RF Glow Discharge Production of Hydrogenated Amorphous Silicon Jennifer Ann Hyman, 1987 *Glow-Discharge Hydrogenated Amorphous Silicon* K. Tanaka, 1989-11-30 A graduate level description of recent Japanese research on the chemistry of amorphous silicon film deposition associated with plasma CVD a step in producing amorphous semiconductors Reports on studies of microscopic processes of gas phase reaction as well as chemical reactions on the film growth **SERI Photovoltaic Advanced Research and Development Bibliography, 1982-1985**, 1986 **A Structural and Spectroscopic Study of Glow-discharge Hydrogenated Amorphous Silicon** I. Catalytic Chemical Vapor Deposition Hideki Matsumura, Hironobu Umemoto, Karen K. Gleason, Ruud E.I. Schropp, 2019-08-05 The authoritative reference on catalytic chemical vapor deposition written by the inventor of the technology This comprehensive book covers a wide scope of Cat CVD and related technologies from the fundamentals to the many applications including the design of a Cat CVD apparatus Featuring contributions from four senior leaders in the field including the father of catalytic chemical vapor deposition it also introduces some of the techniques used in the observation of Cat CVD related phenomena so that readers can understand the concepts of such techniques Catalytic Chemical Vapor Deposition Technology and Applications of Cat CVD begins by reviewing the analytical tools for elucidating the chemical reactions in Cat CVD such as laser induced fluorescence and deep ultra violet absorption and explains in detail the underlying physics and chemistry of the Cat CVD technology Subsequently it provides an overview of the synthesis and properties of Cat CVD prepared inorganic and organic thin films The last parts of this unique book are devoted to the design and operation of Cat CVD apparatuses and the applications Provides coherent coverage of the fundamentals and applications of catalytic chemical vapor deposition Cat CVD Assembles in one place the state of the art of this rapidly growing field

allowing new researchers to get an overview that is difficult to obtain solely from journal articles Presents comparisons of different Cat CVD methods which are usually not found in research papers Bridges academic and industrial research showing how CVD can be scaled up from the lab to large scale industrial utilization in the high tech industry Catalytic Chemical Vapor Deposition Technology and Applications is an excellent one stop resource for researchers and engineers working on or entering the field of Cat CVD Hot Wire CVD iCVD and related technologies Hydrogen in Semiconductors M. Stutzmann,J. Chevallier,2012-12-02 Hydrogen on semiconductor surfaces has been an area of considerable activity over the last two decades Structural thermal and dynamical properties of hydrogen chemisorbed on crystalline silicon and other semiconductors have been studied in great detail These properties serve as a reference for related but more complex systems such as hydrogen at multiple vacancies in crystalline semiconductors or at microvoids in amorphous samples Interesting from a surface physics point of view is the fact that hydrogen as a monovalent element is an ideal terminator for unsaturated bonds on surfaces and therefore tends to have a large influence on surface reconstruction A related phenomenon with large technological impact for example in low cost solar cells is the passivation of grain boundaries in microcrystalline semiconductors Finally hydrogenated semiconductor surfaces always appear as a boundary layer during low energy hydrogenation of bulk semiconductors so that a complete description of hydrogen uptake or desorption necessarily has to take these surfaces into account This collection of invited and contributed papers has been carefully balanced to deal with amorphous and crystalline semiconductors and surfaces and presents basic and experimental work basic and applied as well as theory The resulting volume presents a summary of the state of the art in the field of hydrogen in semiconductors and will hopefully stimulate future work in this area **Semiconductors and Semimetals** ,1984-12-20 Semiconductors and Semimetals **Semiconductors and Semimetals: Device applications** Jacques I. Pankove,1984 *Japanese Science and Technology*, 1983-1984 United States. National Aeronautics and Space Administration. Scientific and Technical Information Branch,1985 **Thin-Film Transistors** Cherie R. Kagan,Paul Andry,2003-02-25 This is a single source treatment of developments in TFT production from international specialists It interweaves overlapping areas in multiple disciplines pertinent to transistor fabrication and explores the killer application of amorphous silicon transistors in active matrix liquid crystal displays It evaluates the preparation of polycrystalline **Tenth E.C. Photovoltaic Solar Energy Conference** A. Luque,G. Sala,Willeke Palz,G. dos Santos,P. Helm,2012-12-06 I have great pleasure in presenting the Proceedings of the 10th European Photovoltaic Solar Energy Conference held in Lisbon from 8 to 12 April 1991 These Proceedings contain all the scientific papers delivered at the Conference The following is a short summary of the Conference activities The Conference was opened by the Minister of Industry and Energy of Portugal Eng Luis Mira do Amaral At the opening ceremony the Becquerel Prize created by the Commission of the European Communities was awarded to Professor Werner Bloss of the University of Stuttgart and presented by Professor Philippe Bourdeau Director at the Directorate General

for Science Research and Development The Becquerelle delivered by Professor Bloss constituted the scientific opening to the conference About 760 delegates from 53 countries presented around 350 contributions 50 of them as plenary lectures the contributions were selected among the many papers submitted this time more strictly than ever before Also a selected group of scientists were invited to deliver 15 review lectures to provide an adequate context to the contributions to the Conference A Symposium on Photovoltaics in Developing Countries which was very well attended took place as a parallel event The Symposium provided an opportunity to hear not only experts of the industrialized countries but also speakers from the countries where photovoltaics provides services of paramount value

Infrared Characterization for

Microelectronics W. S. Lau, 1999 Most of the books on infrared characterization are for applications in chemistry and no book has been dedicated to infrared characterization for microelectronics The focus of the book will be on practical applications useful to the production line and to the research and development of microelectronics The background knowledge and significance of doing a particular type of infrared measurement will be discussed in detail The principal purpose of the book is to serve as a useful handbook for practising engineers and scientists in the field of microelectronics
