Global Mission The Story Of Alcan Volume I To 1950:

Finding Japan Anne Park Shannon, 2012 Today's headlines often feature stories about new trade agreements with Asian countries but tapping eastern markets has long been a goal of Canadian commerce When the Canadian Pacific Railway reached its terminus in British Columbia which was seen as the launching point for trade in the Far East particularly with China and Japan The history of members of those cultures immigrating to Canada is well documented but there has been little written on Canadians venturing across the Pacific from west to east When adventurers first crossed the Pacific from BC in the 19th century they encountered the closely guarded shores of Japan a society emerging from 200 years of self imposed isolation and transforming from a largely feudal country into a modern world power Curious outsiders had for centuries been unable to penetrate the land of shoguns This collection of stories begins with Ranald Macdonald who tempted fate by intentionally shipwrecking himself off the coast of Japan in 1848 and takes readers through to 1945 As Japan slowly opened up to foreign influences the new arrivals proved to be an intriguing and diverse cast of adventurers missionaries businessmen social activists soldiers and misfits

From Monopoly to Competition George David Smith, 2003-12-18 When Charles Martin Hall patented the process for refining the metal in 1886 it was far from self evident that the new technology would be a business success Problems involving the technology had to be solved Capital and a labour force were needed The most pressing entrepreneurial dilemma was the need to develop markets for what was then a novelty product George David Smith examines how Alcoa met these problems with special attention to innovation from Alcoa's beginnings through its development into one of the most successful monopolies in American history By World War II no other American corporation had developed its industry's markets more dramatically and then dominated them more completely The book then analyzes the undoing of Alcoa's monopoly by war and antitrust and examines how the firm adapted to evolving forms of oligopolistic and global competition

Jamaica in the World Aluminium Industry, 1938-1973 Carlton E. Davis, 1989 **Canadian Companies in Japan** Allan Conway, Vernon Jones, 1998 Canada's economic well being is highly dependent on trade however only five percent of its exports go to Japan the second largest market in the world Moreover while Japan exports automobiles industrial machinery and other high value added items to Canada the majority of Canada's exports to Japan are commodities such as coal and lumber Japan's recent trend toward importing more high value added products has not significantly benefited Canada The seven case studies in this volume document the establishment and operations of Canadian companies in the software communications banking tourism food light metals and chemical industries within the Japanese market They show that success in Japan is clearly possible but will not come easily Japan is a difficult country for opportunists Relationship building is essential Skills and knowledge in dealing with the Japanese market will be acquired only over time

Chasing the Dragon in Shanghai John D. Meehan, 2011-10-20 Canadians share a long history with China Canada is home to a large Chinese diaspora it appointed a trade commissioner to Shanghai over a century ago and it was one of the

first Western nations to recognize the People's Republic of China. This absorbing account of Canadian sojourners in Shanghai from the arrival of Lord Elgin in 1858 to the closing of the consulate general in 1952 gives a human face to that history. Some Canadians came to save souls, nourish bodies and educate minds; others sought financial and political gain. Their experiences, which unfolded against a backdrop of civil war, invasion and revolution in China and were coloured by Canada's evolution from colony to nation, reflected Canada's deepening relationship with China and the troubling asymmetries that underpinned it. Although Canadians like other foreigners had left Shanghai by the early 1950s, their lives and activities foreshadowed more recent Canadian initiatives in that city and in China more generally.

Aluminum Ore Robin S. Gendron, Mats Ingulstad, Espen Storli, 2013-09-28. As the key component in aluminum production, bauxite became one of the most important minerals of the last one hundred years. But its effects on people and economies varied broadly: for some it meant jobs, progress or a political advantage over rival nations; but for many others it meant exploitation, pollution or the destruction of a way of life. *Aluminum Ore* explores the often overlooked history of bauxite in the twentieth century and, in doing so, examines the forces that shaped the time from the mineral's strategic development in the First World War and throughout the Cold War to its role in the globalization of markets as companies from the northern hemisphere vied for the resources of the south. In this wide-ranging collection, scholars from around the world consider multiple international perspectives on this history from Guinea to Nazi Germany to Jamaica, all while examining the central place of one commodity in a time of change.

Amassing Power David Perera Massell, Forest History Society, 2000. At the turn of the century, American industrialist J. B. Duke set his sights on one of North America's greatest and most spectacular rivers, the Saguenay. In *Amassing Power*, David Massell chronicles thirty years of international intrigue as Duke manoeuvred to gain access to develop and sell the tremendous hydroelectric potential of a remote river in Quebec. The damming of the Saguenay brought industrialisation on a grand scale to rural Quebec in the form of newsprint and aluminum manufacture. Tapping into rich and diverse sources in Canada, the United States and Europe, Massell provides an interdisciplinary cross-border study of American capital and Canadian resources. He shows us how ever larger amounts of capital yielded increasingly massive and sophisticated applications of hydroelectric technology. Grand industrial plans in turn encroached upon provincial water rights and farmers' lands, which drew the attention of the state. He examines the protracted power struggle between public and private interests between American capitalists and the nascent bureaucracy of the province of Quebec and describes the origins and evolution of the events that led to state control over hydraulic resources in the province. In doing so, he provides

