**Quality Assessment of Printed Circuit Boards** Preben Lund,1985 **Computer-Based Automation** Julius T. Tou,2012-12-06 It has been recognized that productivity improvement is an important issue of the 80 s It is regarded as the most efficient way to improve national economy and to enrich the quality of life The key to productivity improvement is advanced automation especially computer integrated automation for engineering design and office operations as well as manufacturing processes This is the theme of 1983 International Conference on Advanced Automation ICAA 83 This book contains the articles which are the revised and updated version of the papers presented at the ICAA 83 Conference

Traditionally automation is synonymous with mechanization but this Conference has treated automation from a different point of view We consider automation as a process to unify various automated information processing systems for performing business administration design engineering and manufacturing functions in addition to the traditional fixed automation in production In other words design automation and office automation form an integral part of factory automation to accomplish comprehensive computer integrated manufacturing and production In engineering and manufacturing today quality design and high productivity are synonymous with the use of computers robots expert systems and other computer based technologies The greater the degree of computer based automation exploited and implemented the greater a nation's ability to survive in tomorrow's extremely competitive world market      **Technical Facilities Catalog** United States.
