more egalitarian views that place genes within the complexity of biological and social life The Meanings of the Gene offers an insightful view of our continuing efforts to grapple with our biological natures and to define what it means and will mean in the future to be human *Science and the Construction of Women (RLE Feminist Theory)* Mary Maynard, 2012-11-12 Science and the Construction of Women is a multi disciplinary exploration of the major

questions currently challenging feminist scholars of science The authors ask key questions What constitutes science How have feminists investigated it How does science construct women How can we create a feminist discourse of science Are the current developments to women s advantage or disadvantage Their answers draw on material from a wide range of natural scientific humanities and social science sources critically examining theoretical approaches from the postmodern to the materialist to the cyborgian A key argument of the book is that there are strong intellectual and pragmatic reasons the rapid development of information technology advances in fertility treatment and genetic engineering feminist concern for environmental issues why feminism must rigorously engage with issues of a scientific and technological nature Science and the Construction of Women provides an important contribution to the opening up and broadening of debate in the field This book will be an important text for students of gender and women s studies and science studies It is also designed to be read by feminists both inside and outside the academy and to appeal to all those with interests in the sociology of knowledge and the history of ideas Biotechnology, Public Perception ,1996
