Globalization Localization And Violence:

Globalization, Localization, and Violence Peter Kloos, Purnaka L. De Silva, 1995 Globalization and Capitalist Geopolitics Daniel Woodley, 2017-11-27 Globalization and Capitalist Geopolitics is concerned with the nature of corporate power against the backdrop of the decline of the West and the struggle by non western states to challenge and overcome domination of the rest of the world by the West This book argues that although the US continues to preside over a quasi imperial system of power based on global military preponderance and financial statecraft and remains reluctant to recognize the realities global economic convergence the age of imperial state hegemony is giving way to a new international order characterized by capitalist sovereignty and competition between regional and transnational concentrations of economic power This title seeks to interrogate the structure of world order by examining leading approaches to globalization and political economy in international relations and international political economy Breaking with the classical school Woodley argues that geopolitics should be understood as a transnational strategic practice employed by powerful state actors which mirrors predatory corporate rivalry for control over global resources and markets reproducing the structural conditions for corporate power through the transnational state form of capital In a period of increasing geopolitical insecurity and economic instability this title provides an authoritative yet accessible commentary on debates on capitalism and globalization in the wake of the financial crisis It is valuable resource for students and scholars seeking to develop a deeper understanding of the historical determinants of the changing dynamics of neoliberal capitalism and their implications for world order *The Politics of Self-determination* Kristina Roepstorff, 2013 There have been an increasing number of self determination conflicts where sub state groups challenge existing state authority This book explains how self determination can be exercised beyond the decolonisation process and demonstrates that rather than a threat to international peace and stability it has strong potential as a tool for conflict prevention and resolution **The Social Impacts of Light Weapons Availability and Proliferation** Christopher Louise, 1995 Conflicts in Social Science Anton Van Harskamp, 2002-11-01 Through detailed case studies the contributors look at conflicts in social science arguing that they must be resolved at the level of the individual discipline rather than at the level of philosophy They explore different ways in which social scientists deal with the tension of being simultaneously party to a conflict and a contributor to its settlement **Korea's Globalization** Samuel S. Kim, 2000-06-19 This book explores Korea's globalization and its impact on all aspects of Korean society **A Hill Among a Thousand** Danielle de Lame, 2005 Sometimes called the land of a thousand hills Rwanda has witnessed upheavals of massive proportions Looking at the people of one hill community Danielle de Lame shows how they coped with unprecedented change during the twilight years of Rwanda's Second Republic In an insightful meticulously researched study focusing on the late 1980s and early 1990s de Lame situates this rural community located at the heart of the Kibuye prefecture within the larger context of Rwandan history and society In this country without villages it is the networks of kinship administration and

commerce that create complex patterns of solidarity and dependency De Lame reveals these patterns in all their intricacy and her treatment of the region and its rhythms speaks at the same time to the economics of production the inequalities of power and the dynamics of social transformation The ultimate goal of her work is to restore the individuality of the people she studies making them neither executioners nor victims but men and women fashioning their own destiny day after day Copublished with the Royal Museum for Central Africa Wisconsin edition not for sale in Europe The Turks in World History Carter Vaughn Findley, 2004-11-11 Beginning in Inner Asia two thousand years ago the Turks have migrated and expanded to form today's Turkish Republic five post Soviet republics other societies across Eurasia and a global diaspora For the first time in a single accessible volume this book traces the Turkic peoples trajectory from steppe to empire to nation state Cultural economic social and political history unite in these pages to illuminate the projection of Turkic identity across space and time and the profound transformations marked successively by the Turks entry into Islam and into modernity
