reality of structural changes in the global economy and the global system This book explains that a new era of egocentrism and polycrisis in a multipolar system has emerged in international economic policy with a strong drive toward interventionism and protectionism of national economies Dynamic economic imbalances are becoming a constant factor in disrupting international competitiveness and forcing changes in both monetary policy and general economic policy This prompts a new more pragmatic definition of fundamental concepts in the theoretical sphere as well as an up to date and viable cause and effect narrative that is not disconnected from decision making processes in the economic and political spheres This book provides a comprehensive diagnosis of the current global economy landscape and evaluates the processes affecting the economic and financial realities and the effectiveness of economic policies The recent dynamics have rendered much of the existing literature outdated or confined to individual economies economic systems and regions The book describes the evolution of international economic policy offering a comparative analysis of foreign trade theories especially in the context of macroeconomic trends and the impact of international trade in goods and services in the new balance of power of the global economy Targeted primarily at academics students and researchers in economics finance international relations and management it will also serve as a valuable resource for policymakers shaping and implementing contemporary state economic policies

Challenges for Economic Policy Coordination within European Monetary Union Andrew J. Hughes Hallett, Peter Mooslechner, Martin Schürz, 2013-06-29 The launch of European Monetary Union EMU marked the beginning of a new era and its establishment has proved an impressive success at the technical legal and procedural level After all EMU has accelerated economic and political integration in the European Union and tied the economies of the Member States closer together However the performance of the euro high unemployment rates uneven output and investment growth and the issue of structural reforms that have yet to be tackled have raised questions about the performance of EMU in practice There is a general consensus on the justification for economic policy coordination The existing literature on economic policy coordination however seems far from able to provide robust conclusions about how to organize the necessary interaction of institutions and policies Therefore there seems to be a case for re examining the subject under the new framework set by EMU The objective of such a reassessment is to enhance the understanding of what type of coordination and what institutional setting for policy coordination can be expected to be most favorable
