Globes From The Western World:

Globes from the Western World Elly Dekker,1993 **The Most Magnificent and Largest Globes of Blaeu, the World's Greatest Globe Maker** Peter C.J. van der Krogt,2022-07-04 Matching pair of terrestrial and celestial globes with a diameter of 26 inches 68 cm with text in Latin The terrestrial globe is composed of 36 half gores and two polar calottes the celestial globe of 24 ecliptical gores The gores are pasted on a plaster sphere rotating on brass pinions within a brass meridian ring incised with a graduated scale Each globe is set into a matching seventeenth century Dutch wooden base with a small wooden compass box mounted on the base plate and with the horizon ring covered scales almanac and calendar etc engraved on paper and handcoloured as originally issued Salescatalogue *Globes* Sylvia Sumira,2014-05-01 The concept of the earth as a sphere has been around for centuries emerging around the time of Pythagoras in the sixth century BC and eventually becoming dominant as other thinkers of the ancient world including Plato and Aristotle accepted the idea The first record of an actual globe being made is found in verse written by the poet Aratus of Soli who describes a celestial sphere of the stars by Greek astronomer Eudoxus of Cnidus ca 408 355 BC The oldest surviving globe a celestial globe held up by Atlas s shoulders dates back to 150 AD but in the West globes were not made again for about a thousand years It was not until the fifteenth century that terrestrial globes gained importance culminating when German geographer Martin Behaim created what is thought to be the oldest surviving terrestrial globe In *Globes 400 Years of Exploration Navigation and Power* Sylvia Sumira beginning with Behaim s globe offers a authoritative and striking illustrated history of the subsequent four hundred years of globe making Showcasing the impressive collection of globes held by the British Library Sumira traces the inception and progression of globes during the period in which they were most widely used from the late fifteenth century to the late nineteenth century shedding light on their purpose function influence and manufacture as well as the cartographers printers and instrument makers who created them She takes readers on a chronological journey around the world to examine a wide variety of globes from those of the Renaissance that demonstrated a renewed interest in classical thinkers to those of James Wilson the first successful commercial globe maker in America to those mass produced in Boston and New York beginning in the 1800s Along the way Sumira not only details the historical significance of each globe but also pays special attention to their materials and methods of manufacture and how these evolved over the centuries A stunning and accessible guide to one of the great tools of human exploration *Globes* will appeal to historians collectors and anyone who has ever examined this classroom accessory and wondered when why and how they came to be made *Globes of the Western World* Elly Dekker,Arthur Middleton,Peter Van Der Krogt,1993-11-01 **Bioethics Around the Globe** Catherine Myser,2011-06-10 Contemporary bioethics now roughly 40 years old as a discipline originated in the United States with a primarily Anglo American cultural ethos It continues to be professionalized and institutionalized as a maturing discipline at the intersections of philosophy medicine law social sciences and humanities Increasingly bioethics along with its foundational values concepts

and principals has been exported to other countries not only in the developed West but also in developing and or Eastern countries Bioethics thus continues to undergo intriguing transformations as it is globalized and adapted to local cultures These processes have occurred rapidly in the last two decades with relatively little reflection and examination This volume brings together contributors from a wide variety of disciplines to take a critical empirical look at bioethics around the globe examining how it is being transformed at both local and global levels in this process of cross cultural exporting and importing One concern is to identify sociocultural forces and consequences which may positively or negatively affect ethics and social justice goals This book thereby offers the first comparative anthropology and sociology of globalizing bioethics in the field exploring the global dissemination local adaptations cultural meanings and social functions of bioethics theories practices and institutions and comparing developed and developing countries The volume considers a full range of countries on every inhabited continent including Africa Asia Australia Central and South America Europe the Middle East and North America Topics include government agendas such as nationalism and nation building agendas of powerful associated professions e g medicine law theological and political agendas such as culture wars agendas of entrepreneurial economies of profit and other cultural and ideological agendas consciously or unconsciously advanced or contested by bioethics work in particular countries based on their unique history politics and culture This cross cultural exploration of globalizing bioethics will be of great interest to a field that is increasingly introspective about its underlying sociocultural assumptions and biases At last an unabashedly sociological and anthropological look at the globalization of bioethics a really fresh approach to a maturing discipline The chapters speak from the perspective of sophisticated Western developed exporters of the bioethical paradigm and equally sophisticated Eastern developing and third world and interdisciplinary critics suspicious of the canonical view Trained in the dominant school of American mainstream philosophy Myser draws on her long standing commitment to a social and cultural approach to bioethics to take a fresh look at bioethics globally She grasps the globalization of bioethics and the skepticism about analytical philosophy s Americanized consensus The book sets the stage for a new era in bioethics theory and practice debating whether a universal common morality underlies the rich variation in national and cultural bioethics traditions Robert Veatch Georgetown University This path breaking volume is the first to explore the global export of Western bioethics to a variety of non Western settings Explicitly critical the book also points to the liberating potential of bioethics to achieve social justice and improve the lives of patients around the world The book is a must read for all medical anthropologists interested in bioethics Marcia Inhorn Yale University Bioethics Around the Globe should change the way bioethics is conceived and practiced in the U S and elsewhere Its rich and wide ranging comparative examination opens new possibilities for bioethical reflection I enthusiastically recommend this wonderful book James F Childress University of Virginia The past 40 years have seen a remarkable spread of bioethics to every part of the world Dr Myser s collection is a wonderful and rich exploration of its international impact revealing important similarities and differences from country to

