Global Environmental Change Interactions Of Science Policy And Politics In The United States:

Global Environmental Change Robert G. Fleagle,1994-09-29 This study examines how threats to the environment the facts and probable impacts of global environment change deserve local national and international attention **The Oxford Handbook of Climate Change and Society** John S. Dryzek,Richard B. Norgaard,David Schlosberg,2011-08-18 Climate change presents perhaps the most profound challenge ever confronted by human society This volume is a definitive analysis drawing on the best thinking on questions of how climate change affects human systems and how societies can do and should respond Key topics covered include the history of the issues social and political reception of climate science the denial of that science by individuals and organized interests the nature of the social disruptions caused by climate change the economics of those disruptions and possible responses to them questions of human security and social justice obligations to future generations policy instruments for reducing greenhouse gas emissions and governance at local regional national international and global levels **Global Environmental Policies** H. Jeong,2001-09-27 The worst chemical disaster ever could be happening right now In India and Bangladesh between forty and eighty million people are at risk of consuming too much arsenic from well water that might have already caused one hundred thousand cancer cases and thousands of deaths Many millions elsewhere in South East Asia and South America may soon suffer a similar fate *Venomous Earth* is the story of this tragedy the geology the biology the politics and the history It starts in Ancient Greece touches down in today s North America and takes in William Morris alchemy farming medicine mining and a cosmetic that killed two popes Geography and Ethics James D. Proctor,David M. Smith,2002-09-11 This book represents a landmark exploration of the common terrain of geography and ethics Drawing together specially commissioned contributions from distinguished geographers across the UK North America and Australasia the place of geography in ethics and of ethics in geography is examined through wide ranging thematic chapters Geography and Ethics is divided into four sections for discussion and exploration of ideas Ethics and Space Ethics and Place Ethics and Nature and Ethics and knowledge all of which point to the rich interplay between geography and moral philosophy or ethics **Confronting Climate Change** ,2008 Global Environmental Politics Jean-Frédéric Morin,Amandine Orsini,Sikina Jinnah,2020 Global Environmental Politics provides a fully up to date and comprehensive introduction to the most important issues dominating this fast moving field Going beyond the issue of climate change the textbook also introduces students to the pressing issues of desertification trade in hazardous waste biodiversity protection whaling acid rain ozone depletion water consumption and over fishing Importantly the authors pay particular attention to the interactions between environmental politics and other governance issues such as gender trade development health agriculture and security *Eyewitness* Robert Fleagle,2015-03-30 In this book Robert Fleagle describes the transformations occurring in the atmospheric sciences in the span of his professional career The author observes a shift from the science s primitive origins in weather forecasting to a focus on numerical modeling of environmental change The book

presents the author's observations of the role science of the atmosphere has progressively played in climate change as well as social and political policy

Historical Perspectives on Climate Change James Rodger Fleming, 2005-07-14 This intriguing volume provides a thorough examination of the historical roots of global climate change as a field of inquiry from the Enlightenment to the late twentieth century Based on primary and archival sources the book is filled with interesting perspectives on what people have understood experienced and feared about the climate and its changes in the past Chapters explore climate and culture in Enlightenment thought climate debates in early America the development of international networks of observation the scientific transformation of climate discourse and early contributions to understanding terrestrial temperature changes infrared radiation and the carbon dioxide theory of climate But perhaps most important this book shows what a study of the past has to offer the interdisciplinary investigation of current environmental problems

Policy Uncertainty and Risk Tomas Hellström, Merle Jacob, 2011-06-28 Policy Uncertainty and Risk presents a contribution to risk analysis and risk management in public policy and management at large Special emphasis is put on the utilization of scientific knowledge by decision makers in instances where knowledge in both spheres of science and administration is highly uncertain and contested The book therefore contributes a model of science practitioner interaction in a policy area of strong current relevance The perspective is a realist constructivist one which means that risk and policy are taken to be socially predicated insofar as we can choose and change the way we define and interact with its practices It is realist insofar as we continually use such constructions to re define and re structure the world we live in Although essentially theory driven and conceptually oriented the authors develop their argument for a new interpretation of policy relevant science through a number of pressing case studies These studies include the recent BSE CJD crises in the UK the introduction of Marine Protected Areas in Sweden and the current practices surrounding risk management in corporate

