**Transnational Financial Associations and the Governance of Global Finance** Heather McKeen-Edwards, Tony Porter, 2013 The role of business in global governance is now widely recognized but exploration of its role in global financial governance has been more haphazard than systematic This book provides the first comprehensive analysis of the role of transnational financial associations TFAs in the organization of global finance This book develops three theoretical themes of assemblage functionality and power as enrolment These themes challenge approaches that treat financial power as emanating from a single location or force Whilst existing approaches tend to treat TFAs as irrelevant or as merely transmitting power originating elsewhere this book argues that power must be created by painstakingly assembling actors networks and objects that are often quite autonomous and working at cross purposes to one another a process in which TFAs play a central role The book explores these themes in chapters examining the roles of TFAs in interacting with public authorities constructing global financial markets and creating financial communities The authors additionally analyse the roles of TFAs in the European Union in the Global South and in promoting goals other than profitability including Islamic finance microfinancing savings banks and cooperatives Making a distinctive contribution to our understanding of global finance and global governance Transnational Financial Associations and the Governance of Global Finance is an important book for students and scholars of international political economy finance global governance and international relations

*Ontological Entanglements, Agency and Ethics in International Relations* Laura Zanolli, 2018-07-06 While the relevance of ontological commitments for epistemology and methodology in International Relations have been the subject of growing debate for several years the implications for ethics and political agency of embracing an ontology of entanglement have remained unexplored This work focuses on the importance of addressing the ontological and epistemological assumptions of

the discipline of International Relations There is increased awareness of the limits of abstract principles as ways of adjudicating real life political and ethical choices regarding International Intervention and international development for both practitioners and scholars The work challenges IR prevailing ontological imaginaries rooted upon Newtonian physics and argues that non substantialist ontological positions nurture a political ethos that privileges modest engagements of practical solidarity and weights political choices with regard to the consequences and distributive effects they may produce in the context where they are made rather than based upon their universal normative aspirations While the book is firmly rooted in metatheory Zanotti also highlights the easiness with which political failures are dismissed as unintended consequences and argues that the current crisis in Syria and genocides in Srebrenica and Rwanda have shown that advocating abstract ethical principles be they the Responsibility to Protect impartiality or following rules can lead to disaster and can foster violent and exclusionary practices She also exemplifies how an alternative ethos can be practiced through the example of an international NGO in Haiti Highlighting the need for critically re thinking the way we conceptualize political agency and validate ethics this work will be of interest to scholars of International Relations theory ethics and critical security studies

**Situating Global Resistance** Lara Montesinos Coleman,Karen Tucker,2013-09-13 The book examines some of the ways in which contemporary forms of political dissent are situated within processes of global ordering Grounded in analysis of concrete practices of discipline and dissent in specific contexts it explores the ways in which resistance can be shaped by dominant ways of thinking seeing or enacting politics and by the multiform relations of power at play in the making of global order The contributions written from a variety of disciplinary backgrounds address themes such as the processes through which particular sorts of resisting subjects are produced the politics of knowledge in which resisting practices are embedded the ways in which visual technologies are deployed within and towards oppositional practices and the politics of gender race and class within spaces of contestation The volume thus opens up space for critical reflection and inter disciplinary dialogue on what it means to be a resisting subject and on the interplay between the power and counter power in global order This book was published as a special issue of Globalizations

**The Migration Industry and the Commercialization of International Migration** Thomas Gammeltoft-Hansen, Ninna Nyberg Sørensen, 2013. Migration has become business big business. Over the last few decades a host of new business opportunities have emerged that capitalize both on the migrants' desires to migrate and the struggle by governments to manage migration. From the rapid growth of specialized transportation and labour immigration companies to multinational companies managing detention centres or establishing border security to the organized criminal networks profiting from human smuggling and trafficking, we are currently witnessing a growing commercialization of international migration. This volume claims that today it is almost impossible to speak of migration without also speaking of the migration industry. Yet acknowledging the role the migration industry plays prompts a number of questions that have so far received only limited attention among scholars and policy makers. The book offers new concepts and theory for the study of international migration by bringing together cross disciplinary theoretical explorations and original case studies. It also provides a global coverage of the phenomena under study, covering migrant destinations in Europe, the United States and Asia, and migrant sending regions in Africa, Asia and Latin America.

