## God And Space Time:

Decoding Spacetime Eric Carlson, 2010-11-08 This is a book about science religion and being yours and mine The study of being is called Ontology Our culture is dominated by a naturalist ontology The question is does ontology include a supernatural component Or is that idea a relic of our primeval past sort of like appendix and adenoids parts that can be excised from the body of our belief system The author argues for the primacy of the transcendent supernatural ontology by means of two books the book of nature and the book of transcendency the Bible each containing its own portion of the evidence Mr Carlson argues for the following The universe represents a small portion of Gods ontology a small reality devoted to redemption The signet of redemption is the number 7 its appearance within chronology is deliberate instructive and compelling The Creation Week account reflects a two fold metaphor 1 space time itself was created to support the redemptive act and 2 mankinds history will unfold in a series of seven ages later quantified as millennia The interval between Adam and Abraham literally filled one redemptive bi millennium but the catastrophic effects of 3 realities the Cainite civilization Noah and the break up of Pangaea contribute to the appearance of myth as viewed by the uniformitarian geologist for whom catastrophes appear invisible The 2nd bi millennium Abraham to Messiah was also fulfilled exactly in redemptive time The termination of our age is imminent and dependent upon the chronology of Israel mankinds chronograph A detailed chronology of the history of Israel is flavored with the redemptive signet especially 70 yrs or 70 heptads of yrs By decoding Israels history in redemptive time and employing the single concept of the favor of God the author derives a Biblical based proof that modern Israel is the same and identical state founded by Samuel in 1096 BC Three independent proofs of this foundational date are provided These proofs show that the Monarchy existed for exactly 511 yrs which period is exactly equal to 73 heptads Israel is an heptadic state The author concludes that the redemptive corollary to Israels ontology is also proven we have actually entered the end times and the events associated with the last days will soon unfold Because the reality of Israel is visible to all it is apparent that the redemptive offer made to mankind is also real and visible such as that appearing in John 3 16 John 6 40 and Romans 10 9 13 There is much to learn about our world Start now Tomorrow may be too late

*Space, Time, and Stuff* Frank Arntzenius, Cian Seán Dorr, 2012-01-19 Frank Arntzenius presents a series of radical ideas about the structure of space and time and establishes a new metaphysical position which holds that the fundamental structure of the physical world is purely geometrical structure He argues that we should broaden our conceptual horizons and accept that spaces other than spacetime may exist

**Thomas F. Torrance's Theology of the Ascension** Stavan Narendra John, 2025-05-29 The ascension is a crucial doctrine integrally related to the incarnation When it is underemphasized it results in an impoverishment of our theology of Christ the church human beings and eschatology T F Torrance s theology offers a compelling vision and holistic doctrine of the ascension that notwithstanding its flaws deserves a careful and detailed examination Torrance develops a holistic account of the ascension by considering the ontology spatiality

and present ministry of the ascended Jesus What results is a theological construction that affirms the ascended body of Christ and understands the Lord to be currently serving as our human representative in a ministry of priestly intercession prophetic declaration and ascended kingship Torrance is able to do this without succumbing to literalism space travel demythologization metaphorical reading or Pelagianism human effort based sanctification and glorification This book interprets and then develops Torrance s theology of the ascension in critical dialogue with contemporary theological interlocutors

**The Ontology of Spacetime** ,2006-07-10 This book contains selected papers from the First International Conference on the Ontology of Spacetime Its fourteen chapters address two main questions first what is the current status of the substantivalism relationalism debate and second what about the prospects of presentism and becoming within present day physics and its philosophy The overall tenor of the four chapters of the book s first part is that the prospects of spacetime substantivalism are bleak although different possible positions remain with respect to the ontological status of spacetime Part II and Part III of the book are devoted to presentism eternalism and becoming from two different perspectives In the six chapters of Part II it is argued in different ways that relativity theory does not have essential consequences for these issues It certainly is true that the structure of time is different according to relativity theory from the one in classical theory But that does not mean that a decision is forced between presentism and eternalism or that becoming has proved to be an impossible concept It may even be asked whether presentism and eternalism really offer different ontological perspectives at all The writers of the last four chapters in Part III disagree They argue that relativity theory is incompatible with becoming and presentism Several of them come up with proposals to go beyond relativity in order to restore the prospects of presentism Space and time in present day physics and philosophy Introduction from scratch of the debates surrounding time Broad spectrum of approaches coherently represented

