Global Justice and International Economic Law Frank J. Garcia, 2013-04-15 For centuries international trade has been seen as essential to the wealth and power of nations. More recently we have started to understand its problematic role as an engine of distributive justice. In this compelling book Frank J. Garcia proposes a new way to evaluate, construct and manage international trade, one that is based on norms of economic justice, comparative advantage and national interest. Garcia examines three ways to conceptualize the problem of trade and global justice drawn from Rawlsian liberalism, communitarianism and consent theory. These approaches illustrate specific issues of importance to the way global justice has been theorized, offering a pluralistic mode of arguing for global justice and highlighting the unique modes of discourse we employ when engaging with global justice and their implications for conceptualizing and arguing the problem. Garcia suggests a new direction for trade agreements built around truly consensual trade negotiations and the kind of international economic system they would structure.

Democratizing Global Justice John S. Dryzek, Ana Tanasoca, 2021-06-10 The tensions between democracy and justice have long preoccupied political theorists. Institutions that are procedurally democratic do not necessarily make substantively just decisions. *Democratizing Global Justice* shows that democracy and justice can be mutually reinforcing in global governance, a domain where both are conspicuously lacking and indeed that global justice requires global democratization. This novel reconceptualization of the problematic relationship between global democracy and global justice emphasises the role of inclusive deliberative processes. These processes can empower the

agents necessary to determine what justice should mean and how it should be implemented in any given context Key agents include citizens and the global poor and not just the states but also international organizations and advocacy groups active in global governance The argument is informed by and applied to the decision process leading to adoption of the Sustainable Development Goals and climate governance inasmuch as it takes on questions of climate justice
