Global Networks Linked Cities:

Global Networks, Linked Cities Saskia Sassen, 2002 First Published in 2002 Routledge is an imprint of Taylor Francis Global networks, linked cities Saskia Sassen, 2002 Global Networks, Linked Cities Saskia Sassen, 2016-04-15 In her pioneering book The Global City Saskia Sassen argued that certain cities in the postindustrial world have become central nodes in the new service economy strategic sites for the acceleration of capital and information flows as well as spaces of increasing socio economic polarization. One effect has been that such cities have gained in importance and power relative to nation states In this new collection of essays Sassen and a distinguished group of contributors expand on the author's earlier work in a number of important ways focusing on two key issues First they look at how information flows have bound global cities together in networks creating a global city web whose constituent cities become global through the networks they participate in Second they investigate emerging global cities in the developing world Sao Paulo Shanghai Hong Kong Mexico City Beirut the Dubai Iran corridor and Buenos Aires They show how these globalizing zones are not only replicating many features of the top tier of global cities but are also generating new socio economic patterns as well These new patterns of development promise to lead to significant changes in the structure of the global economy as more and more cities worldwide are integrated into globalization s circuitry Includes contributions from Linda Garcia Patrice Riemens Geert Lovink Peter Taylor David Smith Michael Timberlake Stephen Graham Sueli Schiffer Ramos Christoff Parnreiter Felicity Gu David Meyer Pablo Ciccolella Iliana Mignagui Eric Huybrechts Ali Parsa Also includes The Making of a Transnational Capitalist Class William K. Carroll, 2013-04-04 Throughout the world there six maps has been a growing wave of interest in global corporate power and the rise of a transnational capitalist class triggered by economic and political transformations that have blurred national borders and disembedded corporate business from national domiciles Using social network analysis William Carroll maps the changing field of power generated by elite relations among the world's largest corporations and related political organizations Carroll provides an in depth analysis that spans the three decades of the late 20th and early 21st century when capitalist globalization attained unprecedented momentum propelled both by the transnationalization of accumulation and by the political paradigm of transnational neoliberalism This has been an era in which national governments have deregulated capital international institutions such as the World Trade Organization and the World Economic Forum have gained prominence and production and finance have become more fully transnational increasing the structural power of capital over communities and workers Within this context of transformation the book charts the making of a transnational capitalist class reaching beyond national forms of capitalist class organization into a global field but facing spirited opposition from below in an ongoing struggle that is also a struggle over alternative global futures Society Online Philip N.
