Black Swan: Economic Crises, Volume II Bernur Açıkgöz,2023-06-23 This book continues the discussion from Volume I on economic fiscal and financial crises in world history that have had a great impact on the entire world and the fiscal measures taken by governments to combat each crisis Such events are often described as black swans a concept introduced by Economist and Risk Analyst Nassim Nicholas Taleb in the book Fooled By Randomness in 2001 in reference to events that were thought to be impossible but had a huge impact when they did happen The beginning of this book notes that crises are

catastrophic periods when the consequences of economic mistakes made by governments are reflected to the public Although economic crises are seen as opportunities in some cases they have created a burden for the people Some economic crises even triggered the world war A recent example Adolf Hitler was seen as a hope of salvation in Germany due to the Great Depression and was brought to power The twentieth century when two great world wars took place on the stage of history is the witness of major economic crises as well as wars These crises have caused social and economic paradigm shifts to be experienced much faster and more effectively than the previous centuries The transformation of the demand oriented economic understanding created by the Great Depression in 1929 into an interventionist social state understanding especially after the World War Two increased the intervention of states in the socioeconomic field In this period the reconstruction of the countries the development of social welfare services the assurance of human rights the acceleration of industrialization and development and the economic growth and income growth of the countries resulted in the golden age enjoyed by the societies of the period The interventionist social state seen as a prescription and opportunity in the past crisis was one of the cornerstones of the crisis in the last quarter of the century in the 1970s Against interventionism with the rise of neo liberalism financial liberalization information society and technological discoveries globalization has become the new phenomenon of the age This book examines in detail the causes occurrences and results of the twentieth century crises

*Cool Capitalism* Jim McGuigan, 2009-10-09 Thomas Frank coined the term the conquest of cool This book shows how this conquest is at the heart of the dynamics of contemporary capitalism Jim McGuigan argues that cool capitalism incorporates disaffection into capitalism itself absorbing rebellion and neutralising opposition to the present system of culture and society The book explores a huge variety of cultural examples from the sleek images of mainstream advertising to the fringes of artistic production offering a vigorous critique of our understanding of subversion resistance and counter culturalism Is there is still any space left for rebellion against the seductive power of the free market economy [The Shifting Global](#)

[Balance of Power: Perils of a World War and Preventive Measures](#) Dr. Yana Korobko, Mahmoud Musa, 2014-06-09 Many believed that the world would remain everlastingly unchangeable in the aftermath of victory of the Allies the United States the Soviet Union China United Kingdom and France in World War II They remodeled the world map amongst themselves and affirmed that they will be guarantors of the international status quo However those who pledged to conserve peace are now breaking it leading the planet to the edge of clash This book differs from all others that dealt with possible World War III scenarios since it combines knowledge in the fields of history international relations economics sociology and psychology and philosophy Thus giving the reader a broader outlook on such matters as Potentially risky world war scenarios Dialogue between the West and Islam New emerging superpowers Psychological and Cyber Warfare Preventive mechanisms such as early warning and preparedness operations
