Economic Crisis In Africa Perspectives On Policy Responses:

Economic Crisis in Africa Magnus Blomström, Mats Lundahl, 1993 **From Crisis to Growth in Africa** Mats Lundahl, 2005-07-05 This book is concerned with the problem of achieving sustained economic growth in thirteen African countries These are divided into three groups the war stricken economics Angola Guinea Bissau Ethiopia and Eritrea the reform strugglers Kenya Cape Verde Zambia Tanzania Mozambique and Zimbabwe and the growth seekers Uganda South Africa and Lesotho Virtually all of these countries have gone through a structural adjustment program designed to remove imperfections that make it difficult for the market system to work in an optimal fashion This title reviews these experiences

Themes in International Economics Mats Lundahl, 2018-12-07 First published in 1998 this collection of essays deals with four different areas of international economics the theory of international trade trade and development protectionism and factor movements notably migration and foreign aid These themes explore the determinants of trade patterns the relation between these patterns and those of underdevelopment and development the failure of protectionism to increase welfare and finally the impact of emigration on the source country and that of foreign aid on the recipient country Gender Perspectives and Gender Impacts of the Global Economic Crisis Rania Antonopoulos, 2014-01-03 With the full effects of the Great Recession still unfolding this collection of essays analyses the gendered economic impacts of the crisis The volume from an international set of contributors argues that gender differentiated economic roles and responsibilities within households and markets can potentially influence the ways in which men and women are affected in times of economic crisis Looking at the economy through a gender lens the contributors investigate the antecedents and consequences of the ongoing crisis as well as the recovery policies adopted in selected countries There are case studies devoted to Latin America transition economies China India South Africa Turkey and the USA Topics examined include unemployment the job creation potential of fiscal expansion the behavioral response of individuals whose households have experienced loss of income social protection initiatives food security and the environment shedding of jobs in export led sectors and lessons learned thus far From these timely contributions students scholars and policymakers are certain to better understand the theoretical and empirical linkages between gender equality and macroeconomic policy in times of crisis Africa and the Global Financial Crisis Reuben Adeolu Alabi, 2011 In this volume of the African Development Perspectives Yearbook series the Research Group on African Development Perspectives investigates the impact of the Global Financial Crisis GFC on economic reform processes in Africa The analysis is structured in such a way so as to reflect the opportunities and dangers of policy reversals in the face of the GFC The impact of the crisis on different types and forms of governance in the region is considered The first question is therefore which macro economic policy instruments have to be applied in order to overcome the crisis and to continue with sustainable development The second question is how the GFC has affected Africa s external economic relations and if the path of opening up to the world markets is to be continued The third question raised is how the crisis has affected

social cohesion impacted poverty alleviation strategies and the achievement of Millennium Development Goals MDGs All these questions are discussed in the various contributions which comprise general studies and country case studies The book also looks into the role of international financial institutions during and after the crisis Series African Development Perspectives Yearbook Vol 15
