Globalization Of The Mass Media:

Globalization of the Mass Media, 1993 The Age of Behemoths Anthony Smith, 1991 A Twentieth Century Fund paper distributed by the Brookings Institution Smith president Magdalen College Oxford traces the concentration of media ownership and emergence of new global media giants trends which threaten the diversity of information sources available to citizens in a democracy Annotation copyrighted by Book News Inc Portland OR **Globalization of the Mass Media** États-Unis. National telecommunications and information administration, 1994 Discusses the why and how of globalization of the mass media examines U S communications policy options that could enable U S based mass media firms to better compete in international and domestic markets explores the trend of expanding foreign direct investment and exports and looks at regulatory and technological changes affecting international competition Makes recommendations for changes to enable greater participation by U S firms in foreign broadcasting markets **The Globalization of News** Oliver Boyd-Barrett, Terhi Rantanen, 1998-10-26 This book overviews and reconsiders media organizations the news agencies which report and film the news for the press and broadcast media Incorporating institutional historical political economic and cultural studies perspectives the book reviews agency provision of general news video news and financial news analyzes agency state relations through periods of dramatic social upheaval and critically examines the impact of deregulation and globalization on the news agency business Contributors consider how leading players like Reuters and Associated Press help to define the nature of both the Global and the Local as well as focusing on the network of relations between international and national agencies The book also takes into account the attempts by some national news agencies to establish radically different news agendas Demonstrating how the news agencies have contributed both to the process of globalization and simultaneously to the process of national construction this book provides an important critical survey of the contemporary international news business Globalization, Development and the Mass Media Colin Sparks, 2007-11-20 Globalization Development and the Mass Media gives a comprehensive and critical account of the theoretical changes in communication studies from the early theories of development communication through to the contemporary critiques of globalization It examines two main currents of thought Firstly the ways in which the media can be used to effect change and development It traces the evolution of thinking from attempts to spread modernity by way of using the media through to alternative perspectives based on encouraging participation in development communication Secondly the elaboration of the theory of media imperialism the criticisms that it provoked and its replacement as the dominant theory of international communication by globalization The Myth of Media Globalization Kai Hafez, 2007-03-26 The ongoing interconnection of the world through modern mass media is generally considered to be one of the major developments underpinning globalization This important book considers anew the globalization phenomenon in the media sphere Rather than heralding globalization or warning of its dangers as in many other books Kai Hafez analyses the degree to which media globalization is really taking place Do we have

enough evidence to show that there is a linear and accelerated move towards transnationalization in the media. All too often the empirical data presented seems rather more anecdotal than representative. Many transborder media phenomena are overestimated and taken out of the context of locally and nationally oriented mainstream media processes all over the world. The inherent danger is that a central paradigm of the social sciences rather than bearing scholarly substance will turn out to be a myth and even a sometimes dangerously ideological tool. Based on a theoretical debate of media globalization, the work discusses most major fields of media development including foreign reporting, satellite TV, film, internet, foreign broadcasting, media and migration, media policy, and media economy. As an important new contribution to timely debates, *The Myth of Media Globalization* will be essential and provocative reading for students and scholars alike. *International Media Communication in a Global Age* Guy Golan, Thomas Johnson, Wayne Wanta, 2009-09-10. This volume provides a comprehensive examination of key issues regarding global communication, focusing particularly on international news and strategic communication. It addresses those news factors that influence the newsworthiness of international events, providing a synthesis of both theoretical and practical studies that highlight the complicated nature of the international news selection process. It also deals with international news coverage, presenting research on the cross-national and cross-cultural nature of media coverage of global events in the interdisciplinary context of research on political communication, war coverage, new technologies, and online communication. The work concludes with a focus on global strategic communications in the age of globalization, global economies, and cross-national media ownership. Chapters here provide readers with some of the most up-to-date research on international advertising, public relations, and other key issues in international communications. With contributions from many of the leading scholars in the field of international media communication research, this collection presents a valuable resource for advancing knowledge and understanding of the complicated international communication phenomenon. It will be of value to upper-level undergraduates and graduate students in mass media and communication programs and to scholars whose research focuses on global communication research. **The Media and Globalization** Terhi Rantanen, 2004-12-01. This is a necessary and very original book that really does address the lack of attention to media in previous discussions about globalization. James Lull, San Jose State University. There is practically no globalization without media and communications. Yet this relationship is so obvious it is often overlooked. Rantanen challenges conventional ways of thinking about globalization and shows it cannot be understood without studying the role of the media. This book offers a clear and accessible overview of globalization and the pivotal role of the media, an introduction to the concepts and theories of globalization, empirical data on the production and consumption of media, a methodology for relating individual local experiences to the global picture. Rantanen has made this complex and huge subject very accessible by using personal histories and pictures to engage the reader. It will be invaluable to students in international media, cultural studies, communications, and international relations. *The New Communications Landscape* Anura Goonasekera, Jan
