Global Governmentality Governing International Spaces:

Global Governmentality Wendy Larner, William Walters, 2004-08-02 Foucault's thoughts on governmentality have made a significant impact on the studies of power and governance in modern societies. However, most studies of governmentality confine themselves to the exploration of power within nation states. Global Governmentality extends Foucault's political thought towards international studies, exploring the governance of the global, the international, the regional, and many other extra-domestic spaces. Combining historical and contemporary outlooks, this book offers innovative interdisciplinary explorations of such issues as international peacekeeping, refugees, political rationalities of security, and neoliberalism, the spatiality of globalization, the genealogy of development, and the ethical governance of corporate activity. At a time when many of the geopolitical and economic certainties which framed international affairs are in flux, Global Governmentality is suggestive of new territories and lines for international analysis. It will be of interest to students and researchers of both governmentality and international studies.

The Law of the List Gavin Sullivan, 2020-04-23 The spread of violent extremism, 9/11, the rise of ISIL, and movement of foreign terrorist fighters are dramatically expanding the powers of the UN Security Council to govern risky cross-border flows and threats by non-state actors. New security measures and data infrastructures are being built that threaten to erode human rights and transform the world order in far-reaching ways. *The Law of the List* is an interdisciplinary study of global security law in motion. It follows the ISIL and Al Qaida sanctions list created by the UN Security Council to counter global terrorism to different sites around the world, mapping its effects as an assemblage. Drawing on interviews with Council officials, diplomats, security experts, judges, secret diplomatic cables, and the author's experiences as a lawyer representing listed people, *The Law of the List* shows how governing through the list is reconfiguring global security, international law, and the powers of international organisations.

Global Public Health Vigilance Lorna Weir, Eric Mykhalovskiy, 2010-05-17 Describes and analyzes the transformations in global mechanisms for monitoring infectious disease outbreaks that have occurred since the mid 1990s. Climate Action in a Globalizing World Carl Cassegard, Linda Soneryd, Hakan Thorn, Asa Wettergren, 2017-05-18 The existence and urgency of global climate change is a matter of scientific consensus. Yet the global politics of climate change have been anything but consensual. In this context, a wave of global climate activism has emerged in the last decade in response to the perceived failure of the political negotiations. This book provides a unique comparative study of environmental movements in USA, Japan, Denmark, and Sweden, analyzing their interaction with the international climate institutions of the United Nations, with national governments, and with currents in the global climate movement. It documents how and why the movement evolved between the Copenhagen Summit of 2009 and the Paris Summit of 2015, altering its strategies and tactics while attracting new actors to the issue area. Further, it demonstrates how the development

of global environmental networks has increased contact between environmental movements in the Global North and those from the Global South resulting in the establishment of climate justice as a political cause and unifying frame for global climate activism

Postcolonial Governmentalities Terri-Anne Teo,, Elisa Wynne-Hughes,2020-02-18 This edited volume asks how governmentality and postcolonial approaches can be brought together to help us better understand specific sites and practices of contemporary postcolonial governance The framework approach was inspired by the recent use of governmentality approaches that emphasize how governance functions not solely through states but through multiple tactics and means that regulate the conduct of individuals and institutions through both freedom and constraint A postcolonial approach to governance exposes the role of postcolonial sites and practices in shaping governance and the inequalities embedded within it insofar as standards of conduct determine which subjects are privileged and excluded Postcolonial perspectives show how governance can be both productive and repressive functioning to impose a fixed code of conduct that objectifies gendered racialized sexualized others as part of its project of improvement In discussing governance we must also consider how power is negotiated and challenged through forms of resistance and counter conduct This volume argues that we need to incorporate postcolonial theories and carefully examine postcolonial practices and sites to understand how contemporary governance shapes various transnational inequalities and social divisions The authors in this edited volume illustrate the value of postcolonial governance as a conceptual framework through empirical examples from Asia Australia Africa and Europe These cases unpack practices of governance operating within complex political landscapes

War, Police and Assemblages of Intervention Jan Bachmann, Colleen Bell, Caroline Holmqvist, 2014-11-13 This book reflects on the way in which war and police policing intersect in contemporary Western led interventions in the global South The volume combines empirically oriented work with ground breaking theoretical insights and aims to collect for the first time thoughts on how war and policing converge amalgamate diffuse and dissolve in the context both of actual international intervention and in understandings thereof The book uses the caption WAR POLICE to highlight the distinctiveness of this volume in presenting a variety of approaches that share a concern for the assemblage of war police as a whole The volume thus serves to bring together critical perspectives on liberal interventionism where the logics of war and police policing blur and bleed into a complex assemblage of WAR POLICE Contributions to this volume offer an understanding of police as a technique of ordering and collectively take issue with accounts of the character of contemporary war that argue that war is simply reduced to policing In contrast the contributions show how both historically and conceptually the two are always already connected Contributions to this volume come from a variety of disciplines including international relations war studies geography anthropology and law but share a critical poststructuralist approach to the study of international intervention war and policing This volume will be useful to students and scholars who have an interest in social theories on intervention war security and the making of international order

