Essays on Liberalism and the Economy, Volume 18 F.A. Hayek, 2024-05-31 A deft selection of unpublished and little-known works by F.A. Hayek that will serve to enlighten and enliven debates around the ever-changing face of Western liberalism. Across seventeen volumes to date, the University of Chicago Press's Collected Works of F.A. Hayek series has anthologized the diverse and prolific writings of the Austrian economist synonymous with classical liberalism. *Essays on Liberalism and the Economy* traces the author's long and evolving writings on the cluster of beliefs he championed: most liberalism, its core tenets, and how its tradition represents the best hope for Western civilization. This volume contains material from almost the entire span of Hayek's career: the earliest from 1931 and the last from 1984. The works were written for a variety of purposes and audiences, and they include, along with conventional academic papers, encyclopedia entries, after-dinner addresses, a lecture for graduate students, a book review, newspaper articles, and letters to the editors of national newspapers. While many are available elsewhere, two have never appeared in print, and two others have not been published in English. The varied formats collected here are enriched by Hayek's changing voice at different stages of his life. Some of the pieces resonate as high-minded and noble; some are meant as cuts to intellectuals, a pejorative term when used by Hayek like Keynes and Galbraith. All serve to distill important threads of his worldview.

Economic Essays David Ricardo, 1966 **Economic Essays** Charles Jesse Bullock, 1968 *Essays in Political Economy* Thomas Edward Cliffe Leslie, 1888 Economic Essays Roy Harrod, 1972-06-18 **Essays on David Hume, Medical Men and the Scottish Enlightenment** Roger L. Emerson, 2016-05-13 The Scottish Enlightenment was a period of intellectual and scientific progress in a country previously considered to be marginal to the European intellectual scene. Yet the enlightenment was not about politeness or civic humanism but something more basic: the making of an improved society which could compete in every way in a rapidly changing world. David Hume, writing in 1752, commented that industry, knowledge, and humanity are linked together by an indissoluble chain. Collectively, this volume of essays embraces many of the topics which Hume included under industry, knowledge, and humanity from the European Enlightenment and the Scots' relation to it, to Scottish social history and its relation to religion, science, and medicine. Overarching themes of what it meant to be enlightened in the eighteenth century are considered alongside more specific studies of notable figures of the period, such as Archibald Campbell, 3rd Duke of Argyll, and David Hume, and the training and number of Scottish medical

students Together the volume provides an opportunity to step back and reconsider the Scottish Enlightenment in its broader context and to consider what new directions this field of study might take

Institutions, Behaviour and Economic Theory Heinrich Bortis, 1997 This book is about the conceptual foundations of an intermediate way between liberalism and socialism From a standpoint of economic theory this middle way is conceived of as a synthesis of classical Ricardian and Keynesian political economy While the former deals with proportions between individuals or collectives and society in tackling the problems of distribution and value on the basis of the surplus principle the latter is concerned with the scale of economic activity as explained by the principle of effective demand Political economy pictures the economic aspects of the functioning of the institutional system within which the behaviour of individuals is embedded The economy considered is primarily neither a market nor a planned economy but rather a monetary production economy To establish an alternative to liberalism and socialism requires setting up a system of the social sciences In this work suggestions are made for linking political economy with other social sciences i e sociology law and politics in the traditional sense thus establishing the unity of the social sciences In a Keynesian vein the social sciences are conceived of as moral sciences a view which gives rise to a specific philosophy of history To complete the picture issues of method associated with the theory of knowledge in the social sciences and the problem of linking theory with historical reality are also covered
