## **Globalisation Transition And Development In China The Case Of The Coal Industry:**

*Globalisation, Transition and Development in China* Rui Huaichuan, 2004-06-02 Based on extensive original research *Globalisation Transition and Development in China* explains China's development strategy and its underlying forces and the success of this strategy. It examines China's gradualist approach which emphasizes development first and regards transition and globalization as secondary, enacting liberalization of domestic markets and integration into the world economy in a paced way avoiding dramatic changes which might impede or even reverse development and argues that this approach is broadly correct. It considers China's failures including the failure to build large globally competitive corporations despite the intention to do this and shows how China's economic strategy has been implemented in detail with a case study of the large and important coal industry. *Globalization, Competition and Growth in China* Jian Chen, Shujie Yao, 2006-04-18 Presenting original work and new thinking this book explores the current state of globalization, competition and growth in China.

*China in the Wake of Asia's Financial Crisis* Wang Mengkui, 2008-11-21 This book examines China's response to the Asian financial crisis of 1997 both in its immediate aftermath and in the years since. The crisis caused turmoil throughout Asia's economies and precipitated wholesale reform of economic and financial policies and institutions across the region. As one of Asia's largest economies, China responded to the crisis more successfully than many others, avoiding devaluation of its currency whilst undertaking financial reform, restructuring state-owned enterprises, rural development and social security systems. This book considers all of these issues, showing how the lessons drawn from the crisis have helped shape China's policies of liberalisation and market orientated reform, including its attitude towards globalisation and the outside world in general. Based on research conducted by the China Development Research Foundation, one of China's leading think tanks, this book includes contributions from senior policy makers in the Chinese government and some experts participating directly in the government's policy making process to assess the effects generated by the country's related policies, making it an indispensable account of China's own thinking on its response to the financial crisis. *Chinese Citizenship* Vanessa L. Fong, Rachel Murphy, 2006-05-30 Bringing a new dimension to the study of citizenship, *Chinese Citizenship* examines how individuals at the margins of Chinese society deal with state efforts to transform them into model citizens in the late 1990s and early 2000s. Based on extensive original research, the authors argue that social and cultural citizenship has a greater impact on people's lives than legal, civil and political citizenship. The seven case studies present intimate portraits of the conflicted identities of peasants, criminals, ethnic minorities, the urban poor, rural migrant children in the cities, mainland migrants in Hong Kong and Chinese youth studying abroad as they negotiate the perilous dilemmas presented by globalization and neoliberalism. Drawing on a diverse array of theories and methods from anthropology, sociology, education, political science, cultural studies and development studies, the book presents fresh perspectives and highlights the often devastating consequences that citizenship distinctions can have on Chinese lives. *China's Development Challenges*

Richard Schiere,2009-12-21 This book argues that a major potential source of social tension in transition and developing countries is not poverty as such but vulnerability that is the risk of becoming poor It demonstrates how in China many of the recent reforms to the public sector such as decentralisation from central to local government especially fiscal decentralisation the reduction in public services provided by the state the increasing practice of local government of charging fees for basic services which were previously free de collectivisation of the rural commune system and market sector experimentation in Economic Processing Zones have made many households extremely vulnerable to poverty Having to find funds to pay for health and education leaves the households exposed should macro economic fluctuations related to factors such as trade resource imports and financial volatility have an adverse impact on the Chinese economy overall The book argues that to become less vulnerable to macroeconomic shocks China would need to shift from an export oriented development strategy to a domestic consumer demand driven development strategy and this would need to be supported by public sector reforms strengthening of public service provisions in the health and the education sectors as well as expanding social security programs The book discusses these problems relates them to the economic literature and outlines the likely consequences

**Managers and Mandarins in Contemporary China** Jie Tang,2013-03-07 This study explores the question as to whether the way in which Chinese management handles conflict is fundamentally different from elsewhere or much the same It does so by examining in detail an international joint venture construction project where managers rooted in contrasting business systems were brought together and by showing how the project progressed over time how various conflict situations arose and how they were handled In addition the book provides an in depth account of the inner workings of the Chinese business world touching on issues such as differing international standards and management procedures the peculiarities of Chinese red tape paternalism and nepotism the limits on contract in contemporary China the involvement of local officials Of interest to scholars and managers alike this study benefits from the unparalleled access the author secured to all the parties involved Working alongside managers as a participant observer Jie Tang uses the fine detail of ethnography to convey a vivid impression of the lives of managers in China today and the forces with which they have to contend

**Economic Convergence in Greater China** Chun Kwok Lei,Shujie Yao,2008-12-08 Although China s economy has grown rapidly in recent decades there are still very large differences between the economies of mainland China and those of Hong Kong Macau and Taiwan This book considers how far economic convergence between these four territories has occurred and the prospects for increased convergence in the future