Biopolitics of Security Michael Dillon, 2015-02-11 Taking its inspiration from Michel Foucault this volume of essays integrates the analysis of security into the study of modern political and cultural theory Explaining how

both politics and security are differently problematised by changing accounts of time the work shows how during the course of the 17th century the problematisation of government and rule became newly enframed by a novel account of time and human finitude which it calls factical finitude The correlate of factical finitude is the infinite and the book explains how the problematisation of politics and security became that of securing the infinite government of finite things It then explains how concrete political form was given to factical finitude by a combination of geopolitics and biopolitics Modern sovereignty required the services of biopolitics from the very beginning The essays explain how these politics of security arose at the same time changed together and have remained closely allied ever since In particular the book explains how biopolitics of security changed in response to the molecularisation and digitalisation of Life and demonstrates how this has given rise to the dangers and contradictions of 21st century security politics This book will be of much interest to students of political and cultural theory critical security studies and International Relations Beyond Liberal Peacebuilding Elisa

Randazzo, 2017-06-14 This book examines the logic behind the shifts and paradigm changes within the scholarship on peacebuilding In particular the book is concerned with examining if and how these shifts have significantly altered how we think about peacebuilding beyond the liberal peacebuilding paradigm To do so the book engages with the logic of critique that has led to the emergence of different theoretical approaches to peacebuilding from hands on institutionalisation to the local turn It uses the case of Kosovo to understand how a lessons learnt approach facilitated the shift towards more invasive and intrusive forms of peacebuilding first However it is also crucial to understanding the recent local turn as the rise of local ownership discourses in Kosovo is fundamentally tied to the critiques of extensive international missions and the associated resistance and marginalisation of local agency The book examines the implications of the framing of everyday agency in order to assess the extent to which these bottom up approaches have been able to by pass the problems attributed to the liberal peace approach It argues that despite its critical and radical intentions the local turn retains certain foundational modernist and positivist qualities that have so far characterised the very mainstream approaches these critiques claim to transcend This book will be of much interest to students of peacebuilding statebuilding peace and conflict studies security studies and International Relations in general *Cosmopolitan Government in Europe* Owen Parker, 2013-04-26 The

invocation of the market has been omnipresent in media discussions of crisis Europe On the one hand the market is presented as that to which EU member states must collectively respond It is the very purpose of a post national government and that which dictates individual and collective identities The expansion of market is that which guarantees and constitutes peace in Europe On the other hand the market is that which government must seek to tame It is the servant of government and ought not be permitted to undermine collective identities and solidarities associated with the juridical imaginary of social contract and sovereign nation state It is from this perspective the expansion of the social institutions of nation state into the post national arena that will constitute a lasting peace in Europe *Cosmopolitan Government in Europe* uses a Foucauldian

lens to consider the ethics of the scholarly and institutional discourses associated with these apparently divergent market and legal cosmopolitan visions of Europe. It reflects on attempts to reconcile or move beyond these discourses particularly through the invocation of more pluralist modes of governance but claims that such moves have been largely unsuccessful in both practice and theory. It argues that the very ambiguity in the relationship between the ideal subjects that these market and legal visions promote respectively post national entrepreneur and citizen is that which permits a space for resistance and politics. Thus the book argues for a pragmatic politics which is cognizant of the violent potential inherent in any cosmopolitan attempt to govern Europe while recognising the contemporary dangers associated with the dominance of a market cosmopolitan Europe. This work is an important and timely intervention in contemporary debates about democratic Europe and its shortcomings and will be of great interest to scholars of international political theory, European studies and international political economy.

Change a Life, Change your Own Peter Ove, 2018-06-11T00:00:00Z. **Change a Life Change Your Own** is a long overdue adult discussion about how child sponsorship, a spectacularly successful fundraising tool, infantilizes both donor and recipient, turning good intentions into paternalism and reinforcing stereotypical Western ideas about helplessness and hopelessness in developing countries. Ian Smillie, author of *The Charity of Nations: Freedom from Want and Diamonds*, **Change a Life Change Your Own**. For less than a dollar a day. For the cost of one coffee a day. With these slogans and their accompanying images of poor children, some of the world's largest development organizations invite the global North to engage in one of their most prominent and successful fundraising techniques: child sponsorship. But as Peter Ove argues in **Change a Life Change Your Own**, child sponsorship is successful not because it addresses the needs of poor children but because it helps position what it means to live ethically in an unequal and unjust world. In this way, child sponsorship is seen as more than an effective marketing tool; it is a powerful mechanism for spreading particular ideas about the global South, the global North, and the relationship between the two. Through sponsorship, the desire to raise money, secure appropriate childhoods, and become better people ends up taking priority over the goal of living together well on a global scale. Drawing on in-depth interviews with child sponsors and sponsorship staff, **Change a Life Change Your Own** explores the contexts in which sponsorship promotional material is produced, interpreted, and acted upon. This is not an exposé on the use of sponsorship dollars or high administrative costs; it is a clearly written and compelling account of how the problem of development is constructed such that child sponsorship is seen to be a rational and ethical solution.

Global Governance in a World of Change Michael N. Barnett, Jon C. W. Pevehouse, Kal Raustiala, 2021-12-09 Global governance has come under increasing pressure since the end of the Cold War In some issue areas these pressures have led to significant changes in the architecture of governance institutions In others institutions have resisted pressures for change This volume explores what accounts for this divergence in architecture by identifying three modes of governance hierarchies networks and markets The authors apply these ideal types to different issue areas in order to assess how global governance has changed and why In most issue areas hierarchical modes of governance established after World War II have given way to alternative forms of organization focused on market or network based architectures Each chapter explores whether these changes are likely to lead to more or less effective global governance across a wide range of issue areas This provides a novel and coherent theoretical framework for analysing change in global governance This title is available as Open Access on Cambridge Core