*Corporate Power and Ownership in Contemporary Capitalism* Susanne Soederberg, 2009-09-14. This book examines neoliberal corporate power within the context of the American political economy and its relationship to emerging market economies in order to understand the global dimensions of the corporate financial binary.

*The Capitalist Mode of Power* Tim Di Muzio, 2013-08-15. This edited volume offers the first critical engagement with one of the most provocative and controversial theories in political economy: the thesis that capital can be theorized as power and that capital is finance and only finance. The book also includes a detailed introduction to this novel thesis first put forward by Nitzan and Bichler in their *Capital as Power*. Although endorsing the capital as power argument to varying extents, contributors to this volume agree that a new understanding of capital that radically departs from Marxist and Neoclassical theories cannot be ignored. Offering the first application and appraisal of Nitzan and Bichler's theory, chapters examine the thesis in the context of energy and global capitalization, US Investment Banks, trade and investment agreements between Canada, the US and Mexico, and multinational corporations in Apartheid South Africa. Balancing theory, methodology and empirical analysis throughout, this book is accessible to new readers whilst contextualising and advancing the original theoretical debate. *The Capitalist Mode of Power* will be of interest to students and scholars of International Relations, Political Economy, Globalization and Critical Theory.

*Ethics and Economic Governance* Chris Clarke, 2015-10-23 This book seeks to explore the ethical dimensions of economic governance through an engagement with Adam Smith and a critical analysis of economic understandings of the Global Financial Crisis. It examines ethical and political dilemmas associated with key aspects of the financialisation of Anglo American economy and society including systems of asset based welfare, modern risk management and debt. In the wake of the financial crisis, recognition of the way in which everyday lives and life chances are tied into global finance is widespread. Yet few contributions in IPE explicitly tackle this issue as a question of ethics. By developing Adam Smith's under utilised account of how market oriented behaviour is constituted through a process of sympathy, this book provides an innovative way of understanding contemporary issues of economic governance and the possibilities and limits for intervention within it. By taking Adam Smith's moral philosophy seriously, it becomes evident that the ever deeper enmeshing of finance in our everyday lives is a failed experiment. Turning the common understanding of Smith on its head, we can also turn accepted wisdom about the recent financial crisis on its head and see the urgency of making better known the ethico political contestation that lies at the heart of financial market relations. It will be of interest to students and scholars of IPE as well as those across the social sciences who wish to question the foundations of contemporary economy and society.

**Securitization, Accountability and Risk Management** Karin Svedberg Helgesson, Ulrika Mörtz, 2012-01-25 This edited volume examines the reconstitution of the public security domain since the 9/11 attacks, focusing on the banking sector and anti money laundering (AML) activity in particular. Since the inception of the Financial Action Taskforce (FATF) in 1989, AML has been viewed as a global problem. This text argues that the securitization of the financial sector as a result of AML has entailed the emergence of a new public security domain which transcends the classic public private divide. The analysis in the volume is multidisciplinary and combines concepts and theories from the literature on securitization, the public private divide and business management. The authors argue that the state is under transformation and that the developments in the security field are part of an ongoing renegotiation of the relationship between the state and the business sector. *Securitization, Accountability and Risk Management* therefore contributes to a deeper understanding of how the power relationships have changed between the public and the private sectors after 9/11. This interdisciplinary book will be of much interest to students of critical security, risk management, business studies, critical legal studies and IR in general.

