Globalization at Risk Gary Clyde Hufbauer, Kati Suominen, 2010-10-19 History has declared globalization the winner of the 20th century Globalization connected the world and created wealth unimaginable in the wake of the Second World War But the financial crisis of 2008-09 has now placed at risk the liberal economic policies behind globalization Engulfing the entire world the crisis gave new fuel to the skeptics of the benefits of economic integration Policy responses seem to favor anti globalizers New regulations could balkanize the global financial system while widespread protectionist impulses might undo the Doha Round Issues from climate change to national security may be used as convenient excuses to keep imports out keep jobs at home and to clamp down on global capital Will globalization triumph or perish in the 21st century What reforms

Speaking from the Margin Anna Duszak,Urszula Okulska,2004 The papers in this volume analyze the language situation under globalization in several European countries How does the spread of Global English affect the integrity of the local systems Changes in lexical and discursive repertoires are evidenced and discussed It is shown how new social identities are linguistically constructed and redefined in the social consciousness of the various local communities The authors see globalization as a major change in progress that sets in relief the dual capacity of language communication and identification The collection reconciles empirical data analysis with profound attention to a host of theoretical issues such as a new ecology for language under globalization or a new interdiscursivity of globalizing communications It is argued that globalization as recontextualization of meanings poses a serious challenge for a new science of language The spatial imagery of center margin is chosen to expound on the complex interaction between the global and the local The concept of a glocal view on language affords a new perspective for coping with massive linguistic change
