Economic Behaviour In Adversity:

Economic Behaviour in Adversity Jack Hirshleifer, 1987-11-02 Conflict disaster and destruction despite their historical and current significance have not yet been adequately studied from the economic point of view Economic Behaviour in Adversity brings together ten important essays several previously unpublished dealing with the choices people make in times of disaster and conflict These essays help explain the possibilities and limits of human cooperation under severe environmental pressure Part I Disaster and Recovery contains previously unpublished studies of major historical catastrophes among them the Black Death of the fourteenth century the Civil War in Russia that followed the Bolshevik revolution and the mass bombing of Germany and of Japan during World War II Accompanying the historical studies are several analytical papers that interpret the disaster experience The essays in Part II Cooperation and Conflict represent innovative theoretical analyses based on a common theme that cooperation and conflict are alternative strategies whereby individuals groups and different forms of social organization struggle with one another for evolutionary survival Ultimately these essays indicate the political economy of the human species is an instance of Darwin's economy of nature Economics as a Science of Human Behaviour Bruno S. Frey, 2013-12-01 This book champions the view that economics is a social science and that moreover it may serve as a new paradigm for the social sciences Economics is taken to be part of those sciences which deal with actual problems of society by providing insights improving our understanding and suggesting solutions I am aware that the way problems are addressed here has little in common with economics as it is generally understood today most economists make strong efforts to imitate the exact sciences Economics tends to become a branch of applied mathematics the majority of all publications in professional journals and books are full of axioms lemmas and proofs and they are much concerned with purely formal deductions Often when the results are translated into verbal language or when they are applied empirically disappointingly little of interest remains The book wants to show that another type of economics exists which is surprisingly little known This type of economics has its own particular point of view It centres on a concept of man or a model of human behaviour which differs from those normally used in other social sciences such as sociology political science law or psychology I do not however claim that economics is the only legitimate social science On the contrary economics can provide useful insights only in collaboration with the other social VII VIII PREFACE sciences an aspect which has been disregarded by mathematically oriented economics **Alan S. Milward and Contemporary European History** Fernando Guirao, Frances M.B. Lynch, 2015-10-14 Alan S Milward was a renowned historian of contemporary Europe In addition to his books as well as articles and chapters in edited books he also wrote nearly 250 book reviews and review articles some in French and German which were published in journals world wide Taken together they reveal a remarkable degree of theoretical consistency in his approach to understanding the history of Europe since the French Revolution This book brings together these previously unexamined pieces of historical analysis in order to trace and

shed light on key intellectual debates taking place in the second half of the 20th century. Many of these discussions continue to influence us today such as the role of Germany in Europe, the economic, social and political foundations of European integration, the European rescue of the nation state, the reasons for launching the single currency, the conditions for retaining the allegiance of European citizens to the notions of nation and supra nation and ultimately the issue of democratic governance in a global environment. In bringing together these reviews and review articles, the book provides an introduction to the main scholarly achievements of Milward in his own words. Fernando Guirao and Frances M B Lynch provide an introduction to the volume which both guides the reader through many of the academic debates embedded within the text while underlining their contemporary relevance. By introducing and bringing together this hitherto overlooked treasure trove of historical analysis, this book maps a close itinerary of some of the most salient intellectual debates of the second half of the 20th century and beyond. This unique volume will be of great interest to scholars of economic history, European history and historiography.

Impacts of Military Spending on Economic Growth Reyes Ruiz, Gerardo, 2025-08-12. Military spending is continually debated in relation to its impact on economic growth. Proponents argue that defense spending increases economic activity by creating jobs, driving technological innovation and boosting demand in industries. Critics cite excessive military spending diverts resources away from critical sectors like healthcare, education and infrastructure, potentially hindering long term economic development. The actual impact often depends on a country's economic structure, level of development and efficiency in allocating defense resources. Understanding the relationship between military spending and economic growth is crucial for policymakers aiming to strike a balance between national security and sustainable economic progress. *Impacts of Military Spending on Economic Growth* explores how regional economic growth is affected by military defense and security spending as well as the causes, benefits and strategies associated with economic development. It examines current issues, challenges and variables for the creation of new economic models and theories to strengthen available knowledge and research. This book covers topics such as human capital, national security and econometric models and is a useful resource for business owners, military members, economists, government professionals, academicians, researchers and political scientists.

