Borgerding, 2018-06-21 This edited book provides a global view on evolution education. It describes the state of evolution education in different countries that are representative of geographical regions around the globe such as Eastern Europe, Western Europe, North Africa, South Africa, North America, South America, Middle East, Far East, South East Asia, Australia, and New Zealand. Studies in evolution education literature can be divided into three main categories: a) understanding the interrelationships among cognitive, affective, epistemological, and religious factors that are related to people's views about evolution; b) designing/implementing/evaluating evolution education curriculum that reflects contemporary evolution understanding; and c) reducing antievolutionary attitudes. This volume systematically summarizes the evolution education literature across these three categories for each country or geographical region. The individual chapters thus include common elements that facilitate a cross-cultural meta-analysis. Written for a primarily academic audience, this book provides a much-needed common background for future evolution education research across the globe. **Dear GLOBE Teachers: Globe Program, Teacher's Guide, Globe, 1997 Supplement**, 1997 GLOBE Offline, 1997 **Current Literature**, 1909 *Current Opinion*, 1909 *Current Literature* Edward Jewitt Wheeler, Frank Crane, 1909 Globe Biology Teacher's Resource Book Globe Fearon, 1999-01-01 The United States Catalog Mary Burnham, Carol Hurd, 1928 McGill University Publications McGill University, 1917 Bionomical Leaflets McGill University. Peter Redpath Museum, 1917 **SARS-CoV-2 Origin and COVID-19 Pandemic Across the Globe** Vijay Kumar, 2021-12-01 The current COVID-19 pandemic has infected more than 219 million people and killed more than 4.5 million people worldwide. It has also impacted the socioeconomic status of affected countries and led to the fastest development of vaccines in history. Over seven sections and seventeen chapters, this book comprehensively reviews numerous aspects of COVID-19, including epidemiology, zoonosis, drug development, telehealth, the effects of the virus on healthcare workers, the importance of architecture and urbanism in preventing future pandemics, and much more. **The Nature of Race** Ann Morning, 2011-06-24 Includes bibliographical references p. 279-303 and index. **International Handbook on Geographical Education** Rod Gerber, 2013-03-09 I am very pleased to have been asked by Rod Gerber to provide a preface to such a book. Not least because of the twenty-four chapters, eight are written by former students or colleagues with whom I have worked in the past and whom I still meet at conferences on geographical education. It is with a certain pride and joy that I note the progress which has been made in geographical education both in its day-to-day teaching and in research in the twenty years following the end of my term of office as Chair of the Commission on Geographical Education of the International Geographical Union (CGEIUG). My successors Joe Stoltman, Hartwig Haubrich, Rod

Gerber and now Lea Houtsonen have done much and are continuing to work hard to foster the development of geographical education. This book is proof if proof were needed that the international collaboration in this field is alive and well with contributions coming from all the continents except Antarctica. It would be a moribund subject that remained unaffected in one way or another by developments on the great world stage as Fairgrieve 1926 would have put it. And as Rod Gerber shows the issues of globalisation of cultural encounters of differing value systems of new technologies of variable economic development and of environmental quality all feature as topics which influence and are influenced by geographical education.
