Martin,1995 This is a study of the cinematic traditions and film practices in the black Diaspora With contributions by film scholars film critics and film makers from Europe North America and the Third World this diverse collection provides a critical reading of film making in the black Diaspora that challenges the assumptions of colonialist and ethnocentrist discourses about Third World Hollywood and European cinemas *Cinemas of the Black Diaspora* examines the impact on film making of Western culture capitalist production and distribution methods and colonialism and the continuing neo colonial status of the people and countries in which film making is practiced Organised in three parts the study first explores cinema in the black Diaspora along cultural and political lines analysing the works of a radical and aesthetically alternative cinema The book proceeds to group black cinemas by geographical sites including Africa the Caribbean and South America Europe and North America to provide global context for comparative and case study analyses Finally three important manifestoes document the political and economic concerns and counter hegemonic institutional organising efforts of black and Third World film makers from the 1970s to the early 1990s *Cinemas of the Black Diaspora* should serve as a valuable basic reference and research tool for the study of world cinema While celebrating the diversity innovativeness and fecundity of film making in different regions of the world this important collection also explicates the historical importance of film making as a cultural form and political practice *Jackie Robinson* Joseph Dorinson,Joram Warmund,2025-06-30 There are defining moments in the life of a nation when a single individual can shape events for generations to come For America the spring of 1947 was such a moment and Jackie Robinson was the man who made the difference With these words President Clinton contributed to Long Island University's three day celebration of that momentous event in American history when Robinson became the first African American to play major league baseball First

published in 1998 Jackie Robinson Race Sports and the American Dream includes presentations from that celebration especially chosen for their fresh perspectives and illuminating insights A heady mix of journalism scholarship and memory offers a presentation that far transcends the retelling of just another sports story Readers get a true sense of the social conditions prior to Robinson s arrival in the major leagues and the ripple effect his breakthrough had on the nation Anecdotes enliven the story and offer more than the usual larger than life portrait of Robinson A m lange of contributors from the sports world academia and journalism some of Robinson s contemporaries Dodger fans and historians of the era all sharing a passion for baseball reflect on issues of sports race and the dramatic transformation of the American social and political scene in the last fifty years This book is a must read for anyone interested in American Sports history and sports in general

Making Waves William G. Martin,2015-12-03 Making Waves unearths the successive worldwide waves of revolts rebellions and revolutions that have shaken and remade the world from the eighteenth century to the present It challenges us to rethink not only our limited conceptions of social movements but the very character and possibilities of social movements The authors show how successive outbursts of global social protest have undermined world capitalist orders and through both their successes and their failures provided the basis for long periods of stable capitalist rule across all the zones of the world economy The surprises start in the Age of Revolution when the antisystemic wave of slave revolts that led to the Haitian Revolution is related to the systemic effects of their combination with the U S and French Revolutions The analysis comes up to the present when a wave of post 1989 movements points to quite divergent futures based as in the past on the search for alternatives to communities organized by capital accumulation nation states and the accelerating commodification and fragmentation of human needs identities and desires

The Many Faces of Clio Q. Edward Wang,Franz L. Fillafer,Georg G. Iggers,2007 Born in Germany Georg Iggers escaped from Nazism to the United States in his adolescence where he became one of the most distinguished scholars of European intellectual history and the history of historiography In his lectures delivered all over the world and in his numerous books translated into many languages Georg Iggers has reshaped historiography and indefatigably promoted cross cultural dialogue This volume reflects the profound impact of his oeuvre Among the contributors are leading intellectual historians but also younger scholars who explore the various cultural contexts of modern historiography focusing on changes of European and American scholarship as well as non Western historical writing in relation to developments in the West Addressing these changes from a transnational perspective this well rounded volume offers an excellent introduction to the field which will be of interest to both established historians and graduate students