**Sexual Subversions** Elizabeth Grosz,2020-09-02 Sexual Subversions introduces the works of three well known if not well read French feminists Julia Kristeva Luce Irigaray and Mieke Le Doeuff It provides a map of an area where there are few detailed discussion of the achievements of these difficult yet immensely rewarding writers In doing so this overview raises issues of general relevance to feminist research it participates in debates around the nature of feminist theory the relations feminist intellectuals have to male dominated knowledges and the strategies appropriate for developing non patriarchal autonomous or woman centred knowledges No book in French feminism would be complete without including the contributions of Kristeva and Irigaray The inclusion of Le Doeuff s work which brings a different perspective to bear on the question of sexual difference provides a counterbalance to literary appropriations of French feminism by Anglo American readerships Kristeva Irigaray and Le Doeuff are the focal points of this study precisely because each highlights the differences of the others revealing the frameworks to which the others are committed Nevertheless while these writers do not present a common political or theoretical position or form a school each addresses the question of women s autonomy from male definition affirms the sexual specificity of women seeks out a

femininity women can use to question the patriarchal norms and ideals of femininity and rejects the preordained positions patriarchy allots to women     **The Tenseless Theory of Time** W.L. Craig,2013-03-09 he present book and its companion volume *The Tensed Theory of Time a T Critical Examination* are an attempt to adjudicate what one recent discussant has called the most fundamental question in the philosophy of time namely whether a static or a dynamic conception of the world is correct I had originally intended to treat this question in the space of a single volume but the study swelled into two I found that an adequate appraisal of these two competing theories of time requires a wide ranging discussion of issues in metaphysics philosophy of language phenomenology philosophy of science philosophy of space and time and even philosophy of religion and that this simply could not be done in one volume If these volumes succeed in making a contribution to the debate it will be precisely because of the synoptic nature of the discussion therein Too often the question of the nature of time has been prematurely answered by some philosopher or physicist simply because he is largely ignorant of relevant discussions outside his chosen field of expertise In these two complementary but independent volumes I have attempted to appraise what I take to be the most important arguments drawn from a variety of fields for and against each theory of time

*A Theology of the Third Article* Aaron T. Smith,2014 Acknowledgments Introduction The Spirit of Objectivity and Subjectivity The Spirit of Reality and Possibility The Spirit of Truth and Time The Spirit of Being and Becoming The Spirit of Election and Obedience Conclusion Index of Names Index of Subjects     *Ford's The Modern Theologians* Rachel Muers,Ashley Cocksworth,2024-02-21 Captures the multiple voices of Christian theology in a diverse and interconnected world through in depth studies of representative figures and overviews of key movements Providing an unparalleled overview of the subject *The Modern Theologians* provides an indispensable guide to the diverse approaches and perspectives within Christian theology from the early twentieth century to the present Each chapter is written by a leading scholar and explores the development and trajectory of modern theology while presenting critical accounts of a broad range of relevant topics and representative thinkers The fourth edition of *The Modern Theologians* is fully updated to provide readers with a clear picture of the broad spectrum and core concerns of modern Christian theology worldwide It offers new perspectives on key twentieth century figures and movements from different geographical and ecclesial contexts There are expanded sections on theological dialogue with non Christian traditions and on Christian theology's engagement with the arts and sciences A new section explores theological responses to urgent global challenges such as nationalism racism and the environmental crisis Providing the next generation of theologians with the tools needed to take theological conversations forward *The Modern Theologians* Explores Christian theology's engagement with multiple ways of knowing across diverse approaches and traditions Combines introductions to key modern theologians and coverage of the major movements within contemporary theology Identifies common dynamics found across theologies to enable cross contextual comparisons Positions individual theologians in geographical regions trans local movements and ecclesial contexts Features new and revised chapters written

