Globalization And Regionalization Challenges For Public Policy:

Globalization and Regionalization David B. Audretsch, Charles F. Bonser, 2012-12-06 In this volume David B Audretsch and Charles F Bonser present a view of Globalization and Regionalization that holds that the interaction between a more open trading system and the new telecommunications and computer technology has substantially increased productivity and facilitated the fragmentation of the production process The fragmentation of the production process has resulted in a new international organization of production It has accelerated the globalization of national economies and has allowed firms to take advantage of low wages wherever they are to be found and where important to locate production facilities close to their customers This expansion in international trade and production mobility has resulted in new sources of gain that contribute to the new economy In the second chapter of this volume Alfred C Aman Jr examines whether globalization dictates new approaches to governance The process by which public policy in England has incorporated regional government is the focus of Kenneth Spencer in Chapter 3 In the fourth chapter Lawrence S Davidson provides an analysis of the impact of globalization on manufacturing in the US Midwest In Chapter 5 John W Ryan shows how there is a dual role of universities in the global economy On the one hand universities serve as institutions that foster globalization and reduce the isolation of regions On the other hand universities themselves are shaped and influenced by globalization David B Audretsch and A Roy Thurik in Chapter 6 show how globalization has led to the emergence of the strategic management of regions In Chapter 7 Jean Pierre van Aubel and Frans van Nispen examine the links between federalization and globalization in the European context The impact of globalization on regulatory institutions is the focus of Montserrat Cuchillo in Chapter 8 Finally in Chapter 9 David Eaton examines the relationship between global trade sovereignty and sub national autonomy Taken together these chapters provide a compelling view that public policy must be considered in a new light in the global economy Not only does policy have to consider global implications but also the importance of local characteristics and regional strengths

book will be of interest to students and scholars of political science British and US history democracy political participation governance social movements and politics Indian Federalism in the New Millennium B. D. Dua, Mahendra Prasad Singh, 2003 The Indian federal system has been dynamic in accommodating political and societal changes since its constitutional blueprint was drawn in 1949-50. However, there has been a fundamental transformation in the operative principles of federalism particularly during the last decade or so. The rhythm and the beat of the political system and of the federal system within it has changed on account of a variety of socio-economic and political factors but primarily because of a disarray of the party system, neo-liberal economic policies and judicial decisions. The centralizing thrust of the earlier years has yielded to some kind of a confederal operation of the political system making the formulation and implementation of public policies a consociational exercise between political elites at the two levels of government: central and provincial, with the third, now constitutionally entrenched, level: local institutions of self-government waiting in the wings. The eighteen papers in this volume, written by experts in the field, reflect on the new and emerging trends in Indian federalism in particular and in the Indian political system in general in the larger context of global and regional changes *The Limits of Regionalism* Robert G. Finbow, 2006 Assessing the effectiveness of the North American Agreement on Labour Cooperation, this interview-based study examines the operation of the core institutions, the Secretariat and National Administrative Offices, over the past seven years *Current Publications in Legal and Related Fields*, 2002 **The New American Regionalism** Heinz Gert Preusse, 2004-01-01 The heart of Professor Preusse's book deals with the two main integration agreements in the Americas, NAFTA and MERCOSUR, and the incipient FTAA. The handling of these three cases is masterful, replete with description, data, theoretical analysis and opinion. His book is a most worthwhile and stimulating read, certainly for those interested in Western Hemisphere developments. From the foreword by Sidney Weintraub. This book provides a broad quantitative analysis of the new facets of regionalism in the Americas. In particular, major aspects of the New American Regionalism are discussed in terms of two basic notions: the genuine political character of economic integration schemes and the profound inter-connectedness of the American regions with the global economy Introduction to Globalization Rosa Gomez Dierks, 2001 Globalization is generally covered in graduate courses which focus primarily on critical perspectives. This book fills the gap in the study of globalization as an introductory text suitable for undergraduates. In addition, this text includes entire chapters on subjects only partially covered in other texts, such as regionalism, global education, interactive politics, think tanks, NGOs and IFIs. This work integrates important topics to give students a broad understanding of the complex political, economic and technological interaction among the key players in the globalization process: governments, MNCs, NGOs, think tanks and international financial institutions. All chapters include review questions, exercises and web links to help students apply concepts and theories. The final chapter presents five short case studies to encourage students to apply problem-solving skills in addressing the challenges of globalization in the 21st century.