country It will have an important impact Daniel Callahan The Hastings Center **The Congressional Globe** United States. Congress,1872 **The Spatial Reformation** Michael J. Sauter,2019-01-11 In The Spatial Reformation Michael J Sauter offers a sweeping history of the way Europeans conceived of three dimensional space including the relationship between Earth and the heavens between 1350 and 1850 He argues that this spatial reformation provoked a reorganization of knowledge in the West that was arguably as important as the religious Reformation Notably it had its own sacred text which proved as central and was as ubiquitously embraced Euclid s Elements Aside from the Bible no other work was so frequently reproduced in the early modern era According to Sauter its penetration and suffusion throughout European thought and experience call for a deliberate reconsideration not only of what constitutes the intellectual foundation of the early modern era but also of its temporal range The Spatial Reformation contends that space is a human construct that is it is a concept that arises from the human imagination and gets expressed physically in texts and material objects Sauter begins his examination by demonstrating how Euclidean geometry when it was applied fully to the cosmos estranged God from man enabling the breakthrough to heliocentrism and by extension the discovery of the New World Subsequent chapters provide detailed analyses of the construction of celestial and terrestrial globes Albrecht Dürer s engraving Melencolia the secularization of the natural history of the earth and man and Hobbes s rejection of Euclid s sense of space and its effect on his political theory Sauter s exploration culminates in the formation of a new anthropology in the eighteenth century that situated humanity in reference to spaces and places that human eyes had not actually seen The Spatial Reformation illustrates how these disparate advancements can be viewed as resulting expressly from early modernity s embrace of Euclidean geometry *The Da Vinci Globe* Stefaan Missinne,2019-01-17 A chance discovery at a distinguished London map fair in 2012 by a Belgian globe collector produced the most unique of finds a distinct globe with mysterious images such as old ships sailors a volcano a hybrid monster pentimenti waving patterns conic individualised mountains curving rivers vigorous coastal lines chiaroscuro and an unresolved triangular anagram which remains an enigma The globe is hand engraved in great detail on ostrich egg shells from Pavia by a left handed Renaissance genius of unquestionable quality It shows secret knowledge of the map world from the time of Columbus Cabral Amerigo Vespucci and Leonardo da Vinci Central and North America are covered by a vast ocean The da Vinci globe originates from Florence and dates from 1504 It marks the first time ever that the names of countries such as Brazil Germania Arabia and Judea have appeared on a globe A Leonardo drawing for this globe showing the coast of the New World and Africa has been discovered in the British Library This book brings the reader through a fabulous journey of scholars maps riddles rebuses iconographic symbols and enigmatic phrases such as HIC SVNT DRACONES to illuminate the da Vinci globe It details 500 years of mystery fine scholarship and expert forensic testing at numerous material science laboratories the world over The da Vinci globe now takes its rightful place surpassing the Lenox globe its copper cast identical twin as the most mysterious globe of our time As such this
