Globalization And Poverty:

Globalization, Poverty and Inequality Raphael Kaplinsky, 2013-05-03 Globalization is characterised by persistent poverty and growing inequality Conventional wisdom has it that this global poverty is residual as globalization deepens the poor will be lifted out of destitution The policies of the World Bank the IMF and the WTO echo this belief and push developing countries ever deeper into the global economy Globalization Poverty and Inequality provides an alternative viewpoint It argues that for many particularly for those living in Latin America Asia and Central Europe poverty and globalization are relational It is the very workings of the global system which condemn many to poverty In particular the mobility of investment and the large pool of increasingly skilled workers in China and other parts of Asia are driving down global wages This poses challenges for policy makers in firms and countries throughout the world It also challenges the very sustainability of globalisation itself Are we about to witness the implosion of globalisation as occurred between 1913 and 1950 Using a variety of theoretical frameworks and drawing on a vast amount of original research this book will be an invaluable resource for all students of globalization and its effects

Globalization, Growth, and Poverty Paul Collier, David Dollar, World Bank, 2002 Globalization is a powerful force for poverty reduction as societies and economies around the world are becoming more integrated Although this international integration presents tremendous opportunities for developing countries it also has raised concerns about rising inequality shifting power and cultural uniformity This report assesses the impact of globalization and addresses the ensuing anxieties It proposes an agenda for action aimed at mitigating the risks that globalization potentially generates while maximizing the opportunities for the poor *Development Centre Seminars Globalisation, Poverty and Inequality* OECD Development Centre, 2003-06-06 This book is based on an exceptional event in December 2000 which brought together civil society from poor countries and OECD experts It emerges that globalisation can have a positive impact in poor countries but only if policies encouraging more equitable distribution of resources are adopted *The Debate on Globalization, Poverty, and Inequality* Martin Ravallion, 2003

Does Globalization Hurt the Poor? Pierre-Richard Agénor, 2016 Agénor attempts to examine analytically and empirically the extent to which globalization affects the poor in low and middle income countries He begins with a description of various channels through which trade openness and financial integration may have an adverse effect on poverty However the author also stresses the possible nonlinearities involved possibilities that have seldom been recognized in the ongoing debate Agénor then presents cross country regressions that relate measures of real and financial integration to poverty The regressions control for changes in income per capita and output growth rates as well as various other macroeconomic and structural variables such as the inflation tax changes in the real exchange rate and the terms of trade health and schooling indicators and macroeconomic volatility The author uses not only individual indicators of trade and financial openness but also a 'globalization index' based on principal components analysis and tests for both linear and nonlinear effects

The results suggest the existence of a nonmonotonic Laffer type relationship between globalization and poverty. At low levels globalization appears to hurt the poor but beyond a certain threshold it seems to reduce poverty possibly because it brings with it renewed impetus for reform. So globalization may hurt the poor not because it went too far but rather because it did not go far enough. This paper a product of the Poverty Reduction and Economic Management Division World Bank Institute is part of a larger effort in the institute to study the impact of globalization on the poor in developing countries. The Impact of Globalization on the World's Poor M. Nissanke, E. Thorbecke, 2007-01-05 This book examines the various channels and transmission mechanisms such as greater openness to trade and foreign investment economic growth effects on income distribution technology transfer and labour migration through which the process of globalization affects different dimensions of poverty in the developing world. What the Market Does to People David Macarov, 2003 This volume describes explains and exposes the growth of poverty the world over. It reveals the shocking extent of poverty the forms it takes and its results and probes the origins of poverty in attitudes and ideologies norms and structures. Globalization, Poverty, and Income Inequality Richard Barichello, Arianto A. Patunru, Richard Schwindt, 2021-11-15 The process of globalization has implications for human rights though the relationship between the two is not always clear. How does globalization effect human rights in local contexts. Globalization Poverty and Income Inequality examines the relationships between globalization and trade liberalization and poverty and income inequality using Indonesia as a case study. This empirically rigorous investigation finds that although increased trade tends to reduce poverty there are exceptions. For example globalization via trade in certified organic coffee has not helped low income farmers. And globalized access to treatments for visual problems has been countermanded by rising digitization that negatively affects the visually disabled poor. Ultimately the chapters describe an ambiguous relationship between trade liberalization and inequality both of which can increase or decrease in proportion to one another depending on region and sector. This empirically driven work provides a nuanced view of the trade poverty relationship contributing balanced testimony to policy debates being held internationally. **Trade, Globalization and Poverty** Elias Dinopoulos, Pravin Krishna, Arvind Panagariya, Kar-yiu Wong, 2007-12-14 An outstanding work written to celebrate the seventieth birthday of Jagdish Bhagwati this rigorously academic and critical volume represents an important contribution to the understanding of many aspects of globalization. *The Poor Under Globalization in Asia, Latin America, and Africa* Machiko Nissanke, Erik Thorbecke, 2010. *Globalisation and Poverty* Maurizio Bussolo, Jeffery I Round, 2006-03-29 Introduction Maurizio Bussolo and Jeffery Round The impact of structural reforms on poverty a simple methodology with extensions Neil McCulloch Trade liberalisation and poverty dynamics in Vietnam Yoko Niimi Puja Vasudeva Dutta and L Alan Winters Globalisation and poverty implications of South Asian experience for the wider debate Jeffery Round and John Whalley Globalisation in developing countries the role of transaction costs in explaining economic performance in India Maurizio Bussolo and John Whalley Globalisation poverty interactions in Bangladesh Mustafa Mujeri

