Glossary of Astronomy and Astrophysics Jeanne Hopkins, **Glossary of Astronomy and Astrophysics**, **English-Russian-English** J. Hopkins, 1980-01-01 **Glossary of Astronomy and Astrophysics Astrophysical Journal** Jeanne Hopkins, 1980 **History of Shock Waves, Explosions and Impact** Peter O. K. Krehl, 2008-09-24 This unique and encyclopedic reference work describes the evolution of the physics of modern shock wave and detonation from the earlier and classical percussion The history of this complex process is first reviewed in a general survey Subsequently the subject is treated in more detail and the book is richly illustrated in the form of a picture gallery This book is ideal for everyone professionally interested in shock wave phenomena *A Dictionary of the Space Age* Paul Dickson, 2009-04-14 The launch of Sputnik 1 in 1957 ushered in an exciting era of scientific and technological advancement As television news anchors radio hosts and journalists reported the happenings of the American and the Soviet space programs to millions of captivated citizens words that belonged to the worlds of science aviation and science fiction suddenly became part of the colloquial language What's more NASA used a litany of acronyms in much of its official correspondence in an effort to transmit as much information in as little time as possible To translate this peculiar vocabulary Paul Dickson has compiled the curious lingo and mystifying acronyms of NASA in an accessible dictionary of the names words and phrases of the Space Age This dictionary captures a broader foundation for the language of the Space Age based on the historical principles employed by the Oxford English Dictionary and Webster's Third New International Dictionary Word histories for major terms are detailed in a conversational tone and technical terms are deciphered for the interested student and lay reader This is a must own reference for space history buffs Book Jacket **Origin and Evolution of Planetary and Satellite Atmospheres** Sushil K. Atreya, J. B. Pollack, Mildred Shapley Matthews, 1989-05-01 An integrated discussion of the similarities and differences between the atmospheres of various bodies of the solar system including the Earth **Doing Library Research** Robert K. Baker, 2019-03-13 Many college students remain puzzled by card catalogs can't find books they need and fail to use many of the important resources of the library despite tours explanations and much assistance from librarians In this book a community college librarian provides the direction students need to utilize the resources typically found in a community college *National Bureau of Standards Miscellaneous Publication*, 1952 *American Reference Books Annual*, 1979 1970 issued in 2 vols v 1 General reference social sciences history economics business v 2 Fine arts humanities science and engineering *Foreign-language and English Dictionaries in the Physical Sciences and Engineering* Tibor W. Marton, 1964 The bibliography lists over 2800 unilingual bilingual and polyglot dictionaries glossaries and encyclopedias in the physical sciences engineering and technology published during the past twelve years The majority of the titles cited have English as the source or target language or are dictionaries giving definitions in English The bibliographic entries are arranged in 49 subject classes within each subject the entries are listed alphabetically by language and within each language group by