Empires and Colonies Jonathan Hart,2014-02-06 Empires and Colonies provides a thoroughgoing and lively exploration of the expansion of the seaborne empires of western Europe from the fifteenth century and how that process of expansion affected the world including its successor the United States Whilst providing special attention to Europe the book is careful to highlight the ambivalence and contradiction of that expansion The book also

illuminates connections between empires and colonies as a theme in history concentrating on culture while also discussing the rich social economic and political dimensions of the story Furthermore Empires and Colonies recognizes that whilst a study of the expansion of Europe is an important part of world history it is not a history of the world per se The focus on culture is used to assert that areas and peoples that lack great economic power at any given time also deserve attention These alternative voices of slaves indigenous peoples and critics of empire and colonization are an important and compelling element of the book Empires and Colonies will be essential reading not only for students of imperial history but also for anyone interested in the makings of our modern world

Diary of a Heartland Radical Harry R. Targ, 2011

The Final Empire Wm. H. Kötke, 2007-11 In spite of its tough message there is much compassion and humanity in The Final Empire Right away as you begin to read this work you sense increasingly the grand perspective in Kötke's words He is not speaking of anarchy He is offering vital common sense It's just that his meaning is so unavoidably political And so much against what we have been taught all our lives The materialistic values of civilization teach us that the accumulation of wealth is progress The material wealth of the civilization is derived from the death of the earth the soils the forests the fish stocks the free resources of flora and fauna The ultimate end of this is for all human species to live in giant parasitical cities of cement and metal while surrounded by deserts of exhausted soils The simple polar opposites are the richness and wealth of the natural life of earth versus the material wealth of people living out their lives in artificial environments This amounts to a direct challenge to humankind A demand for radical change A re-envisioning of our part in the community of life and the precepts of individuality And Mr Kötke provides a strong argument for this case He traces the environmental scars of civilization through the ages Empire after empire desertification of the top soil winds its way around the globe in an erosive helix from China to India to Mesopotamia to Italy to North America As radical as it may seem at first glance The Final Empire is a necessary and sensible primer for the recovery of the planet It blends a critical statistical analysis of our deteriorating environment with a positivism of hope for a post empire age and a new whole human relation to the living community of Earth Dan Armstrong Author of the Novels *Prairie Fire* and *Taming the Dragon*

Agricultural and Pastoral Societies in Ancient and Classical History Michael Adas, 2001 Introduces readers to the cross cultural study of ancient and classical civilizations The book is divided into two sections the first examining the ongoing interaction between ancient agrarian and nomadic societies and the second focusing on regional patterns in the dissemination of ideas

Globalization and Security G. Honor Fagan, Ronaldo Munck, 2009-10-27 A unique set provides an up to date overview of the impact of globalization on international security by examining how the interrelationships of economics politics and culture determine levels of stability within regions around the world Globalization and Security An Encyclopedia addresses the need for an authoritative but accessible analysis of the impact of globalization on security and its multifaceted aspects Broad in scope this two volume set covers the economic and political aspects of globalization as well as its social and cultural impacts More importantly it is the first work to focus

explicitly on security including human security broadly conceived and the role that globalization plays in the world's new and ever evolving security environment. While more books on globalization are becoming available, none focus on the impact of globalism on security related issues as this set does. Drawing on the expertise of specialists from many disciplines and nations, *Globalization and Security* directly addresses the needs of one of the fastest growing areas of study: the intersection of globalization and security worldwide.

History as Mystery Michael Parenti, 2016-08-22 In a lively challenge to mainstream history, Michael Parenti does battle with a number of mass marketed historical myths. He shows how history's victors distort and suppress the documentary record in order to perpetuate their power and privilege. And he demonstrates how historians are influenced by the professional and class environment in which they work. Pursuing themes ranging from antiquity to modern times, from the Inquisition and Joan of Arc to the anti labor bias of present day history books, *History as Mystery* demonstrates how past and present can inform each other and how history can be a truly exciting and engaging subject. Michael Parenti always provocative and eloquent gives us a lively as well as valuable critique of orthodoxy posing as history. Howard Zinn, author of *A People's History of the United States* Deserves to become an instant classic. Bertell Ollman, author of *Dialectical Investigations* Those who keep secret the past and lie about it condemn us to repeat it. Michael Parenti unveils the history of falsified history from the early Christian church to the present, a fascinating darkly revelatory tale. Daniel Ellsberg, author of *The Pentagon Papers* Solid if surely controversial stuff. Kirkus