The Economic World View Maki, 2001-07-23. The beliefs of economists are not solely determined by empirical evidence in direct relation to the theories and models they hold. Economists hold ontological presuppositions, fundamental ideas about the nature of being which direct their thinking about economic behaviour. In this volume, leading philosophers and economists examine these hidden presuppositions, searching for a world view of economics. What properties are attributed to human individuals in economic theories and which are excluded? Does economic man exist? Do markets have an essence? Do macroeconomic aggregates exist? Is the economy a mechanism, the functioning of which is governed by a limited set of distinct causes? What are the methodological implications of different ontological starting points? This collection, which establishes economic ontology as a coordinated field of study, will be of great

value to economists and philosophers of social sciences **Ethics, Rationality, and Economic Behaviour** Francesco Farina, Frank Hahn, Stefano Vannucci, 1996 The connection between economics and ethics is as old as economics itself and central to both disciplines The essays included in the present volume provide an analysis of the connections between ethics and economics as viewed from several different oft **Law and Economics for Civil Law Systems** Mackaay, Ejan, 2021-11-18 This second edition of Law and Economics for Civil Law Systems substantially updates a unique work that presents the core ideas of law and economics for audiences primarily familiar with civil law systems **The Political Economy of War and Peace** Murray Wolfson, 2012-12-06 cancer n any malignant tumor Metastasis may occur via the bloodstream or the lymphatic channels or across body cavities setting up secondary tumors Each individual primary tumor has its own pattern There are probably many causative factors Treatment depends on the type of tumor the site of the primary tumor and the extent of the spread Oxford Concise Medical Dictionary 1996 97 Let us begin by stating the obvious Acts of organized violence are not necessarily of human nature but they are endogenous events arising within the an intrinsic part evolution of complex systems of social interaction To be sure all wars have features in common people are killed and property is destroyed but in their origin wars are likely to be at least as different as the social structures from which they arise Consequently it is unlikely that there can be a simple theory of the causes of war or the maintenance of peace The fact that wars are historical events need not discourage us On the contrary we should focus our understanding of the dimensions of each conflict or classes of conflict on the conjuncture of causes at hand It follows that the study of conflict must be an interdisciplinary one It is or a penchant for eclecticism that leads to that conclusion but the not humility multi dimensionality of war itself *A Not-so-dismal Science* Mancur Olson, Satu Kähkönen, 2000-01-06 Modern economics is like a metropolitan area Economists ideas about business and markets are like the magnificent buildings of the city centre Yet most growth and prosperity is in the suburbs lately many of economics greatest successes have been outside the traditional boundaries of the discipline In the study of law economic ideas have been the intellectual focus and law and economics has become a major field In the study of politics economists and political scientists using economics type methods are uniquely influential In sociology and history economics has had a smaller but growing influence through rational choice sociology and cliometrics The influence of the economists type thinking in other social sciences is bringing about a theoretical integration of all the social sciences under one overarching paradigm The chapters of the book illustrate the intellectual advances that account for this unified view of economies and societies **Law and Social Norms** Eric Posner, 2009-07-01 What is the role of law in a society in which order is maintained mostly through social norms trust and nonlegal sanctions Eric Posner argues that social norms are sometimes desirable yet sometimes odious and that the law is critical to enhancing good social norms and undermining bad ones But he also argues that the proper regulation of social norms is a delicate and complex task and that current understanding of social norms is inadequate for guiding judges and lawmakers What is needed and what this book

offers is a model of the relationship between law and social norms. The model shows that people's concern with establishing cooperative relationships leads them to engage in certain kinds of imitative behavior. The resulting behavioral patterns are called social norms. Posner applies the model to several areas of law that involve the regulation of social norms including laws governing gift giving and nonprofit organizations, family law, criminal law, laws governing speech, voting and discrimination, and contract law. Among the engaging questions posed are: Would the legalization of gay marriage harm traditional married couples? Is it beneficial to shame criminals? Why should the law reward those who make charitable contributions? Would people vote more if non voters were penalized? The author approaches these questions using the tools of game theory but his arguments are simply stated and make no technical demands on the reader.

Law, Economics and Evolutionary Theory

Peer Zumbansen, Galf-Peter Calliess, 2011-01-01. Evolutionary theory belongs to the rare species of theories that are simultaneously fundamental and over arching, implicating as it does numerous life contexts as well as an array of scholarly disciplines. Armed with a profound grasp of evolutionary theory and its implications to social research, Professors Zumbansen and Calliess have mobilized an appropriately diverse and truly stellar group of academics to investigate how this theory may provide new insights about law, economics and their inter relations. Cast against an especially broad intellectual backdrop set by the editors, this volume is sure to become a standard reference in literature. Amir N. Licht, Radzyner School of Law, Israel. Zumbansen and Calliess have done a wonderful job in assembling papers from the leading scholars in the field who draw on evolutionary approaches for explaining developments in both economics and the law. Anybody interested in issues of institutional change will be inspired by the wealth of ideas and the diversity of perspectives. Stefan Voigt, University of Hamburg, Germany. Law and economics has arguably become one of the most influential theories in contemporary legal theory and adjudication. The essays in this volume, authored by both legal scholars and economists, constitute lively and critical engagements between law and economics and new institutional economics from the perspectives of legal and evolutionary theory. The result is a fresh look at core concepts in law and economics such as institutions, institutional change and market failure that offer new perspectives on the relationship between economic and legal governance. The increasingly transnational dimension of regulatory governance presents lawyers, economists and social scientists with an unprecedented number of complex analytical and conceptual questions. The contributions to this volume engage with legal theory, new institutional economics, economic sociology and evolutionary economics in an interdisciplinary assessment of the capacities and limits of the state, markets and institutions. Drawing as well upon legal sociology and the philosophy of law, the authors expand and transform the known terrain of law and economics by applying evolutionary theory to both law and economics from a domestic and transnational perspective. Legal scholars, evolutionary and regulatory theorists, economists, economic sociologists, economic historians and political scientists will find this cutting edge volume both challenging and engaging.

