*Economic Concepts* Robert C. Bingham, 1972      **Economic concepts: a programmed approach. Second edition**  
Robert Charles BINGHAM, 1969      The Programming Approach and the Demise of Economics Franco Archibugi, 2019-11-20  
In this book the first of three volumes Franco Archibugi sets out to create an epistemology of economics arguing for a radical overturning of the conventional analysis from a positive approach to a programming approach This overturning leads to a reappraisal of the foundations of Economics itself and to an improved integration of Economics as an autonomous discipline alongside Sociology Political Science Operational Research Social Engineering and Physical or Spatial Planning The author interrogates how scientific the social sciences really are before proposing a new scientific paradigm for the social sciences a political preference function and a general programming approach The chapters revisit hitherto neglected economists like Gunnar Myrdal Ragnar Frisch Vassili Leontief and Leif Johansen using their theory to overturn the epistemological approach of the entire science of economics Volume II explores oppositions to the traditional and conventional teaching of economics whilst Volume III presents a concrete and practical example of how to build a Planning Accounting Framework PAF as associated with Frisch's plan frame explored in Volume II to demonstrate the extent to which decisions and negotiations can be routed in the social sciences      Economics: Concepts, Methodologies, Tools, and Applications Management Association, Information Resources, 2015-06-30 Organizations governments and corporations are all concerned with distributing their goods and services to those who need them most consequently benefiting in the process Only by carefully considering the interrelated nature of social systems can organizations achieve the success they strive for Economics Concepts Methodologies Tools and Applications explores the interactions between market agents and their impact on global prosperity Incorporating both theoretical background and advanced concepts in the discipline this multi volume reference is intended for policymakers economists business leaders governmental and non governmental organizations and students of economic theory      *Engineering Economic Analysis Practices for Highway Investment* Michael J. Markow, 2012 TRB's National Cooperative Highway Research Program NCHRP Synthesis 424 Engineering Economic Analysis Practices for Highway Investment explores how U S transportation agencies have applied engineering economics benefit cost analyses and similar procedures to decisions on highway investments      **Multiple Criteria And Multiple Constraint Levels Linear Programming: Concepts, Techniques And Applications** Yong Shi, 2001-06-28 This book introduces multiple criteria and multiple constraint levels linear programming MC2LP which is an extension of linear programming LP and multiple criteria linear programming MCLP In the last decade the author and a group of researchers from the USA China Korea Germany and Hungary have been working on the theory and applications of MC2LP problems This volume integrates their main research results ranging from theoretical bases to broad areas of real world applications The theoretical bases include the formulation of MC2LP integer MC2LP and MC2 transportation model fuzzy MC2LP and fuzzy duality of MC2LP optimal system designs

and contingency plans MC2 decision support system and MC2 computer software development The application areas are accounting management information systems production planning and telecommunications management The book serves as a seminar text for both undergraduates and graduates who have a linear algebra or equivalent background For practitioners it will help in handling LP type problems in multiple decision making environment      **Economics 1966** International Committee for Social Science Information and Documentation, 1968-07 First published in 1968 Routledge is an imprint of Taylor Francis an informa company      **Control Systems Functions and Programming Approaches by Dimitris N Chorafas** ,1966-01-01 In this book we study theoretical and practical aspects of computing methods for mathematical modelling of nonlinear systems A number of computing techniques are considered such as methods of operator approximation with any given accuracy operator interpolation techniques including a non Lagrange interpolation methods of system representation subject to constraints associated with concepts of causality memory and stationarity methods of system representation with an accuracy that is the best within a given class of models methods of covariance matrix estimation methods for low rank matrix approximations hybrid methods based on a combination of iterative procedures and best operator approximation and methods for information compression and filtering under condition that a filter model should satisfy restrictions associated with causality and different types of memory As a result the book represents a blend of new methods in general computational analysis and specific but also generic techniques for study of systems theory and its particular branches such as optimal filtering and information compression Best operator approximation Non Lagrange interpolation Generic Karhunen Loeve transform Generalised low rank matrix approximation Optimal data compression Optimal nonlinear filtering      **Evolutionary Economics: Program and Scope** Kurt Dopfer, 2012-12-06 Evolutionary Economics Program and Scope offers a fresh look at the paradigmatic foundations and basic theoretical propositions of economics Twelve authors each of them with his own distinct contribution to economics make a step forward by reinterpreting major areas of micro and macroeconomics in line with modern evolutionary thinking This volume offers a unified approach to economics that allows recent developments in various strands of Evolutionary Economics to be integrated and major positions of Neoclassical Economics to be reconsidered The chapters on Evolutionary Macro Economics explore macro areas such as the division of labor and knowledge technology and institutions population thinking meso economics techno economic trajectories and industrial sectors By telescoping structure into time they highlight the processes of structural change and co evolution between technologies and institutions and provide a causal explanatory core for a modern evolutionary theory of economic growth and economic development The chapters on Evolutionary Micro Economics offer insights into the knowledge based theories of the firm and take up the issues of cognitive and behavioral routines The contributions explore the processes of complex human choice creativity and adaptation in selective and path dependent environments The discussions make an essential contribution to the cognitive and behavioral foundations of a modern

institutional economics      *Economic Concepts for the Social Sciences* Todd Sandler, 2001-09-17 The primary purpose of this book is to present some of the key economic concepts that have guided economic thinking in the last century and to identify which of these concepts will continue to direct economic thought in the coming decades This book is written in an accessible manner and is intended for a wide audience with little or no formal training in economics It should also interest economists who want to reflect on the direction of the discipline and to learn concepts and achievements in other subfields The author imparts his enthusiasm for the economic way of reasoning and its wide applicability Through the abundant use of illustrations and examples the author makes concepts understandable and relevant Topics covered include game theory the new institutional economics market failures asymmetric information endogenous growth theory general equilibrium rational expectations and others      **General Technical Report RM.** ,1988      **Analysis of Multiresource Production for National Assessments and Appraisals** L.