**The Immortal Self** Richard Wilde,2010 The Immortal Self traces historical ideas of the self as developed by philosophers theologians neurophysiologists and scientists It includes explanations of quantum mechanics and Einstein s theory of relativity that are readable and understandable by the layperson It considers what science presently is capable of contributing to our many diverse concepts of what constitutes the self To this end The Immortal Self explores the brain its morphology and operation explores our concepts of time and looks at the metaphysical concepts of quantum physics The book also considers the paleontological and genetic evidence for the self Ideas of the self extend into the mists of human history and have been handed down through the ancient Greek philosophers and through the religious prophets and philosophers These ideas are collected and presented in an unbiased account for consideration by the reader Finally an empirical search for the self is suggested About the Author Richard E Wilde is Professor Emeritus of chemistry and biochemistry at Texas Tech University He is a member of the American Chemical Society and the American Physical Society He has published extensively in the areas of chemical physics and molecular spectroscopy He is author of The Many Faces of Jesus and co author with Surjit Singh of Statistical Mechanics Fundamentals and Modern Applications

**Café Theology** Michael Lloyd,2018-05-03 If theology doesn t stretch our minds it probably won t stretch our lives In Café Theology Michael Lloyd invites us to travel on a journey from Creation to New Creation visiting the Fall the Incarnation Resurrection and Ascension and stopping off at the Trinity and the Church Michael s inimitable gift for mixing insightful theology with unflinching honesty and a fantastic sense of humour offers an enriching view of life and the Life Giver You don t have to be a professor to understand this book it s written for anyone who wants to explore theology more deeply with a study guide to help think through each topic Readers will be refreshed and encouraged as this distinctive book makes theology applicable to our ordinary lives

**God'S Universe in Four Dimensions** Les Burgess,2011-03-21 Gods Universe in Four Dimensions examines several subjects such as economics and the cause of the unemployment problem from a point of view that is a blend of science and philosophy Author Les Burgesss controversial stances may upset some people but his belief is that is better to present the truth as he has interpreted than to perpetuate untruths that could lead to misery and destruction Burgess emphatically supports the Christian faith and he hopes to convert all potential Christians by explaining how God and religion works and why some people believe and others not He further explores the various ideas and concepts below Spherical space time explained A globular map of the universe Distorted view of the universe Why the universe is