The Sociobiological Imagination Mary Maxwell, 1991-09-19. This book presents reports on the uses of sociobiology and

general evolutionary theory by members of diverse disciplines psychiatry law management theory anthropology economics primatology history political science ethical philosophy cognitive psychology epistemology socioecology of religion studies of conflict Marxist thought aesthetics sociology linguistics and psychology The purpose of the book is threefold to acknowledge the remarkably wide influence of a central idea to demonstrate that the research of human sociobiology takes place in disparate fields and to introduce the major principles of sociobiology There are many surprises to be found in these pages not least the psychiatrist's new look at anxiety the management theorist's explanation for the success of Japanese firms the Soviet philosopher's report on sociobiology in the U S S R the explanation given for the keeping of harems in ancient kingdoms and the economist's view as to why people care if a bargain price is really a fair price all cast in sociobiological terms

Evolutionary Economics Esben Sloth Andersen, 2013-09-13 First Published in 1996 Routledge is an imprint of Taylor Francis an informa company

Economic Growth and Environmental Policy Frank Hettich, 2000-01-01 This book should interest all students and scholars of environmental economics and particularly those interested in the relationship between economic growth and environmental quality

Ethical Issues in Economics M. Lunati, 1997-07-21 A critical perspective on the foundations of economic theory showing the importance of ethical considerations and focusing in particular on altruism cooperation and equity Mainstream neoclassical economics is analysed and challenged from a moral and socio economic perspective emphasizing the relationship between economics ethics and politics Throughout the book the nature of homo economicus is contrasted with that of homo ethicus Their different moral principles behavioural rules and values are compared and the importance of this battle for a good and civilised society is emphasised

The World of Economics John Eatwell, Murray Milgate, Peter Newman, 1991-05-13 What are the central questions of economics and how do economists tackle them This book aims to answer these questions in 100 essays written by economists and selected from The New Palgrave A Dictionary of Economics It shows how economists deal with issues ranging from trade to taxation

Homo Oeconomicus Gebhard Kirchgässner, 2008-06-13 The economic model of behaviour is fundamental not only in economic theory but also in modern approaches of other social sciences above all in political science and law This book provides a comprehensive treatise of the general model its philosophical and methodological foundations and its applications in different fields In addition to the basic model extensions to its assumptions are examined to account for complex applications like low cost situations with moral behaviour

Climate Ethics Stephen Gardiner, Simon Caney, Dale Jamieson, Henry Shue, 2010-06-22 This collection gathers a set of seminal papers from the emerging area of ethics and climate change Topics covered include human rights international justice intergenerational ethics individual responsibility climate economics and the ethics of geoengineering Climate Ethics is intended to serve as a source book for general reference and for university courses that include a focus on the human dimensions of climate change It should be of broad interest to all those concerned with global justice environmental science and policy and the future of humanity

Coping with Global Environmental

Change, Disasters and Security Hans Günter Brauch, Úrsula Oswald Spring, Czeslaw Mesjasz, John Grin, Patricia Kameri-Mbote, Béchir Chourou, Pál Dunay, Joern Birkmann, 2011-02-03 Coping with Global Environmental Change Disasters and Security Threats Challenges Vulnerabilities and Risks reviews conceptual debates and case studies focusing on disasters and security threats challenges vulnerabilities and risks in Europe the Mediterranean and other regions It discusses social science concepts of vulnerability and risks global regional and national security challenges global warming floods desertification and drought as environmental security challenges water and food security challenges and vulnerabilities vulnerability mapping of environmental security challenges and risks contributions of remote sensing to the recognition of security risks mainstreaming early warning of conflicts and hazards and provides conceptual and policy conclusions

Psychopathology and the Family Jennifer Hudson, Ron Rapee, 2005-10-11 Understanding the factors that place an individual at greater risk of developing psychopathology has important implications for both treatment and prevention of psychological disorders Of critical relevance in this regard is the exploration of the potential influence of the family Parenting and the family environment are considered to significantly contribute to a child s early development and adjustment It follows then that parental behavior may also be of importance in the development maintenance and or the prevention of psychopathology Over the past 50 years there has been a considerable amount of research as well as controversy surrounding the link between parenting and psychopathology The purpose of this book is to provide researchers and clinicians with state of the art research findings presented by experts in the field on the role of the family in the development and maintenance of psychopathology This edited book is divided into 3 sections The first addresses broader issues of theory and methodology and the second provides separate chapters relating to the role of the family in the development and maintenance of specific psychopathologies A final section discusses the involvement of the family in treatment and prevention