bodies Drawing on empirical cases and theoretical explication the book provides a number of suggestions as to how risk analysis and risk management may be more properly conceived of both from a practitioner as well as from an academic point of view Historical Essays on Meteorology, 1919-1995 James Fleming, 2016-06-30 On the occasion of its 75th anniversary the American Meteorological Society engaged a number of eminent pioneers and leading practitioners to write about the fields they helped develop They were joined by several professional historians of science and technology The resulting essays constitute a substantial sampling of what has been learned since 1919 in the atmospheric sciences and services in research in education and in the private sector This volume will be of interest to weather professionals and enthusiasts historians of science and to students of science and history It will help us calibrate where we are where we have been and where we might be going as a discipline Hopefully it will inspire others to value the past and to dig into it more deeply Such attention to history is a necessary step in the maturation of a scientific discipline **Research Handbook on International**

Environmental Law Fitzmaurice, Malgosia, Brus, Marcel, Merkouris, Panos, Rydberg, Agnes, 2021-11-12 This thoroughly updated and revised second edition of this foundational Handbook combines practical and theoretical analyses to cover a wide array of cutting edge issues in international environmental law IEL It provides a comprehensive view of the complexity of IEL both as a field in its own right and as part of the wider system of international law *Routledge Handbook of Global Environmental Politics* Paul G. Harris, 2022-03-24 This handbook brings together leading international academic experts to provide a comprehensive and authoritative survey of global environmental politics Fully revised updated and expanded to 45 chapters the book Describes the history of global environmental politics as a discipline and explains the various theories and perspectives used by scholars and students to understand it Examines the key actors and institutions in global environmental politics explaining the roles of states international organizations regimes international law foreign policy institutions domestic politics corporations and transnational actors Addresses the ideas and themes shaping the practice and study of global environmental politics including sustainability consumption expertise uncertainty security diplomacy North South relations globalization justice ethics public participation and citizenship Assesses the key issues and policies within global environmental politics including energy climate change ozone depletion air pollution acid rain transport persistent organic pollutants hazardous wastes rivers wetlands oceans fisheries marine mammals biodiversity migratory species natural heritage forests desertification food and agriculture This second edition includes new chapters on plastics climate change energy earth system governance and the Anthropocene It is an invaluable resource for students scholars researchers and practitioners of environmental politics environmental studies environmental science geography globalization international relations and political science Chapter 19 of this book is freely available as a downloadable Open Access PDF under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license available at <http://www.taylorfrancis.com> The Science and Politics of Global Climate Change Andrew E. Dessler, Edward A. Parson, 2006 In this accessible primer Dessler

and Parson combine their expertise in atmospheric science and public policy to help scientists policy makers and the public sort through the conflicting claims in the climate change debate The authors explain how scientific and policy debates work summarize present scientific knowledge and uncertainty about climate change and discuss the available policy options Along the way they explain WHY the debate is so confusing Anyone with an interest in how science is used in policy debates will find this discussion illuminating The book requires no specialized knowledge but is accessible to any college educated general reader who wants to make more sense of the climate change debate It can also be used as a textbook to explain the details of the climate change debate or as a resource for science students or working scientists to explain how science is used in policy debates

Contentious Geographies Maxwell T. Boykoff,2016-05-13 The human environment relationship intimately intertwined and often contentious is one of the most pressing concerns of the 21st century Explored through an array of critical approaches this book brings together case studies from across the globe to present significant cutting edge research into political ecologies as they relate to multi form contestations over environments resources and livelihoods Covering a range of issues such as popular discourses of environmental collapse climate change water resource struggles displacement agro food landscapes and mapping technologies this edited volume works to provide a broad and critical understanding of the narratives and policies more subtly shaping and being shaped by underlying environmental conflicts By exploring the power laden processes by which environmental knowledge is generated framed communicated and interpreted Contentious Geographies works to reveal how environmental conflicts can be re considered and thus re opened to enhance efforts to negotiate more sustainable environments and livelihoods