everlasting Complete theory of Einsteins four dimensions The speed of light and curved space time How the cosmic horizon works in four dimensions Progression of time and motion Understanding the Holy Trinity doctrine The justification of God and the Cross The complementary state of the logic of nature and God Metaphysics and miracles Theory of interaction of culture and religion but only one God New economic recovery and control strategy Gods Universe in Four Dimensions offers a solution to every problem Logic is universal      *Toward a Priestly Christology* Adriani Milli Rodrigues, 2018-11-02 *Toward a Priestly Christology* is a constructive theology on the person and work of Christ from the standpoint of a systematic thinking about his priesthood This priesthood is usually discussed in biblical scholarship on the Christology of Hebrews and also explored in historical or systematic theology with its connections with soteriology and ecclesiology However there is a scarcity of studies that attempt to systematize this topic in its basic components and their ontological foundations in order to provide conceptual clarity for a constructive discussion of the priestly Christology in systematic theology The book makes a contribution to this discussion by engaging firstly with the main models of Christ s priesthood in Christian theology and then with a theological reading of the letter to the Hebrews In both steps the author conceptually articulates the priesthood in terms of need agent actions and goal Then he observes the conceptual articulation from the macro hermeneutical point of view of ontology especially noticing how assumptions on time and space impact the internal logic of Christ s priesthood By using existing models of this priesthood as heuristic tools for systematic thinking the work attempts to push Christian theology toward a more dynamic understanding of Christ s priesthood especially regarding the relationship between the ascended Christ and our Christian life      **Predestination and Free Will** Omer Atilla Ergi, 2025-07-01 The concepts of predestination and free will have been and continue to be two of the most difficult problems of classical and contemporary theology and philosophy The debate on the perplexing coexistence of predestination and free will has been the focal point of discourse among theologians and philosophers since antiquity The deliberations on determinism also played an important role in the formation of Islamic theology as the creedal statements of Islamic doctrines define belief in predestination as one of the essential articles of creed while asserting that human agents possess some form of will defined as *irada al juz iyya* the minor will in the Arabic lexicon Evidently the creed of mainstream Islam necessitates that the two concepts are reconciled or at least a conceivable argument is provided to support the notion that predestination could indeed coexist with free will Arguments for coexistence constructed on scriptural revelation and Prophetic tradition were proposed by various Muslim theologians from the formative period to contemporary times during which several theological schools emerged due to a number of significant differences in views This book is primarily based on an examination and analysis of the theological arguments proposed by mainstream Islamic theologians and Fethullah G len a contemporary Muslim scholar and his theoretical framework on the reconciliation of predestination and free will The methodology of this project includes comparative and detailed analysis of arguments put forward by formative classical and contemporary Islamic scholars and

examination of arguments proposed by Western theologians and philosophers with an objective to establish the similarities and differences in the theoretical frameworks of scholars from different schools traditions and faiths The main argument of this book is based on the theological premises proposed by Fethullah G len and mainstream Sunni theologians that support the coexistence of predestination and free will *T. F. Torrance as Missional Theologian* Joseph H. Sherrard,2021-06-01

What contribution can T F Torrance make to the discussion of a missional view of the church Theologian and pastor Joseph Sherrard considers how Torrance s theology can inform the church s understanding of its ministry and mission in particular his appeal to the church s participation in the ascended Christ s threefold office as king prophet and priest *God's Failed Challenge?* Dale Morse,2022-11-03

Is Donald Trump God s way of showing us how much do we are in This is the burning question as Hal a space alien assembles a colorful crew of characters including some other space aliens and an NSA analysis this so as to tell the tale of Johnny Leroy Ronn Much of the plot grows out of the notion that God itself expects the people of planet Earth to help out with keeping our planet cool this by way of moving on unto overunity overperformance energy production Many of the events of Hal s exciting tale are based on the author s real life For example in 1982 in both the book and in real life a government agent threatened our protagonists If you ever take another job from which Social Security is withheld we will kill you Indeed unto this day the real author of this book as portrayed by the character Johnny Leroy Ronn continues to battle the government s efforts to suppress his work However with the publishing of this book after thirtyaEUReight years of poverty and harassment his quantitative gravity QG theory which appears near the end of this book does finally see the light of day Morse s QG is the real thing it can be expected to augment replace Albert Einstein s general relativity and it can be expected to enable our scientists to address some existential issues related to overunity overperformance energy production for the first time Put another way this book is going to knock the socks off the science community **Space, Time, and Spacetime** Lawrence Sklar,1977-03-15

In this book Lawrence Sklar demonstrates the interdependence of science and philosophy by examining a number of crucial problems on the nature of space and time problems that require for their resolution the resources of philosophy and of physics The overall issues explored are our knowledge of the geometry of the world the existence of spacetime as an entity over and above the material objects of the world the relation between temporal order and causal order and the problem of the direction of time Without neglecting the most subtle philosophical points or the most advanced contributions of contemporary physics the author has taken pains to make his explorations intelligible to the reader with no advanced training in physics mathematics or philosophy The arguments are set forth step by step beginning from first principles and the philosophical discussions are supplemented in detail by nontechnical expositions of crucial features of physical theories **God's Journey** Brett Rogers,2012-10