**Chinese Economists on Economic Reform - Collected Works of Lou Jiwei** Lou Jiwei,2013-12-04 This book is part of a series which makes available to English speaking audiences the work of the individual Chinese economists who were the architects of China s economic reform The series provides an inside view of China s economic reform revealing the thinking of the reformers themselves unlike many other books on China s economic reform which are written by outside observers Lou Jiwei 1950 has been a leading researcher on economic

restructuring and macroeconomic policy in a range of Chinese policy making organisations He has made important contributions to policy in the fields of tax accounting finance and banking In the 1990s a vice minister of finance and from 2007 deputy secretary general of the State Council he is also at present head of China's sovereign wealth fund The book is published in association with China Development Research Foundation one of the leading economic and social think tanks in China where many of the theoretical foundations and policy details of economic reform were formulated *Chinese Economists on Economic Reform - Collected Works of Guo Shuqing* Guo Shuqing, 2013-03-01 China Development Research Foundation is one the leading economic think tanks in China providing a base where many leading Chinese economists have developed the details of Chinese economic reform This book is the second of a series which makes available to an English speaking audience the work of the individual Chinese economists who were the architects of reform The series provides an inside view of China's economic reform revealing the thinking of the reformers themselves unlike many other books on China's economic reform which are written by outside observers Guo Shuqing has made major contributions to the thinking underlying China's economic reforms and to the practical implementation of several of those reforms **China's Exchange Rate Regime** China Development Research Foundation, 2014-12-05 The imbalance between China's currency the RMB and those of other countries is widely regarded as a major problem for the world economy There was a reform of China's exchange rate mechanism in 2005 following which the RMB appreciated 17% against the US dollar but many people argue that further reform is still needed This book reports on a major research project undertaken following the 2005 reform to assess the impact on China's economy It considers the impact in a number of areas of the economy including export oriented companies the banking industry international trade international capital flows and China's macroeconomic policy It concludes that the policies pursued so far have been correct and that further reform both to the exchange rate and to the system overall would be desirable but that any reform should be gradual and incremental preserving economic stability and integrating changes with reform in other parts of the economy **Constructing a Social Welfare System for All in China** China Development Research Foundation, 2013-03 This book sets out the general objectives principles and framework of a proposed new social welfare system for China It provides a comprehensive overview of China's current welfare services including retirement pensions education health employment housing and social security payments and goes on to cost the proposed new social welfare system and assess the government's capacity for implementing it *Chinese Economists on Economic Reform - Collected Works of Wang Mengkui* Wang Mengkui, 2013-12-04 This book is part of a series which makes available to English speaking audiences the work of the individual Chinese economists who were the architects of China's economic reform The series provides an inside view of China's economic reform revealing the thinking of the reformers themselves unlike many other books on China's economic reform which are written by outside observers Wang Mengkui 1938 has been Director of the Research Office under the State Council and was President of the State Council's Development

Research Centre from 1998 to 2007 A member of the Party since 1956 he has been responsible for drafting many key Chinese Communist Party documents including Report on the Work of the Government presented to the National People's Congresses The book is published in association with China Development Research Foundation one of the leading economic and social think tanks in China where many of the theoretical foundations and policy details of economic reform were formulated

**Demographic Developments in China** China Development Research Foundation, 2014-06-05 This book assesses current developments in China's demography and discusses the changes which should be implemented to bring policy into line with the current demographic situation It argues that population planning which was introduced in the early years of the People's Republic alongside economic planning including the one child policy is no longer appropriate It considers the results of the 2010 census which showed the very significant shifts that are occurring including a declining rate of population growth ongoing growth of the number of people in the floating population an increasingly imbalanced sex ratio among newborn children and ongoing ageing of the population Besides discussing population planning policy the book also examines how policies in the fields of education health gender relations child development in rural areas and policies for the elderly and families should be adjusted to accommodate demographic developments

*A New Development Model and China's Future* Deng Yingtao, 2014-04-24 The need for China to find a new environmentally sustainable development path is accepted widely among Chinese scholars and policy makers This book makes available for the first time to an English speaking audience Deng Yingtao's ground breaking book *New Development Model and China's Future* Published in 1991 the book was far ahead of its time Deng subjects the development model of the high income countries to rigorous analysis and explores the environmental implications of China following this model His clear conclusion is that the carrying capacity of the physical environment and nature is limited that economic and social development should not exceed the carrying capacity of resources and that China should not adopt the western development path Based on insights from economics engineering and human psychology the book analyses the environmental impact of the current western development model demonstrates the catastrophic impact this would have in terms of China's own development and in terms of China's relationship with the world and argues that China's rich intellectual and scientific tradition will allow Chinese people to play a central role in finding the solution to the profound environmental and development challenges the world currently faces

