Globalization The State And Violence:

Globalization, the State, and Violence Jonathan Friedman, 2004-09-08 Friedman and a distinguished group of contributors offer a compelling analysis of globalization and the lethal explosiveness that characterizes the current world order. In particular, they investigate global processes and political forces that determine networks of crime, commerce, and terror, and reveal the economic, social, and cultural fragmentation of transnational networks. In a critical introduction, Friedman evaluates how transnational capital represents a truly global force, but geographical decentralization of accumulation still leads to declining state hegemony in some areas and increasing hegemony in others. The authors examine the growth and increasing autonomy of indigenous populations and the massively destabilizing effect of migration processes. They describe the rapid increase in criminalization of ethnic and immigrant groups, as well as an increase in class stratification creating new forms of social confrontation and violence. In addition to ethnic identity-based conflict, there are analyses of transnational criminal networks which also represent disintegration of larger homogeneous territories or hierarchical orders. The authors ask us to reevaluate the dynamics of globalization, the contradictions of centralization and fragmentation around the world, as we discover how best to transform these conditions for the future. This research was originally funded by the Harry Frank Guggenheim Foundation. *Globalization, the State, and Violence* will be a valuable reference in anthropology, social theory, international politics, and economics, ethnic conflict, immigration, and economic history.

Globalization, the State, and Violence Jonathan Friedman, 2003 A dozen essays by US and European urbanists, anthropologists, sociologists, and political scientists develop an approach to understanding the increasing violence that has occurred on a global scale over the past couple of decades and try to construct a more adequate comprehension of global processes than has been provided in the language of globalization. Among the topics are class projects, social consciousness, and the contradictions of globalization and the case for citizenship as social contract.

Ill Globalization, the State and Violence ... XXXXX., 2000

State Terror, State Violence Bettina Koch, 2015-12-16 The volume critically discusses theoretical discourses and theoretically informed case studies on state violence and state terror. How do states justify their acts of violence? How are these justifications critiqued? Although legally state terrorism does not exist, some states nonetheless commit acts of violence that qualify as state terror as a social fact. In which cases and under what circumstances do illegitimate acts of violence qualify as state terrorism? Geographically, the volume covers cases and discourses from the Caucasus, South East and Central Asia, the Middle East, and North America.

The Globalization of Political Violence Richard Devetak, Christopher W. Hughes, 2007-12-18 This edited volume offers important new methodological and multi-disciplinary insights into the study of globalization and political violence.

Chaos and Violence Stanley Hoffmann, 2006 The author's fifth collection of essays on international affairs in forty years, written in the past six years.

The First Age of Industrial Globalization Maartje Abbenhuis, Gordon Morrell, 2019-10-17 This book offers an accessible and lively survey of the global history of the age of industrialization and

globalization that arose in the wake of the Napoleonic Wars and collapsed in the maelstrom of the First World War Through a combination of industrialization technological innovation and imperial expansion the industrializing powers of the world helped to create inter connected global space that left few regions untouched In ten concise chapters this book relays the major shifts in global power economics and society outlining the interconnections of global industrial imperial and economic change for local and regional experiences identities and politics It finishes with an expos on the catastrophic impact of the First World War on this global system The First Age of Industrial Globalization weaves together the histories of industrialization world economy imperialism international law diplomacy and war which historians usually treat as separate developments and integrates them to offer a new analysis of an era of fundamental historical change It shows that the revolutionary changes in politics society and international affairs experienced in the 19th century were inter connected developments It is essential reading for any student of modern global history

Indigenous Peoples and Globalization

Thomas D. Hall, James V. Fenelon, 2015-12-03 The issues native peoples face intensify with globalization Through case studies from around the world Hall and Fenelon demonstrate how indigenous peoples movements can only be understood by linking highly localized processes with larger global and historical forces The authors show that indigenous peoples have been resisting and adapting to encounters with states for millennia Unlike other antiglobalization activists indigenous peoples primarily seek autonomy and the right to determine their own processes of adaptation and change especially in relationship to their origin lands and community The authors link their analyses to current understandings of the evolution of globalization

Geopolitics of Globalization Romanovski Zephirin, 2023-10-24 The book shows that from the last two decades of the twentieth century and the end of the Cold War in 1991 a shift occurred in inter American geopolitics as the United States emerged as the dominant global structural power The post Cold War international relations and new geopolitics are predominantly driven by geoeconomic rationales and outclass the old Cold War geopolitics overwhelmingly dominated by state politics and security strategies The post Cold War geopolitics is largely tied to globalization as integrated flows laying out various interrelated social economic political and geographical networks in the Americas As a result the book states that the geopolitics of globalization sparks a geo sociology and politics of scales shaping political geography and internal external politics and policies through the causes and effects of free trade areas transnational migrations human settlement patterns ethnocultural and demographic changes city growth and urban governance challenges As well as discussing the issues of migration and cities the book merges territoriality geopolitics and globalization in the broader existing theoretical literature and analyzes the implications for the research community at large As such it appeals to students academics policy makers journalists activists and globalists looking for fresh thinking in the interplay of globalization and geopolitics in an era of global migration in global cities

Maritime Governance and Policy-Making Michael Roe,2012-07-20 A close analysis of the framework of existing governance and the existing jurisdictional arrangements for shipping and ports reveals that while policy making is characterized by national considerations through flags institutional representation at all jurisdictions and the inviolability of the state the commercial financial legal and operational environment of the sector is almost wholly global This governance mismatch means that in practice the maritime industry can avoid policies which it dislikes by trading nations off against one another while enjoying the freedoms and benefits of a globalized economy A Post modern interpretation of this globalized society prompts suggestions for change in maritime policy making so that the governance of the sector better matches more closely the environment in which shipping and ports operate Maritime Governance and Policy Making is a controversial commentary on the record of policy making in the maritime sector and assesses whether the reason for continued policy

Globalisation and the Challenge to Criminology Francis J. Pakes, 2013 There is no doubt that globalisation has profound effects on crime justice and our feelings of security identity and belonging Many of these affect both the making of laws and the breaking of laws It has been argued however that criminology has been too provincial focusing as it often does on national laws and issues whilst others have said that globalisation is the stuff of international relations global finance and trade not of criminology This book disputes this by asserting that criminology has a firm place in this arena and globalisation offers the discipline a challenge that it should relish Some of the field's top scholars from the UK

the US Canada Australia and New Zealand consider these challenges and present cutting edge analysis and debate Topics covered include transnational organised crime international policing and a range of other issues involving global harm such as genocide the workings of international financial institutions the fate of international migrants and the impact of anti immigration sentiments in Europe A particular focus is on borders and arrangements that deal with migration and populations that are excluded and adrift This book highlights criminology s analysis and engagement in new understandings of globalisation in particular its harmful and unethical manifestations and offers a mode of scrutiny and vigilance Globalisation and the Challenge to Criminology will be of particular interest to those studying criminology criminal justice policing security and international relations as well as those who seek to understand globalisation and in particular its harmful outcomes
