## **Globalization And The Margins:**

**Globalization and the Margins** R. Grant, J. Short, 2002-09-06 Globalization has become one of the dominant ideas of recent times. However, is the debate on globalization as global as it ought to be? In this book, Grant and Rennie Short have brought together prominent experts in the field to consider how globalization affects marginalized countries and groups. A variety of case studies provide a unique assessment of the issue of globalization and offer a new look at the relationship between the global and the local.

**Globalization on the Margins (2nd Edition)** Iveta Silova, Sarfaroz Niyozov, 2020-01-01 Reflecting on almost three decades of postsocialist transformations, the second edition of *Globalization on the Margins* explores continuities and changes in Central Asian education development since the dissolution of the Soviet Union in 1991, with a particular focus on the developments that took place since the production of the first edition in 2011. Rather than viewing these transformations in isolation, the authors place their analyses within the global context by reflecting on the interaction between Soviet legacies and global education reform pressures in the Central Asian countries of Kazakhstan, Kyrgyzstan, Tajikistan, Turkmenistan, and Uzbekistan. This new edition, in addition to a revised introduction and a newly added conclusion, consists of four thematic sections, each reflecting a key theme in the educational life of the Central Asian states. These thematic sections, introduction, and conclusion collectively update our understanding of the recent developments and challenges in education of the five Central Asian states. They however go beyond mere information update so as to complicate, re-engage, re-form, and re-define the margins, taking up margins as a conceptual, geographic, cultural, and geopolitical construct. Notwithstanding the diversity of local and international authors, variety of theoretical perspectives, methodological approaches, and conceptual lenses, the essays reveal the complexity and uncertainty of the post-socialist education transformations. Instead of portraying the transition process as the influx of Western ideas into the region, *Globalization on the Margins* provides new lenses to critically examine education as a contested field of diverse perspectives, competing forces, and multidirectional flow of ideas, concepts, and reforms in Central Asia.

**ENDORSEMENTS** Hindsight famously brings clarity. And much of what happened after the fall of the Berlin Wall and the collapse of the Soviet Union has now been correctly handed over to historians. Nonetheless, we ignore that history at our peril. The contributors to this volume show that carefully textured and historically attuned education research generates deep insights into ongoing transformations and the political, cultural, social, and economic structures, relations, and practices that do the work of producing margins and centers in the first place. Noah W. Sobe, Loyola University Chicago.

*Globalization and Urban Development* Harry W. Richardson, Chang-Hee C. Bae, 2005-07-06 Most research on globalization has focused on macroeconomic and economy wide consequences This book explores an under researched area the impacts of globalization on cities and national urban hierarchies especially but not solely in developing countries Most of the globalization urban research has concentrated on the global cities e.g. New York London Paris Tokyo that influence what happens in the rest of the world In contrast this research looks at the cities at the receiving end of the forces of globalization The general finding is that large cities on balance benefit from globalization although in some cases at the expense of widening spatial inequities [Globalization, Culture and Inequality in Asia](#) Timothy J. Scrase, Todd Joseph Miles

Globalization on the Margins Iveta Silova, 2010 There may only be one way traffic on the old silk road when it comes to ideas about education policy transformation this has not helped avoid a huge ideological pile up Silova's exploration reveals how oversold and oversimplified Western policy ideas collide with inertia in education systems in post Soviet Central Asia What matters is not the ideological disparities between East and West but when and how these collude to redefine the

boundaries for education exclusion and education privilege in Central Asia Globalization on the Margins helps us to better understand this collision and this convergence hitchhikers on that road will do well to take along some reading Hugh McLean Director Education Support Program Open Society Foundations London Book Jacket **Spatial Turns** Jaimey Fisher, Barbara Caroline Mennel, 2010 The phrase spatial turns signals the growing importance of space as an analytical as well as representational category for culture The volume addresses such emerging modes of inquiry by bringing together for the first time essays that engage with spatial turns spatiality and the theoretical implications of both in the context of German culture history and theory Migrating from fields like geography urban studies and architecture the new centrality of space has transformed social science fields as diverse as sociology philosophy and psychology In cultural studies productive analyses of space increasingly cut across the studies of literature film popular culture and the visual arts Spatial Turns brings together essays that apply a spatial analysis to German literature and other media and engages with specifically German theorizations of space by such figures as Siegfried Kracauer and Walter Benjamin The volume is organized in four sections Mapping Spaces addresses cartography in all forms and in its intersection with culture Spaces of the Urban takes up one of the key sites of spatial studies the city Spaces of Encounter considers how Germany has become a contact zone for multiple ethnicities and Visualized Spaces concerns the theorization of space in film and new media studies Meeting Globalization's Challenges Luís Catão, Maurice Obstfeld, 2019-11-05 In the US in Europe and throughout the world globalization in tandem with technological progress has left a massive number of people behind feeling dispossessed disenfranchised and angry Leading the charge of hyperglobalization during the second half of the last century and enforcing the Western framework of austerity in the developing world has been the International Monetary Fund Along with the World Bank and WTO many consider the IMF one of the most consequential institutions to have pushed the world economy blindly towards excessive globalization while not adequately considering its powerful negative consequences In October 2017 however the IMF convened with some of the world's most celebrated economists and experts on trade and globalization to have an honest discussion on the most pressing concerns the world faces today as a result of globalization and how to address the extensive challenges it has created Edited by chief economist Maurice Obstfeld and senior economist Luis Catao of the IMF the book brings together a team of respected senior economists with the most promising younger scholars to address five major themes how globalization affects economic growth and social welfare potential political implications of an honest discussion of globalization and that free trade may not be politically viable free trade's role in global inequality how workers adjust or not when they're dislocated by globalization and how trade policy influences the way countries develop their economies and societies The book could represent a historic milestone at which the world's top economists and policymakers have an unprecedented honest debate about the real costs and consequences of globalization **Journeys at the Margin** Jung Young Lee, 1999 Being an immigrant is both being in between two cultures that of the immigrant and that