**Debtfare States and the Poverty Industry** Susanne Soederberg, 2014-09-19 WINNER of the BISA IPEG Book Prize 2015 <http://www.bisa-ipeg.org/ipeg-book-prize-2015-winner-announced> Under the rubric of financial inclusion, lending to the poor in both the global North and global South has become a highly lucrative and rapidly expanding industry since the 1990s. A key inquiry of this book is what is the financial in which the poor are asked to join. Instead of embracing the mainstream position that financial inclusion is a natural, inevitable and mutually beneficial arrangement, *Debtfare States and the Poverty Industry* suggests that the structural violence inherent to neoliberalism and credit led accumulation have created and

normalized a reality in which the working poor can no longer afford to live without expensive credit. The book further transcends economic treatments of credit and debt by revealing how the poverty industry is extricably linked to the social power of money, the paradoxes in credit-led accumulation and debt-farism. The latter refers to rhetorical and regulatory forms of governance that mediate and facilitate the expansion of the poverty industry and the reliance of the poor on credit to augment or replace their wages. Through a historically grounded analysis, the author examines various dimensions of the poverty industry, ranging from the credit card, payday loan, and student loan industries in the United States to micro-lending and low-income housing finance industries in Mexico. Providing a much-needed theorization of the politics of debt, *Debt-fare States and the Poverty Industry* has wider implications of the increasing dependence of the poor on consumer credit across the globe. This book will be of very strong interest to students and scholars of Global Political Economy, Finance, Development Studies, Geography, Law, History, and Sociology. **Global Economic Governance and the Development Practices of the Multilateral Development Banks** Susan Park, Jonathan R. Strand, 2015-08-27. As pillars of the post-1945 international economic system, the Regional and Sub-Regional Development Banks (RSDBs) have long been considered mini-World Banks, reiterating the policy approach of the largest official multilateral development lender in the world. The main objective of the collection is to identify what role the RSDBs play in global economic governance and why. This edited collection draws together cutting-edge original research on these understudied institutions. In the burgeoning sub-field of global economic governance, as well as the broader study of international organisations (IOs), too often the focus remains on the World Bank and the International Monetary Fund (IMF). Second-order IOs such as the RSDBs receive much less attention despite their longevity and regional importance. This volume corrects this oversight by bringing together methodologically diverse research on the RSDBs that interrogates the role and impact of these organisations in global economic governance. The book investigates the African Development Bank (AfDB), the Asian Development Bank (AsDB), the Inter-American Development Bank (IDB), and the European Bank for Reconstruction and Development (EBRD) and select sub-regional development banks in comparison to the World Bank Group. This work will be of great interest to students and scholars of IPE, IR, and Development Studies.

**Global Shell Games** Michael G. Findley, Daniel L. Nielson, J. C. Sharman, 2014-01-23. Every year a staggering number of unidentified shell corporations succeed in hiding perpetrators of terrorist financing, corruption, and illegal arms trades, but the degree to which firms flout global identification standards remains unknown. Adopting a unique experimental methodology, *Global Shell Games* attempts to unveil the sordid world of anonymous shell corporations. Posing as twenty-one different international consultants, the authors approached nearly 4,000 services in over 180 countries to discover just how easy it is to form an untraceable company. Combining rigorous quantitative analysis, qualitative investigation of responses, and

lurid news reports this book makes a significant research contribution to compliance with international law and international crime and terrorism whilst offering a novel new approach to the field of political science research Global Shell Games is an invaluable resource for scholars of international relations and a fascinating accessible read for anyone interested in learning about worldwide criminal practice in corporate finance      *Global Public Policy* Karsten Ronit, 2006-12-12 We are in a critical period where civil society organizations actively influence business political behaviour while corporations and business associations are adopting new and flexible strategies aimed at closer contact with civil society Against the backdrop of such broad reorientations this book analyzes the new and changing roles of business and civil society actors to offer an accurate portrayal of the formation of global public policy With contributions from leading experts in the field it investigates the potential for and emergence of new policy arrangements along with their patterns of conflict and cooperation Building upon theoretical inspirations from various traditions studying international affairs this volume develops and applies the concepts of policy arrangements and countervailing power to the field of global business civil society relations A range of key issues including labour consumers global finance the mining industry climate policy and the World Economic and Social Forums are examined Global Public Policy will be of strong interest to students and researchers of international political economy international relations and international business