**Peasants and Revolution in Rural China** Chang Liu, 2007-05-14 This book explores rural political change in China from 1850 to 1949 to help us understand China's transformation from a weak decaying agrarian empire to a unified strong nation state during this period Based on local gazetteers contemporary field studies government archives personal memoirs and other primary sources it systematically compares two key macro regions of rural China the North China plain and the Yangzi delta to demonstrate the ways in which the forces of political change shaped by different local conditions operated to transform the country It shows that on the North China plain the village community composed mainly of owner cultivators was the focal point for political

mobilization whilst in the Yangzi delta absentee landlordism was exploited by the state for local control and tax extraction. However, these both set the stage in different ways for the communist mobilization in the first half of the twentieth century. *Peasants and Revolution in Rural China* is an important addition to the literature on the history of the Chinese Revolution and will be of interest to anyone seeking to understand the course of Chinese social and political development. **China in the World Economy** Zhongmin Wu, 2009-03-30 China's economy continues to grow at a great rate with important consequences for China's society and environment as well as for the wider world economy. Reforms are being undertaken in many areas within China both to encourage continued economic growth and also to mitigate the adverse effects of growth on society and the environment. This book, based on extensive original research by a wide range of leading experts, examines many key issues connected to China's economic growth and its impact. Subjects covered amongst many others include growth and inequality, labour market reforms, technological innovations and their impact, employment, unemployment and training, and the search for economic development that is ecologically sustainable. **China's Rural Financial System** Yuepeng Zhao, 2010-10-04 This book examines the credit needs and the borrowing behaviour of rural households in China in recent years. Based on a micro study of three villages with dissimilar economic characteristics in Jiangxi province, this book investigates the sources of finance, formal and informal, in rural areas and the different types of credit that farmers demand. It demonstrates the importance of innovative institutional arrangements in rural China and new instruments that give farmers access to formal rural financial markets and enable them to utilize credit effectively, concluding that further reforms are necessary for this to be achieved. **Rising China in the Changing World Economy** Liming Wang, 2012-03-12 China's rapid and sustained growth over last thirty years has propelled it to become the world's second largest economy today and potentially the largest in the foreseeable future. As one of the first major economies pulling out of recession and the last remaining major socialist country in the world today, China presents a challenge to established thinking on the essential primacy of global capitalism and the settled nature of the world system as China becomes more integrated into the world economy and the international system, both are themselves potentially transformed as a result of China's involvement. This book explores a wide range of issues connected with the impact of China on the global economy and the prevailing international system. Subjects covered include China's multinationals, international acquisitions, the exchange rate, research and development, and technology transfer. China's emerging major business groupings and small and medium-sized enterprises. **China as the Workshop of the World** Yuning Gao, 2012-04-27 Is China becoming the workshop of the world in the same way as Britain and the United States once were, or is China, as some multinational companies believe, simply a processing segment in global production networks? This book examines China's role in the international division of labor; it analyzes the scale and scope of China's manufacture, the type and relative sophistication of its exports in the world market, and its position in the global value chain. It shows that China monopolizes industrial production by being the processing center of the world. Based on extensive

original research this book examines the structure of production in global manufacturing industries applying both qualitative and quantitative methods It analyzes each segment of the value chain exploring in depth several specific industrial sectors It concludes that China has become deeply integrated into global manufacturing industry that China's position in the value chain is still quite low with relatively low research and development R but that in some sectors China is catching up rapidly especially in newly emerging sectors

### **China's New Urbanization Strategy** China Development Research

Foundation, 2013 Urbanization is one of the major challenges facing China Of China's 1.3 billion people around half still live in rural areas There has been huge migration from rural areas to cities in recent years a trend that is likely to continue strong for some time The strains that this vast migration puts on China's cities are enormous This book makes available for the English speaking reader the results of a large group of research projects undertaken by CDRF one of China's leading think tanks into the details of rural urban migration the resulting urban growth and the problems associated with all this The book goes on to put forward a new strategy which aims to ensure that China's urbanization proceeds in an orderly manner and that people and their needs are put at the centre of the strategy Key parts of the strategy include that city clusters should become the main form of urbanization that these should be arranged geographically in a pattern of two horizontal lines and three vertical lines that industrial and employment structures should highlight regional features and diversity that urban public services should be more equitably distributed that there should be new forms of urbanization management and city governance to accelerate urbanization and ensure harmonious social development and that the whole process should be conducted in an ecological green way