Binding Violence Moira Fradinger, 2010-06-03 *Binding Violence* exposes the relation between literary imagination, autonomous politics and violence through the close analysis of literary texts in particular Sophocles' *Antigone*, D. A. F. de Sade's *120 Days of Sodom* and Vargas Llosa's *The Feast of the Goat* that speak to a blind spot in democratic theory, namely how we decide democratically on the borders of our political communities. These works bear the imprint of the anxieties of democracy concerning its other, violence, especially when the question of a redefinition of membership is at stake. The book shares the philosophical interest in rethinking politics that has recently surfaced at the crossroads of literary criticism, philosophy, critical theory and psychoanalysis. Fradinger takes seriously the responsibility to think through and give names to the political uses of violence and to provoke useful reflection on the problem of violence as it relates to politics and on literature as it relates to its times.

Engaging Currere Toward Decolonization Shauna Knox, 2021-12-12 This timely volume uniquely illustrates how currere can be applied to the process of decolonizing subjectivity. Centered around the experiences of one black woman from the third world, the text details the theoretical underpinnings of Currere towards Decolonizing CTD and walks the reader through the autobiographical analysis involved in dismantling cognitive colonization. Conceived as a four part autobiographical process of remembering, identifying, imagining and decolonizing, the method of CTD is demonstrated as a means of recognizing and reflecting on how the colonial project has been internalized and of gradually dismantling the psychological, affective and material impact of colonization. Using both theoretical and experiential standpoints and intersecting with notions of anti

blackness linguicide and Africana womanhood the volume moves curriculum theory urgently towards anti colonial mechanisms that disrupt the colonizing process This text will benefit researchers academics and educators in higher education with an interest in curriculum studies post colonialism and Black studies more broadly Those specifically interested in interpersonal psychoanalysis as well as gender and third world studies will also benefit from this book

Empires and Autonomy Stephen Streeter, John Weaver, William D. Coleman, 2010-01-01 Globalization is one of the most significant developments of our time But what distinguishes the present era from golden periods of empire building in past Which elements of contemporary globalization and forms of autonomy are particularly novel and which are merely continuations of long standing historical trends To address these questions Empires and Autonomy brings together a distinguished group of scholars who explore particular historical moments that involved either the establishment or protection of autonomy These global encounters inevitably involved friction and the contributors examine the dialectic between globalization and autonomy at historical junctures that range in time from the Chinese occupation of Tibet in 1720 to the meeting between Ronald Reagan and Mikhail Gorbachev in 1986 that led to the end of the Cold War By examining these uniquely telling moments in the history of globalization and autonomy this innovative collection provides novel insights into changes that are overtaking our contemporary world

Missions and Money Jon Bonk, 2006 This revised edition of Missions and Money offers new reflections in the light of a changed situation in Christian missionary circles Bonk offers new reflections in the lights of a changed situation now marked by increases in the number of short term missionaries and increases in the numbers of Asians Africans and Latin Americans leaving their homelands to serve as missionaries to other people The conversation on the ambiguity of wealth and Christian missionary outreach is deepened with essays by Christopher J H Wright on the righteous rich in the Hebrew Bible and by Justo Gonzalez on faith and wealth in the Christian Bible and the early church Book jacket

The Sword & The Dollar Michael J. Parenti, 2011-04-01 To many the foreign policy directives of the United States seem bewildering and sometimes inharmonious with its domestic political values Why does the U S seem to support foreign dictators Why has it invested so many of its resources in stockpiling nuclear arms Why doesn't the U S act as a force for peace throughout the world In this probing provocative analysis Michael Parenti reveals the hidden agenda of American foreign policy decisions No matter which party is in power the U S acts to protect the interests of large American based corporations in order to maintain valuable overseas markets and cheap foreign labor In lucid detail Michael Parenti examines just how these very private interests determine America's public policy goals from the impoverishment of developing nations to the building of an intimidating nuclear arsenal What he discovers will surely be controversial and suggests that the greatest threats to democracy both here and abroad may emanate from within the United States itself

Capitalism and the American Political Ideal Edward S. Greenberg, 2016-07-08 This practical handbook has been revised to provide in depth coverage of the Office of Thrift and Supervision rules as well as those of the OCC It includes
