Is Globalization Over? Jeremy Green, 2019-11-08 Looming trade wars and rising nationalism have stirred troubling memories of the 1930s Will history repeat itself Do we face the chaotic breakdown of the global economic system in the face of

stagnation protectionism and political tumult Jeremy Green argues that although we face grave problems globalization is not about to end Setting today s challenges within a longer historical context he demonstrates that the global economy is more interconnected than ever before and the costs of undoing it high enough to make a complete breakdown unlikely Popular analogies between the 1930s and today are misleading But the governing liberal ideology of globalisation is changing It is mutating into a hard edged nationalism that defends free markets while reasserting sovereignty and strengthening borders This national liberalism threatens a much more dangerous disintegration fuelled by inequality and ecological crisis unless we radically rethink the international status quo This brilliantly original account of the discontents of globalization is a must read both for concerned citizens and students of global political economy
