major impacts of globalization on rural development such as impact on environment poverty and women In responding to the research questions that how globalization affected environmental degradation what impact it has done on poverty reduction and women in Bangladesh the author used a combination of both quantitative and qualitative methods From the content analysis it was observed that globalization has seriously affected environment such as land degradation deforestation soil erosion soil fertility loss water logging salinity and toxification of soils damage and destruction of coral reefs mangroves fisheries loss of bio diversity and ecosystem pollution of air and water bodies etc that caused huge environmental disasters in Bangladesh The research findings relating to impact of globalization on poverty reduction unearthed the fact that due to huge remittance from the expatriate foreign labours exponential increases of agricultural growth especially in cereal crops and increase in labour cost have contributed to reduction of rural poverty in Bangladesh The increase of agricultural growth was the end result of massive privatization of agricultural sector in Bangladesh that in fact helped the rich farmers to adopt HYV and modern agricultural practices agrochemicals pesticides fertilizers and privatization also helped them availing of low cost tube wells and agricultural inputs increase of irrigation facilities But the poor farmers were hardly affected by the privatization strategy But the negative scenario in case of poverty is that globalization has increased income inequality in Bangladesh Lastly from both content analysis and case studies it was found that globalization has created employment opportunities of women in the garments industries RMG in the export processing zones of Bangladesh Mostly these women are the poverty stricken women who migrated to city areas from rural areas for employment but the foreign investors are exploited these women by providing a low salary and employed them excessive hours for ensuring their optimum production