and Bazlul Khondker Poverty and policy in a globalising economy the case of Ghana Maurizio Bussolo and Jeffery Round Trade liberalisation and poverty in Nepal computable general equilibrium micro simulation analysis John Cockburn Globalisation and poverty changes in Colombia Maurizio Bussolo and Jann Lay *Globalization and Poverty* Ann E. Harrison, 2010 This essay surveys the evidence on the linkages between globalization and poverty I focus on two measures of globalization trade and international capital flows Past researchers have argued that global economic integration should help the poor since poor countries have a comparative advantage in producing goods that use unskilled labor The first conclusion of this essay is that such a simple interpretation of general equilibrium trade models is likely to be misleading Second the evidence suggests that the poor are more likely to share in the gains from globalization when there are complementary policies in place Such complementary policies include investments in human capital and infrastructure as well as policies to promote credit and technical assistance to farmers and policies to promote macroeconomic stability Third trade and foreign investment reforms have produced benefits for the poor in exporting sectors and sectors that receive foreign investment Fourth financial crises are very costly to the poor Finally the collected evidence suggests that globalization produces both winners and losers among the poor The fact that some poor individuals are made worse off by trade or financial integration underscores the need for carefully targeted safety nets The Poor under Globalization in Asia, Latin America, and Africa Machiko Nissanke, Erik Thorbecke, 2010-05-13 This volume uses thirteen case studies to analyze the impact of economic globalization on poverty and inequality in different regions of the developing world *Flat World, Big Gaps* United Nations, 2007-03 This publication sets out an empirical analysis of the impact of economic liberalisation and globalisation on inequality poverty and development including recent trends in economic growth income distribution and global inequalities and the comparative experiences of countries that have pursued different economic policies **Does Globalization Hurt the Poor?** Pierre Richard Agenor, 2002 **Discuss the impact of globalization on global poverty and inequality** Veronika Minkova, 2011-09-28 Essay from the year 2010 in the subject Politics Topic Globalization Political Economics grade 1 7 King s College London language English abstract The period from the end of the World War II to the mid 1970s saw world wide sustained and high economic growth Within a generation Western European society was transformed from predominantly agrarian to post industrial Latin America Asia and Africa also were heading towards higher growth rates During the 1980s a new period of integration of national economies led to the intensification of international economic interconnectedness and developing economies were expected to overcome the between country income gap through openness growth link This was seen as the manifestation of neoliberalism as new forms of international economic relations emerged such as industrialisation and the new international division of labour However as recent studies point towards increasing world poverty and inequality scholars have re examined the validity of the neoliberal argument After years of implementing prescribed reforms some developing countries and regions such as Sub Saharan Africa have not experienced

the expected growth Chapter 2 summarizes the implications of the policy paradigm inspired by the Washington Consensus Chapter 3 identifies current trends in global poverty and inequality with attention to the different measures used to interpret world economic well being The next chapter analyses the openness growth inequality poverty nexus The final chapter seeks to recognize causes of poverty and inequality transmitted by the globalization process The factors of poverty and inequality path dependence are grouped in four categories economic openness and technological progress macroeconomic policies financialisation of the economy and international financial institutions Globalization and Poverty Nadejda Ballard,Ilan Alon,James Bacchus,2006 Reviews the many causes of poverty and defines how globalization is having a major impact on the way we define poverty and how we fight it P 4 of cover **Globalization and Poverty** Ann Harrison,2007-11-01 Over the past two decades the percentage of the world s population living on less than a dollar a day has been cut in half How much of that improvement is because of or in spite of globalization While anti globalization activists mount loud critiques and the media report breathlessly on globalization s perils and promises economists have largely remained silent in part because of an entrenched institutional divide between those who study poverty and those who study trade and finance Globalization and Poverty bridges that gap bringing together experts on both international trade and poverty to provide a detailed view of the effects of globalization on the poor in developing nations answering such questions as Do lower import tariffs improve the lives of the poor Has increased financial integration led to more or less poverty How have the poor fared during various currency crises Does food aid hurt or help the poor Poverty the contributors show here has been used as a popular and convenient catchphrase by parties on both sides of the globalization debate to further their respective arguments Globalization and Poverty provides the more nuanced understanding necessary to move that debate beyond the slogans

Globalization and Equity Natalia E. Dinello,Lyn Squire,2005-01-01 In bringing together seven regional studies by economists from the Global Development Network Natalia Dinello and Lyn Squire provide an insightful perspective on the relationships between globalization and equity The topic is important but too often has been oversimplified and viewed through western lenses Complexity does not preclude strong conclusions dubbed the Cairo Consensus here but its analysis is helped by the mix of expertise and local knowledge embodied in this book Richard Pomfret University of Adelaide Australia

The Debate on Globalization, Poverty, and Inequality Martin Ravallion,2016 In the last year or so markedly different claims have been heard within the development community about just how much progress is being made against poverty and inequality in the current period of quot globalization quot Ravallion provides a nontechnical overview of the conceptual and methodological issues underlying these conflicting claims He argues that the dramatically differing positions taken in this debate often stem from differences in the concepts and definitions used and differences in data sources and measurement assumptions These differences are often hidden from view in the debate but they need to be considered carefully if one is to properly interpret the evidence The author argues that the best available evidence suggests that if the rate of progress

against absolute poverty in the developing world in the 1990s is maintained then the Millennium Development Goal of halving the 1990 aggregate poverty rate by 2015 will be achieved on time in the aggregate though not in all regions He concludes with some observations on the implications for the more policy oriented debates on globalization and pro poor growth This paper a product of the Poverty Team Development Research Group is part of a larger effort in the group to throw light on current development debates