vivid portraits of Duke and of Quebec politicians of the period and gives a dramatic account of the protracted battle of wits between Duke's chief engineer William States Lee and Quebec's chief of Hydraulic Service Arthur Amos Amassing Power speaks to the integration of North American economies vividly illustrating the process by which American capital drew Canada's resource rich North into the economic orbit of the United States *The Dominion and the Rising Sun* John D. Meehan, 2004 *The Dominion and the Rising Sun* is the first major study of Canada's diplomatic arrival in Japan and by extension East Asia It examines the political economic and cultural relations forged during this seminal period between the foremost power in Asia and the young dominion tentatively establishing itself in world affairs An overview of Canada's initial foray into Pacific affairs it begins with the opening in 1929 of the Canadian legation in Tokyo Canada's third such office overseas and concludes with the outbreak of hostilities in 1941 Primarily a diplomatic history the book also explores the impact of traders interest groups and missionaries on Canadian attitudes toward Japan during the interwar years More fundamentally it examines Canada's diplomatic coming of age closely revealing its important Pacific dimension a fact overlooked by historians until now as well as the disjunct between Canada's commitment to peace and its trade with an aggressor Meehan suggests that Canada's initially benign view of Japan its reluctance to adopt positions in advance of its Anglo American allies and its lucrative Pacific trade led to a credibility gap in its policies towards East Asia *The Dominion and the Rising Sun* charts Canada's relationship with Japan and is essential reading for those interested in Canadian history international relations and Asia Pacific studies **Dominion Law Reports** , 2005 *The European Enterprise* Harm G. Schröter, 2007-11-16 Though in its infancy the European enterprise has the power to change both the perception and the actual face of Europe This book evaluates the future potential of this new type of enterprise The contributors look for European convergence at all levels of the economy firm branch state and EU They stress various points of view using diverse methods and propose different measures **Geographies of Peace and Armed Conflict** Audrey Kobayashi, 2013-09-13 This collection addresses the impact of armed conflict and explores pathways to peace across the world Topics range from geopolitics to the effects of armed conflict on the environment resources health children and transnational migration Others explore the social processes involved in post conflict situations and others still the lessons for achieving effective peace The geographical concepts addressed include the notion of conflict space landscapes of terror the relationship between violence and justice the conditions for peace and the dynamics of post conflict Methods include landscape analysis interviews with a range of citizens mapping and geographic information science and policy analysis Several papers address the situation of children in conflict zones the impact of conflict on patterns of migration the role of gender in achieving peace the concept of territory as a basis for conflict and for negotiation of peace as well as the economic impact of conflict The studies cover several world regions including Africa the Middle East South and Southeast Asia and eastern Europe This book was originally published as a special issue of *Annals of the Association of American Geographers* *Fish versus Power* Matthew D.

Evenenden,2004-05-03 Fish versus Power is an environmental history of the Fraser River British Columbia and the attempts to dam it for power and to defend it for salmon Amid contemporary debates over large dam development and declines in fisheries this book offers a case study of a river basin where development decisions did not ultimately dam the river but rather conserved its salmon Although the case is local its implications are global as Evenenden explores the transnational forces that shaped the river the changing knowledge and practices of science and the role of environmental change in shaping environmental debate The Fraser is the world s most productive salmon river it is also a large river with enormous waterpower potential Very few rivers in the developed world have remained undammed On the Fraser however fish not dams triumphed and this book seeks to explain why

Historical Atlas of Canada: Addressing the twentieth century, 1891-1961 Geoffrey J. Matthews,1987-01-01 Uses maps to illustrate the development of Canada from the last ice sheet to the end of the eighteenth century Science and the Pacific War Roy M. MacLeod,1999-12-31 In 1995 the fiftieth anniversary of the end of the Second World War occasioned many reflections on the place of science and technology in the conflict That the war ended with Allied victory in the Pacific theatre inevitably focussed attention upon the Pacific region and particularly upon the Manhattan project and its outcome It was in the Pacific that Western physics and engineering gave birth to the Atomic Age However the Pacific war had also proved a testing time and a testing space for other disciplines and institutions Extreme environments and operational distances and the fundamental demands of logistics required the Allies and the Japanese to innovate many scientific and technological practices Just as medicine and botany were called upon to fight tropical diseases and insect pests so engineers anthropologists and geographers were called upon to understand local conditions and climates and to work with local peoples whose traditional lives were changed forever by the experience At the same time the war played midwife to a host of new developments not least in scientific intelligence and in chemical and biological weapons which were to acquire far greater importance after 1945 A Dam for Africa Stephan F.

Miescher,2022-07-12 Since its construction in the early 1960s the hydroelectric Akosombo Dam across the Volta River has exemplified the possibilities and challenges of development in Ghana Drawing upon a wealth of sources A Dam for Africa investigates contrasting stories about how this dam has transformed a West African nation while providing a model for other African countries The massive Akosombo Dam is the keystone of the Volta River Project that includes a large manmade lake 250 miles long the VALCO aluminum smelter new cities and towns a deep sea harbor and an electrical grid On the local level Akosombo has meant access to electricity for people in urban and industrial areas across southern Ghana For others Akosombo inflicted tremendous social and environmental costs The dam altered the ecology of the Lower Volta displaced 80 000 people in the Volta Basin and affected the livelihoods of hundreds of thousands of Ghanaians In A Dam for Africa Stephan Miescher explores four intersecting narratives Ghanaian debates and aspirations about modernization in the context of decolonization and Cold War international efforts of the US aluminum industry to benefit from Akosombo through cheap
