Mobilizing Restraint Emmanuel Teitelbaum, 2011-08-15 In Mobilizing Restraint Emmanuel Teitelbaum argues that contrary to conventional wisdom democracies are better at managing industrial conflict than authoritarian regimes This is because democracies have two unique tools at their disposal for managing worker protest mutually beneficial union party ties and worker rights By contrast authoritarian governments have tended to repress unions and to sever mutually beneficial ties to organized labor Many of the countries that fall between these two extremes from those that have only the trappings of democracy to those that have imperfectly implemented democratic reforms exert control over labor in the absence of overt repression but without the robust organizational and institutional capacity enjoyed by full fledged democracies Based on the recent history of industrial conflict and industrial peace in South Asia Teitelbaum argues that the political exclusion and repression of organized labor commonly witnessed in authoritarian and hybrid regimes has extremely deleterious effects on labor relations

and ultimately economic growth To test his arguments Teitelbaum draws on an array of data including his original qualitative interviews and survey evidence from Sri Lanka and three Indian states Kerala Maharashtra and West Bengal He also analyzes panel data from fifteen Indian states to evaluate the relationship between political competition and worker protest and to study the effects of protective labor legislation on economic performance In Teitelbaum's view countries must undergo further political liberalization before they are able to replicate the success of the sophisticated types of growth enhancing management of industrial protest seen throughout many parts of South Asia

Managing People Globally Chris Rowley, Wes Harry, 2011-03-24 This wide ranging review of human resources management HRM in Asia draws attention to issues which are substantially different from those which a Western trained manager or student would expect Intra regional issues are examined and in an unusual approach topics are organised thematically rather than by the more typical country by country approach Considers the influences on HRM including the political economic and social contexts and expectations Discusses organisational behaviour impacts on HRM Review of HRM in Asia with topics and practices organised thematically and integrated rather than by country

Labour, Globalisation & the New Economy György Széll, Carl-Heinrich Bösling, Johannes Hartkemeyer, 2005 The dominant form of globalisation i.e. financial globalisation is the biggest challenge for employees and their representations of interest If it remains largely unregulated not only the natural resources will be destroyed but also social sustainability will be prevented The negative effects of this development are first of all to be felt on the local and regional level It is here therefore where counter initiatives and strategies have to start The quality of life and working life has not necessarily increased through globalisation and the New Economy though the possibilities of improved communication via email and Internet were positively acknowledged The biggest challenge is the increasing inequality on a global scale which is produced so far by the New Economy As education contributes to enlarge this gap it has to be adapted to the new social needs to overcome this polarisation The ongoing development must be reversed Real needs demand more spending for public than for private consumption Intermediate organisations can play a positive role in this process

Social Problems in India, 2004 **Management & Change**, 2002 **Globalization** Robert Goehlert, 2003 **Unions and Globalization** Peter Fairbrother, John O'Brien, Anne Junor, Michael O'Donnell, Glynne Williams, 2011-09-06 Innovative and offering a sociological analysis of trade unionism in the globalized era this book provides a robust and coherent comparative analysis of the debate surrounding trade unions and their renewal Indian Journal of Industrial Relations

, 2006 Unions in the 21st Century T. Kochan, 2004-07-31 This book presents a series of research essays on the state of unions in many different parts of the world Written by leading researchers in the field it provides insights into the causes of union decline But it goes beyond historical analyses to investigate the prospects for the future Can unions organize in segments of the workforce such as the youth women low wage workers and those in the informal sector Can unions network with other organizations such as NGOs nationally and internationally to gain power and influence