God s journey starts by laying a conceptual foundation of creation and then discusses the steps it has taken in its evolution There is only one fundamental pattern creation finds a way of getting its parts to work together to create something that is more

capable of observing and acting within creation ideally in a sustainable way Good examples of this are the trillions of cells that work together to create a human being and humans who work together to create schools businesses governments and economies Humans like other parts of creation can express this fundamental pattern to varying degrees of effectiveness Sometimes we work together to create something that contributes to the evolution of creation really well sometimes not so well and sometimes it takes away from it Learning to optimize our potential to contribute to our personal and collective evolution is the focus of this book I will discuss a progressive approach for enhancing our personal health and performance to enjoy and use as a foundation for enhancing our collective health and performance evolution Enlightenment is the most important process for both our personal and collective evolution The more aware we are the easier it is to make good decisions on how to act Academic pursuits are very important in this but so is developing our psychic abilities such as intuition There is much more to this reality than meets the eyes as you can learn within this book and much more God's Church-Community David Emerton,2020-07-09 David Emerton argues that Dietrich Bonhoeffer s ecclesial thought breaks open a necessary third way in ecclesiological description between the Scylla of ethnographic ecclesiology and the Charybdis of dogmatic ecclesiology Building on a rigorous and provocative discussion of Bonhoeffer s thought Emerton establishes a programmatic theological grammar for any speech about the church Emerton argues that Bonhoeffer understands the church as a pneumatological and eschatological community in space and time and that his understanding is built on eschatological and pneumatological foundations These foundations in turn give rise to a unique methodological approach to ecclesiological description an approach that enables Bonhoeffer to proffer a genuinely theological account of the church in which both divine and human agency are held together through an account of God the Holy Spirit Emerton proposes that this approach is the perfect remedy for an endemic problem in contemporary accounts of the church that of attending either to the human empirical church community ethnographically or to the life of God dogmatically and to each problematically at the expense of the other This book will act as a clarion call towards genuinely theological ecclesiological speech which is allied to real ecclesial action God's Ways with the World Daniel Hardy,2005-01-01 This book is devoted to recovering the truth and vitality of Christian faith by attempting to trace the ways of God with the modern world Professor Hardy contends that the profundity of God s interaction with the world despite centuries of valuable contemplation can best be understood by addressing those aspects of human thought which often give modern life its vitality These are the very features with which theology has tended to lose touch but which here are explored as areas in which the character and purposes of God may be manifest Following the example of the great eras of theological understanding in the past this book seeks a new and deeper synthesis of faith theology and other disciplined forms of life and thought to recover the dynamic of God s life and work in and from them As it does so it concentrates on the heartlands of Christian faith worship the Triune God and the activity of God in the world in language and cultures in cosmology and the human being in society and the form of the Church and in

the forms of human understanding scientific historical cultural religious and theological The result is an uncompromising study which attempts to show the possibilities for a theology which becomes more fully realised by discovering and following the ways of God with the modern world      **Trinitarian Theology after Barth** Myk Habets, Phillip Tolliday, 2011-01-01 The most outstanding theological thinker of the twentieth century is proving to be the most pivotal theological figure of the twenty first century as well It is no wonder some have referred to Karl Barth as a Father of the Church Karl Barth widely acknowledged as the most influential theologian of the modern era continues to provoke and inspire Christian theological reflection in a distinct and enduring way His work has occasioned appreciation critique and rejection but however one responds to Barth one must reckon with him in pursuing the theological task This volume draws together scholars whose essays exhibit work after Barth in engaging the doctrine of the Trinity and its related themes Barth s thought as evidenced amongst his most expert commentators allows for a variety of interpretations the details of which are being hammered out on the pages of academic journals and volumes such as this one It is this variety of responses to and interpretations of Barth s theology that gives such vibrancy to the essays in this volume by seasoned Barth scholars and voices new to the conversation Contributors include Ivor J Davidson Bruce L McCormack John C McDowell Paul D Molnar Murray A Rae and a Foreword by John B Webster
