Global Peace And Common Security:

Policies for Common Security Stockholm International Peace Research Institute (SIPRI), 2019-07-08 The basic idea of common security is not complex It is that no country can obtain security in the long run simply by taking unilateral decisions about its own military forces This is because security depends also on the actions and reactions of potential adversaries Security has to be found in common with those adversaries These ideas were considered in a SIPRI conference held in 1983 The conference had two main objectives The first was to undertake a critical examination of the concept The second was to consider the implications of the idea for policy in general and for disarmament and arms control policy in particular

Originally published in 1985 this book contains revised versions of some of the papers presented at the conference The United Nations and the Maintenance of International Peace and Security , 1987-01-01 **Global Peace And Security**

Peace and Security in the Asia-Pacific Sorpong Peou, 2010-04-15 Demonstrating that none of the various perspectives under review has emerged as the clear winner in the struggle for theoretical hegemony in security studies this book shows that eclectic perspectives like democratic realist institutionalism can better explain peace and security in the Asian Pacific The Asian Pacific has emerged as one of the most important regions in the world causing scholars to pay increased attention to the various challenges old and new to peace and security there *Peace and Security in the Asia Pacific Theory and Practice* is a comprehensive critical review of the established theoretical perspectives relevant to contemporary peace and security studies in the light of recent experiences Illuminating ongoing debates in the field the book covers some 20 theoretical perspectives on peace and security in the Asian Pacific including realist liberal socialist peace and human security constructivist feminist and nontraditional security studies The first section of the book discusses perspectives in realist security studies the second part covers perspectives critical of realism The author's goal is to assess whether any of the perspectives found in nonrealist security studies are capable of undermining realism His conclusion is that each theoretical perspective has its strengths and weaknesses leaving eclecticism as the best way to understand the region's dynamics

The European Union's Contribution to International Peace and Security , 2023-05-25 The Treaty of Lisbon has significantly enhanced the EU's institutional framework and the instruments at its disposal in foreign policy and external relations notably through the creation of the function of the High Representative supported by the European External Action Service Contributing to the maintenance of international peace and security is one of the core objectives of the EU's external action This volume with contributions from legal experts on EU foreign policy and external relations illustrates the manifold legal issues arising in EU external action and in its efforts to achieve this essential objective

Europe's Common Security and Defence Policy Michael E. Smith, 2017-06-07 The EU's emergence as an international security provider under the first Common Security and Defence Policy (CSDP) operations in the Balkans in 2003 is a critical development in European integration. In this book, which relies on extensive interviews with CSDP officials, Michael E. Smith investigates how the challenge of launching new CSDP operations causes the EU to adapt itself in order to improve its performance in this realm through the mechanism of experiential institutional learning. However, although this learning has helped to expand the overall range and complexity of the CSDP, the effectiveness of this policy tool still varies widely depending on the nature of individual operations. The analysis also calls in to question whether the CSDP and the EU's broader structures under the 2009 Treaty of Lisbon are fit for purpose in light of the EU's growing strategic ambitions and the various security challenges facing Europe in recent years.

Envisioning Our Environmental Future B.H.

Desai, 2022-09-09 With the Stockholm 50 Conference held on 2-3 June 2022, the global movement to protect the environment has reached a 50-year milestone. The first UN Conference on the Human Environment, also held in Stockholm from 5-16 June 1972, proved to be the watershed in addressing this problem, and as the world assembles once more in the Swedish capital, it is time to think aloud and look ahead. In his address in 1972, the then Swedish Prime Minister Olof Palme said: 'The decisive question is in which direction we will develop: there is no individual future, neither for people nor for nations. The only other head of government to attend in 1972, Indian Prime Minister Indira Gandhi, highlighted the development as one of the primary means of improving the environment: of living, of providing food, water, sanitation and shelter, of making the deserts green and mountains habitable, and drew attention to the wisdom of the Atharva Veda: 'What of thee I dig out, let that quickly grow over. Let me not hit thy vitals or thy heart.' As we look back over 50 years, we need to assess what has gone wrong in the trajectory travelled so far and look ahead to the future of our environment at this juncture and beyond. As a scholarly journal for global decision makers, *Environmental Policy and Law* has sought to envision what lies ahead in the 21st century by inviting outstanding scholarly works from around the world. The 22 articles which resulted from this invitation are presented in this book, *Envisioning Our Environmental Future*, which is organised in three parts: Testing Times, Global Ideas, and Sectoral Ideas. The book is a sequel to *Our Earth Matters* (IOS Press), which was published on 5 June 2021. Bharat H. Desai is Professor of International Law and Jawaharlal Nehru Chair in International Environmental Law at the Centre for International Legal Studies, School of International Studies, Jawaharlal Nehru University, New Delhi. He is Editor in Chief of the global journals *Environmental Policy and Law* (Amsterdam, IOS Press) and *Yearbook of International Environmental Law* (Oxford, Oxford University Press). Prof. Desai's ideas and proposals are reflected in his published books and in journals of international repute.

Rights in Context Professor Reza Banakar, 2013-02-28 This volume offers snapshots of how rights are debated and employed in public discourse to reshape legal and political relations at the beginning of the twenty-first century. It explores how rights are used to challenge the state of affairs by individuals and groups who seek justice and the strategies devised to

defy the existing rights by those who wish to recast the social and political order This volume discusses rights firstly in relation to actual events and issues faced by policy makers courts international agencies or ordinary people These range from the demands of minority groups living in the West to freely practice their culture and or religion to the threat of terrorism the regulation of asylum rights the investor s rights to disclosure and the rights of artists to freedom of expression Secondly rights discourse is examined in relation to attempts to redefine the form and content of rights for example by banning the right to wear religious symbols in public institutions or detaining terrorism suspects without trial Thirdly rights discourse is explored in connection with the attempts to develop new notions of rights such as human security which can more effectively respond to the challenges of late modern societies Finally the statuses of rights in sociological theory and socio legal research are briefly discussed and analysed

improve the standards of living in the developing countries and enhance their security A strategy is also needed to protect the environment from the effects of further industrialization and greater use of energy What is needed is a concept of a sustainable equitable and liveable world for all its inhabitants All these problems were analysed by scientists and scholars who met at a Pugwash Conference The arguments used by them and the proposed solutions are presented in this book under six themes World Peace Nuclear Disarmament Issues Arms Control Security in the Asia Pacific Region Development Strategies and World Economic Order Energy and the Environment Reframing the EU's Common Security and Defence Policy Bogdan Rus,2024-09-02 This book reflects the European Union s need for hard power in order to provide the military security its own citizens demand but understand too little In this sense the paper stems from the need to clarify the next possible evolution of the current Common Security and Defence Policy of the EU while also introducing to the public the controversial possibility of the EU joining forces and creating its own army Beyond the theoretical background the paper proposes a practical exploratory approach which addresses data and forecasts for testing such a major administrative undertaking while including both a qualitative and quantitative approach Suitable for a wide range of audiences from the young generation to scholars research centres development hubs political decision makers or legislators the paper aims to bring more clarity and concrete solutions to the current stages of military cooperation and integration of the EU s Member States while opening at the same time new and relevant paths towards further and deeper research reflections in this regard
