The Handbook of Civil Society in Africa Ebenezer Obadare, 2013-09-21 This volume brings together the most up to date analyses of civil society in Africa from the best scholars and researchers working on the subject Being the first of its kind it casts a panoramic look at the African continent drawing out persisting if often under communicated variations in regional discourses In a majority of notionally global studies Africa has received marginal attention a marginality often highlighted by the usual token chapter Filling a critical hiatus the Handbook of Civil Society in Africa takes Africa African developments and African perspectives very seriously and worthy of academic interrogation in their own right It offers a critical clear sighted perspective on civil society in Africa and positions African discourses within the framework of important regional and global debates It promises to be an invaluable reference work for researchers and practitioners working in the fields of civil society nonprofit studies development studies volunteerism civic service and African studies Endorsements This volume signposts a critical turning point in the renewed engagement with the theory and practice of civil society in Africa

Moving from traditional concerns with disquisitions on the appropriateness and possibility of the existence and vibrancy of the idea of civil society on the continent the volume approaches the forms contents and features of the actually existing civil society in Africa from thematic regional and national angles It demonstrates clearly the extent to which core intellectual work on civil society in Africa has largely moved from concerns with cultural reductionism to a nuanced examination of the complexities of formal non formal organizational non organizational traditional newer usual unusual engagements detailing the extent to which over time civil society as a concept has been indigenized appropriated and adapted in the terrains of politics society economy culture and new technologies on the continent In all this the book accomplishes the near impossible Without sacrificing the vigour rigor and freshness of the often unpredictable fruits of up to date research into regional and national differences that crop up in the documentation of Africa s multiple realities and discourses the volume weaves together a rich tapestry of the historical theoretical and practical dimensions of an expanding civil society sector and accompanying growth in popular discourse advocacy and academic literature in such a diverse continent as Africa into a meaningful whole of insightful themes Written and edited by a very distinguished cross continental and multi disciplinary collection of researchers research students practitioners and activists the volume provides cutting edge evidence and makes a definitive case for a new lease of life for civil society research in Africa Adigun Agbaje Professor of Political Science University of Ibadan Nigeria Throughout Africa forms of civic engagement and political participation have seen dynamic change in recent decades yet conceptions of civil society have rarely accounted for this evolution This volume is an essential source of new thinking about political association and collective action in Africa The authors offer a wealth of analysis on changing organizations and social movements new forms of interaction and communication emerging strategies and issues diverse social foundations and the theoretical implications of a shifting associational landscape The contributors provide an invaluable addition to the comparative literature on political change democratic development and social movements in Africa Peter Lewis Johns Hopkins University School of Advanced international Studies *Genre and the Performance of Publics* Mary Jo Reiff, Anis Bawarshi, 2016-03-01 In recent decades genre studies has focused attention on how genres mediate social activities within workplace and academic settings *Genre and the Performance of Publics* moves beyond institutional settings to explore public contexts that are less hierarchical broadening the theory of how genres contribute to the interconnected and dynamic performances of public life Chapters examine how genres develop within publics and how genres tend to mediate performances in public domains setting up a discussion between public sphere scholarship and rhetorical genre studies The volume extends the understanding of genres as not only social ways of organizing texts or mediating relationships within institutions but as dynamic performances themselves By exploring how genres shape the formation of publics *Genre and the Performance of Publics* brings rhetoric composition and public sphere studies into dialogue and enhances the understanding of public genre performances in ways that contribute to research on and teaching of public

discourse **The Worth of Goods** Jens Beckert, Patrik Aspers, 2011-06-30 How do we place value on goods and importantly why Valuation and pricing are core issues in the market economy but understanding of these concepts and their interrelation is weak In response *The Worth of Goods* takes a sociological approach to the perennial but timely question of what makes a product valuable Structured in three parts it first examines value in the broader sense moral values and how they are formed and the relations between economic and non economic values discussing such matters as the value of an oil spill the price of a scientific paper value in ethical consumption and imaginative value The second part discusses the issues surrounding valuation in aesthetic markets specifically wine fashion models art and the creative industries The third part analyzes valuation in financial markets credit rating agencies stock exchange markets and industrial production This pioneering volume brings together leading social scientists to provide a range of theoretical tools and case studies for understanding price and the creation of value in markets within social and cultural contexts and preconditions It is an important source for scholars in economics sociology anthropology and political science interested in how markets work and how value is established *Effective Fund-Raising Management* Kathleen S. Kelly, 2012-12-06 In a ground breaking departure from existing works almost all of which are how to manuals based on anecdotal evidence this is the first academic textbook on fund raising By integrating practical knowledge with social science theory and research it presents a comprehensive approach to the function from its legal and ethical principles to the managerial process by which gifts are raised Territory previously uncharted in the literature is explored such as the historical and organizational contexts of contemporary practice Explanations of programs techniques and publics introduce a new system for understanding fund raising s major concepts Unlike efforts in established fields most of the material represents original scholarship undertaken to produce a first time text The book s main purpose is to teach students about fund raising a high demand high paying occupation that will continue to expand into the 21st century as the need for trained practitioners exceeds the supply During the last decade fund raising education moved into the formal classroom and away from an apprenticeship tradition of senior practitioners mentoring newcomers Yet until now there has not been a textbook to support this evolving professionalism Faculty have been reluctant to define fund raising as an academic subject in the absence of a theory based teaching resource and courses usually have been assigned to part time instructors hired from the practice This textbook addresses the void It is designed for graduate and upper level undergraduate courses dealing with fund raising as a primary or secondary subject Among its features each chapter points out research gaps and opportunities such as problems and theories for master s theses and doctoral dissertations and ends with a list of suggested readings The text is appropriate for the diverse academic areas in which fund raising nonprofit management and philanthropy are taught including public administration management arts and humanities education social work economics and sociology Because of its public relations orientation it is particularly suited for courses offered in that discipline Additional audiences are practitioners enrolled in professional development programs