author Forty seven foreign languages are represented in the compilation Lists of abbreviations and reference sources and detailed author language and subject indexes complement the publication Author *Index to American Reference Books Annual* ,1980 **Mars** Hugh H. Kieffer,Bruce M. Jakosky,Conway W. Snyder,Mildred Shapley Matthews,2018-01-30 The planet Mars has been a subject of wonder for millennia as attested by its place in mythology by later speculation about its canals and by the scientific and public excitement over the Viking mission Although the scientific literature about the planet is voluminous no comprehensive treatment of the results of modern spacecraft exploration has yet been made available This volume fills that gap by providing a summary of what is presently known about Mars and identifying many puzzles such as polar cap variance occurrence of dust storms and the possible location of water The introductory chapter cites questions controversies and milestones in the study of Mars and also includes an annotated book list basic data about the planet and a guide to Martian seasons A chapter on telescopic observation credits the contributions made by many amateurs that have advanced our knowledge of variations observed on Mars A chapter on spacecraft exploration by an American and a Russian author who have participated in all Mars missions includes a revelation of an additional Soviet attempt Twenty nine technical articles cover geophysics bedrock geology surface atmosphere exosphere and magnetic field and climate history Two chapters address the search for life on Mars three concluding chapters consider the Martian satellites An indispensable reference for scientists Mars will also serve as a complete sourcebook for serious amateur astronomers **Solar Planetary Systems** Asit B. Bhattacharya,Jeffrey M. Lichtman,2016-11-25 The authors have put forth great efforts in gathering present day knowledge about different objects within our solar system and universe This book features the most current information on the subject with information acquired from noted scientists in this area The main objective is to convey the importance of the subject and provide detailed information on the physical makeup of our planetary system and technologies used for research Information on educational projects has also been included in the Radio Astronomy chapters This information is a real plus for students and educators considering a career in Planetary Science or for increasing their knowledge about our planetary system *NBS Special Publication* ,1964 Neptune and Triton Dale P. Cruikshank,Mildred Shapley Matthews,A. M. Schumann,1995-11 The first reconnaissance of all the major planets of the Solar System culminated in the Voyager 2 encounter with Neptune in August 1989 Neptune itself was revealed as a planet with gigantic active storms in its atmosphere and off center magnetic field and a system of tenuous lumpy rings Whereas only two satellites were known prior to the encounter Voyager discovered six more Triton the largest satellite was revealed as a frozen icy world with clouds and layers of haze and with vertical plumes of particles reaching five miles into the thin atmosphere This latest Space Science Series volume presents the current level of understanding of Neptune its rings and its satellites derived from the data received from the Voyager The book s chapters are written by the world s leading authorities on various aspects of the Neptune system and are based on papers presented at an international conference held in January 1992 Covering details of

Neptune's interior atmosphere, rings, magnetic fields, and near space environment as well as the small satellites and the remarkable moon Triton. This volume is a unique resource for planetary scientists and astronomers requiring a comprehensive analysis of Neptune viewed in the context of our knowledge of the other giant planets. Until another spacecraft is sent to Neptune, Neptune and Triton will stand as the basic reference on the planet.

Walford's Guide to Reference Material: Science and technology Albert John Walford, 1993. Cette bibliographie commentée touche tous les domaines du savoir humain soit de l'Art à la Zoologie, elle signale les ouvrages les plus importants soit des bibliographies, des index, des encyclopédies, des dictionnaires, des guides, des revues, etc. dont le support d'information est soit du papier, soit un CD-ROM, soit une base de données en ligne, directe, soit un microforme, etc. L'objectif du guide Walford est de devenir la source d'information sur tout type de référence, nonobstant le support technique.

A Companion to Astronomy and Astrophysics Kenneth R. Lang, 2007-01-15. Astronomy and Astrophysics is a comprehensive fundamental up to date reference book. It is filled with vital information and basic facts for amateur astronomers and professional astrophysicists and for anyone interested in the Universe from the Earth and other planets to the stars, galaxies, and beyond. Although serious and thorough, the language and ideas will attract the general reader as well as students and professionals. Astronomy and Astrophysics consists of two main parts: a Timeline and a Dictionary. The Timeline is a concise history arranged chronologically which provides the complete story of cosmic discovery from early Chinese and Greek astronomy to the latest findings of modern astrophysics and robotic spacecraft. It provides a sense of destination and flow in our growing awareness of the Universe. Each entry in the unfolding narrative is written in a concise, light, and friendly style that will be appreciated by all without being weighted down with incomprehensible specialized terms. The story of science is one of individuals as well as discoveries and ideas. So our Timeline includes the people who have made major scientific contributions that are related to astronomy and astrophysics. The Dictionary defines all terms and acronyms that deal with our celestial science from important concepts to individual objects and space missions. It is arranged alphabetically and complemented by numerous tables of fundamental data for bright cosmic objects including the celestial coordinates required to observe them. Line drawings are also used to forcefully compact a scientific insight with clear labels and captions. An exceptionally thorough Index cross-references concepts, discoveries, and individuals in both the Timeline and Dictionary. The combined result is a unique comprehensive stand-alone reference volume in which the reader can quickly locate information while also discovering new and unexpected knowledge.

Index to American Reference Books Annual, 1980-1984 Ruth Blackmore, 1984. 1970 issued in 2 vols. v. 1 General reference, social sciences, history, economics, business. v. 2 Fine arts, humanities, science and engineering.
