The Routledge Handbook of Commodification Elodie Bertrand, Vida Panitch, 2023-12-04 Some goods are freely traded as commodities without question or controversy For other goods their commodification their being made available in exchange for money or their being subject to market valuation and exchange is hotly contested Contested commodities range from labour and land to votes healthcare and education to human organs gametes and intimate services to parks and emissions But in the context of a market economy what distinguishes these goods as non commodifiable or what defines them as contestable commodities And why should their status as such justify restricting the market choices of rationally consenting parties to otherwise voluntary exchanges This volume draws together wide ranging interdisciplinary research on the legitimate scope of markets and the kinds of goods that should be exempt therefrom In bringing diverse answers to this question together for the first time it finally identifies commodification studies as a unique field of scholarly research in its own right In so doing it fosters interdisciplinary dialogue advances scholarship and enhances education in this controversial important and growing field of research Contemporary theorists who examine this question do so from across the disciplinary spectrum and ground their answers in diverse scholarly literature and divergent methodological approaches Their arguments

will be of interest to scholars and students of philosophy economics law political science sociology policy feminist theory and ecology among others The contributors to this volume take diverse and divergent positions on the benefits of markets in general and on the possible harms of specific contested markets in particular While some favour free markets and others regulation or prohibition and while some engage in more normative and others in more empirical analysis the contributors all advance nuanced and thoughtful arguments that engage deeply with the complex set of moral and empirical questions at the heart of commodification studies This volume collects their new and provocative work together for the first time Beyond the Invisible Hand Kaushik Basu,2016-08-02 Why economics needs to focus on fairness and not just efficiency One of the central tenets of mainstream economics is Adam Smith's proposition that given certain conditions self interested behavior by individuals leads them to the social good almost as if orchestrated by an invisible hand This deep insight has over the past two centuries been taken out of context contorted and used as the cornerstone of free market orthodoxy In Beyond the Invisible Hand Kaushik Basu argues that mainstream economics and its conservative popularizers have misrepresented Smith's insight and hampered our understanding of how economies function why some economies fail and some succeed and what the nature and role of state intervention might be Comparing this view of the invisible hand with the vision described by Kafka in which individuals pursuing their atomistic interests devoid of moral compunction end up creating a world that is mean and miserable Basu argues for collective action and the need to shift our focus from the efficient society to one that is also fair Using analytic tools from mainstream economics the book challenges some of the precepts and propositions of mainstream economics It maintains that by ignoring the role of culture and custom traditional economics promotes the view that the current system is the only viable one thereby serving the interests of those who do well by this system Beyond the Invisible Hand challenges readers to fundamentally rethink the assumptions underlying modern economic thought and proves that a more equitable society is both possible and sustainable and hence worth striving for By scrutinizing Adam Smith's theory this impassioned critique of contemporary mainstream economics debunks traditional beliefs regarding best economic practices self interest and the social good **Cultural Heritage in International Economic Law** Valentina Vadi,2023-03-27 Can cultural heritage be adequately protected vis vis economic globalization This book investigates whether and how international economic law governs cultural phenomena by mapping the relevant legal framework discussing the relevant disputes concerning cultural elements adjudicated before international economic courts namely the World Trade Organization adjudicative bodies and investment treaty arbitral tribunals and proposing legal methods to reconcile cultural and economic interests It thus provides a comprehensive evaluation of possible solutions including evolution of the law through treaty interpretation and reforms to improve the balance between economic governance and cultural policy objectives **Fourth International Handbook of Globalisation, Education and Policy Research** Joseph Zajda,2024-12-04 This handbook provides a global synthesis of on going research in education and policy change during the

last decade It examines discourses of globalisation from the perspectives of the global North and global South Major theories of globalisation and education policy reforms employed in the handbook are classified into two broad categories structuralist and post structuralist The handbook while examining the impact of global trends in different societies cultures and educational settings attempts to synthesise different meta theories of globalisation and their impact on societies and educational systems It discusses the continued interaction of global national and local forces and influences especially the importance of standards and quality driven education reforms the need to overcome inequality of access to quality schools and aims at providing quality education for all students In addition the impact of neo liberal ideology on education is examined in terms of its impact on ongoing standards driven education reforms globally The handbook analyses neo liberalism in education and its focus on increasing global competitiveness accountability efficiency quality standards driven policy reforms and educational stratification The impact of globalisation on education policy and reforms is a strategically significant issue for us all The unifying conceptual framework used in the handbook to critique strategic significance of globalisation is grounded in discourse CDA and critical theory The work offers the latest findings concerning major issues in education and policy directions such as global social and economic inequality neo liberal standard driven education and policy reforms performing schools in the performing culture education for human rights and social justice new perspectives on education for sustainability dominant and effective models of values education in schools and the ubiquitous impact of ICTs on education systems

Neo-Abolitionism David Ellerman, 2021-02-17 This book argues for the abolition of the employment system in favor of workplace democracy and thus escapes the usual capitalism versus socialism binary choice by reframing the basic issue as the employment contract not private property or a market economy The author repositions the political and economic debate in the lineage of abolitionism against the owning of other people which in its modern version of neo abolitionism would also abolish the renting or hiring employing or leasing of other people The overall argument is based on three recovered theories each one of which is sufficient to yield the neo abolitionist conclusion These three rights based theories are developed throughout the book The three theories are 1 inalienable rights theory 2 the natural rights or labor theory of property and 3 democratic theory as based on a democratic constitution that

only delegates governance rights versus a non democratic constitution that alienates governance rights The book therefore is a must read for everybody interested in a better understanding of the political economy workplace democracy rights based theories and the employment system
