Globalization Technological Change And Public Education:

Globalization, Technological Change, and Public Education Torin Monahan, 2005 New information technologies combined with the restructuring of school districts has led to dramatic changes in public education Technologies are intended to help students compete in the global marketplace and organizational restructuring has been a way to increase productivity and accountability Yet a closer look at the interplay of these two phenomena suggests the emergence of new less promising power relations While decision making authority is becoming increasingly centralized accountability for centrally made decisions is increasingly becoming distributed to those along the periphery students and teachers Through detailed ethnographic research and interviews in a large urban school system this book reports on the first extensive study of globalization and technology in education describing examples of globalization on the ground With few exceptions information technologies are used to demand greater flexibility of students and workers to adapt to systems that are evermore rigid and controlling This is the latest addition to the popular Social Theory Education and Cultural Change series

Globalization, Technological Change, and Public Education Torin Monahan, 2013-01-11 *Globalization Technological Change and Public Education* documents the dramatic changes taking place in public education through the incorporation of new information technologies These additions to the public school environment have generally been seen as enabling tools to help students and nations compete in the global marketplace Yet a closer look at the interplay of technological change and organizational restructuring suggests the emergence of new less promising power relations Through detailed ethnographic research and interviews in the Los Angeles public school system Torin Monahan reveals how with few exceptions these changes to the educational process are forcing both students and workers to adapt to systems that are ever more rigid and controlling

Education Technology Policies in the Middle East Michael Lightfoot, 2016-09-14 This book explores the potential educational technologies have for transforming education in the Middle East Although technology has increasingly become a part of classrooms around the globe over recent decades its application in classrooms in the MENA region remains underused and this book draws on a case study from the Arabian Gulf to examine the beneficial impact technologies have on teaching and learning The book identifies the many social and cultural pressures that prevent government technology policies to be implemented in the way that the international community would find recognisable and acceptable and how education policy from the Global North is transplanted into a separate context without considering the different requirements The study seeks to address the ways in which educational technology policy in government schools plays a part in the enactment of education reforms and how government policy aspirations are played out in practice

Diviv Distrusting Educational Technology Neil Selwyn, 2013-11-26 *Distrusting Educational Technology* critically explores the optimistic consensus that has arisen around the use of digital technology in education Drawing on a variety of theoretical and empirical perspectives this book shows how apparently neutral forms of educational technology have actually served to align

educational provision and practices with neo liberal values thereby eroding the nature of education as a public good and moving it instead toward the individualistic tendencies of twenty first century capitalism Following a wide ranging interrogation of the ideological dimensions of educational technology this book examines in detail specific types of digital technology in use in education today including virtual education open courses digital games and social media It then concludes with specific recommendations for fairer forms of educational technology An ideal read for anyone interested in the fast changing nature of contemporary education

Distrusting Educational Technology comprises an ambitious and much needed critique

Education and Technology Neil Selwyn, 2011-03-17 Digital technology lies at the heart of contemporary education provision This book considers the key issues in the field and addresses some fundamental but often unvoiced questions about the ever growing use of technologies in education It focuses on the social as well as the technical aspects of these issues giving careful thought to the people practices processes and structures behind the use of technologies in education The book considers a range of current debates and controversies Will technology replace the school or university Will technology replace the teacher What do we really know about learning and technology Does technology make learning fairer Can technology address the many educational problems and inequalities faced by people around the world What does the future hold for technology and education What can be learnt from the history of technology use Neil Selwyn takes a critical look at some of the major debates concerning digital technologies and education Study questions and annotated further reading are included to support readers along with a companion website linking to online sources and resources

Global Issues in Education Greg Wiggan, Charles Hutchison, 2009-08-16 Global Issues in Education bridges the discourse on globalization and education with international studies on race class gender ethnicity culture and multiculturalism The contributors to this volume address educational challenges of post colonial Ghana the United Arab Emirates the Caribbean China and Germany juxtaposed against Western education in the United Kingdom and the United States They synthesize macrosociology with educational research which provides readers with the background core knowledge and global focus that is needed to understand international issues as well as deal with diversity in the classroom Global Issues in Education also addresses the need for additional research that makes the connections between the geopolitical economy and education and it does this with a focus on the link to culture ethnicity and education

Media Capitalism Thomas Klikauer, 2022-01-01 This book argues that media and capitalism no longer exist as separated entities and posits three reasons why one can no longer exist without the other Firstly mass media have become indispensable to capitalism due to the

media's ability to sell the commodities of mass consumerism. Media capitalism also creates pro-capital attitudes among a target population and establishes an ideological hegemony. Thirdly, media capitalism provides mass deception to hide the pathologies of capitalism which include mass poverty, rising inequalities, and the acceleration of global warming. To illuminate this, the book's historical chapter traces the emergence of media capitalism. Its subsequent chapters show how media capitalism has infiltrated the public sphere, society, schools, universities, the world of work, and finally democracy. The book concludes by outlining how societies can transition from media capitalism to a post-media capitalist society.

Games-To-Teach or Games-To-Learn Yam San Chee, 2015-08-18. The book presents a critical evaluation of current approaches related to the use of digital games in education. The author identifies two competing paradigms: that of games to teach and games to learn. Arguing in favor of the latter, the author advances the case for approaching game-based learning through the theoretical lens of performance rooted in play and dialog to unlock the power of digital games for 21st-century learning. Drawing upon the author's research, three concrete exemplars of game-based learning curricula are described and discussed. The challenge of advancing game-based learning in education is addressed in the context of school reform. Finally, future prospects and educational opportunities for game-based learning are articulated. Readers of the book will find the explication of performance theory applied to game-based learning especially interesting. This work constitutes the author's original theorization. Readers will derive four main benefits: 1) an explication of the difference between game-based teaching and game-based learning and why this difference is of critical importance; 2) an exposition of the theory of game-based learning as performance; 3) concrete exemplars and research outcomes relating to three game-based learning curricula that have been empirically evaluated in schools; and 4) an understanding of complex issues related to the human side of school change that must be effectively addressed to achieve take-up of game-based learning in schools. Schools Under

Surveillance Torin Monahan, Rodolfo D. Torres, 2009-10-13. *Schools Under Surveillance* gathers together some of the very best researchers studying surveillance and discipline in contemporary public schools. Surveillance is not simply about monitoring or tracking individuals and their data; it is about the structuring of power relations through human, technical, or hybrid control mechanisms. Essays cover a broad range of topics including police and military recruiters on campus, testing and accountability regimes such as No Child Left Behind, and efforts by students and teachers to circumvent the most egregious forms of surveillance in public education. Each contributor is committed to the continued critique of the disparity and inequality in the use of surveillance to target and sort students along lines of race, class, and gender. Contemporary
