Landfill Research Trends Albert A. Velinni, 2007 This book presents research studies on landfills which are sites for the disposal of waste materials by burial Historically landfills have been the most common methods of organised waste

disposal and remain so in many places around the world Landfills may include internal waste disposal sites where a producer of waste carries out their own waste disposal at the place of production as well as sites used by many producers Many landfills are also used for other waste management purposes such as the temporary storage consolidation and transfer or processing of waste material sorting treatment or recycling A landfill also may refer to ground that has been filled in with soil and rocks instead of waste materials so that it can be used for a specific purpose such as for building houses Unless they are stabilised these areas may experience severe shaking or liquefaction of the ground in a large earthquake This book presents research in a field which is demanding and beginning to receive society s attention **Natural Climate Variability on**

Decade-to-Century Time Scales National Research Council, Division on Earth and Life Studies, Commission on Geosciences, Environment and Resources, Climate Research Committee, 1996-08-30 This volume reflects the current state of scientific knowledge about natural climate variability on decade to century time scales It covers a wide range of relevant subjects including the characteristics of the atmosphere and ocean environments as well as the methods used to describe and analyze them such as proxy data and numerical models They clearly demonstrate the range persistence and magnitude of climate variability as represented by many different indicators Not only do natural climate variations have important socioeconomic effects but they must be better understood before possible anthropogenic effects from greenhouse gas emissions for instance can be evaluated A topical essay introduces each of the disciplines represented providing the nonscientist with a perspective on the field and linking the papers to the larger issues in climate research In its conclusions section the book evaluates progress in the different areas and makes recommendations for the direction and conduct of future climate research This book while consisting of technical papers is also accessible to the interested layperson The DOE FY 99 Budget Authorization Request ; H.R. 1806, to Provide for the Consolidation of the DOE Offices of Fossil Energy, Renewable Energy, and Energy Efficiency ; S. 965, to Amend Title II of the Hydrogen Future Act of 1996 United States. Assessment of the Performance of Engineered Waste Containment Barriers National Research Council, Division on Earth and Life Studies, Board on Earth Sciences and Resources, Committee to Assess the Performance of Engineered Barriers, 2007-08-22 President Carter s 1980 declaration of a state of emergency at Love Canal New York recognized that

residents health had been affected by nearby chemical waste sites The Resource Conservation and Recovery Act enacted in 1976 ushered in a new era of waste management disposal designed to protect the public from harm It required that modern waste containment systems use engineered barriers designed to isolate hazardous and toxic wastes and prevent them from seeping into the environment These containment systems are now employed at thousands of waste sites around the United States and their effectiveness must be continually monitored Assessment of the Performance of Engineered Waste Containment Barriers assesses the performance of waste containment barriers to date Existing data suggest that waste containment systems with liners and covers when constructed and maintained in accordance with current regulations are performing well thus far However they have not been in existence long enough to assess long term postclosure performance which may extend for hundreds of years The book makes recommendations on how to improve future assessments and increase confidence in predictions of barrier system performance which will be of interest to policy makers environmental interest groups industrial waste producers and industrial waste management industry
