Governance in a Globalizing World Joseph S. Nye, John D. Donahue, 2000-11-01 A Brookings Institution Press and Visions of Governance for the 21st Century publication Far from being another short lived buzzword globalization refers to real changes These changes have profound impacts on culture economics security the environment and hence on the fundamental challenges of governance This book asks three fundamental questions How are patterns of globalization currently evolving How do these patterns affect governance And how might globalism itself be governed The first section maps the trajectory of globalization in several dimensions economic cultural environmental and political For example Graham Allison speculates about the impact on national and international security and William C Clark develops and evaluates the concepts of environmental globalization

The second section examines the impact of globalization on governance within individual nations including China struggling countries in the developing world and the industrialized democracies and includes Elaine Kamarck's assessment of global trends in public sector reform. The third section discusses efforts to improvise new approaches to governance including the role of non-governmental institutions, the global dimensions of information policy and Dani Rodrik's speculation on global economic governance.

Climate Action in a Globalizing World Carl Cassegard, Linda Soneryd, Hakan Thorn, Asa Wettergren, 2017-05-18. The existence and urgency of global climate change is a matter of scientific consensus. Yet the global politics of climate change have been anything but consensual. In this context a wave of global climate activism has emerged in the last decade in response to the perceived failure of the political negotiations. This book provides a unique comparative study of environmental movements in USA, Japan, Denmark and Sweden analyzing their interaction with the international climate institutions of the United Nations with national governments and with currents in the global climate movement. It documents how and why the movement evolved between the Copenhagen Summit of 2009 and the Paris Summit of 2015 altering its strategies and tactics while attracting new actors to the issue area. Further it demonstrates how the development of global environmental networks has increased contact between environmental movements in the Global North and those from the Global South resulting in the establishment of climate justice as a political cause and unifying frame for global climate activism.

Localizing Knowledge in a Globalizing World Ali Mirsepassi, Amrita Basu, Frederick Weaver, 2003-01-01. The essays in this collection address the current crisis in area studies, a crisis that differs from its perennial struggle with the established academic disciplines. This crisis stems from the confluence of three related circumstances: the end of the Cold War, greater economic and cultural fluidity across political borders and contradictory intellectual trends in the academy which include on the one hand a renaissance of universalizing thinking in the social sciences and on the other hand the rise of post-colonial studies and debates about modernity, postmodernity and cultural hybridization. Although the essays differ markedly in their focus and strategies, the authors all demonstrate that local knowledge, including serious study of individual cultures and proficiency in foreign languages which are vital to understanding rapidly changing global patterns and to countering universal claims by the social sciences. While the authors also agree that area studies must reject their ethnocentric heritages and adopt inventive new contours, they present a diversity.

Older Workers in a Globalizing World Dirk Hofäcker, 2010-01-01. The book can be recommended to all with an interest in the issue of older workers in a globalised world. Ageing and Society. Early retirement has been a policy to cope with the problems of massive unemployment in many Western welfare states. However it has become apparent that this strategy is costly and destroys human capital urgently needed in ageing societies. This book offers a comprehensive and up to date study of late career patterns and processes of early retirement in fourteen OECD countries using both cross sectional and longitudinal data. It is an important contribution to life course research and will provide the foundation for any serious

discussion on pension reforms and increasing the employability of older workers Hans J rgen Andre University of Cologne Germany This timely book investigates the growth of the early retirement trend and its varying spread among different groups of older workers in fourteen modern societies It argues for a differentiated political approach to reverse early retirement which relies on both pension and employability policies for older workers Examining the early retirement trend virtually all modern societies have been faced with since the onset of the globalization process in the 1970s and 1980s this book provides a thorough analysis of older workers late careers and their retirement transitions as well as explaining why this trend has developed differently between nations To promote an effective reversal of the early retirement trend national policymakers are advised not to concentrate their efforts exclusively on reducing the financial incentives for an early exit still present in most national pension systems In addition it is also recommended that they invest in the employability of older workers implying a thorough reconsideration of the design of education and labor market policies Dirk Hof cker presents a unique and comprehensive synthesis of theories describing and explaining the trend towards early retirement and critically discusses their comparative advantages and shortcomings Researchers and students of sociology economics gerontology demography and comparative welfare states should not be without this book and policymakers and practitioners dealing with labor market policies will find it invaluable
