Economic Planning and Social Justice in Developing Countries

Ozay Mehmet, 2014-05-12 First published in 1978 this book was written at a time when belief was high in Western guided economic development of the emerging countries The success of Marshall Plan in war torn Europe generated a US led optimism that with generous inflows of aid and technical assistance the Third World could be won over in the Cold War The author's direct experience as a young academic economist in Cyprus Malaysia Uganda and Liberia led him to question this general optimism the reality on the ground in the developing world did not seem to match Western optimism Theories and blueprints made in the West did not fit the requirements of developing countries Higher production and better income distribution were inseparable twin objectives of developing nations That meant production of a higher national output must

at the same time promote social justice Investment must create adequate jobs so that new entrants into rapidly expanding labor force could be gainfully employed Yet the dominant Western theories of development at the time in particular the Trickle Down Theory of Growth prescribed Growth First Distribution Later strategy Similarly Import Substitution Industrialization theories were emphasized at the expense of export led growth Dualistic Growth theories preached urban biased anti rural development This book was written as a rebuttal of such faulty theorizing and misguided professional technical assistance and the book s message is no less valid today than in the 1970 s *Economic Policy and Planning in Developing Countries*,1969 **Economic Policy and Planning in Third World Development** Pradip K.

Crises and Emerging Market Economies Faruk Ulgen, 2016-08-12 Recurrent crises in emerging markets and in advanced economies in the last decades cast doubt about the ability of financial liberalization to meet the aims of sustainable economic growth and development The increasing importance of financial markets and financial efficiency criterion over economic decisions and policies since the 1980s laid down the conditions of the development process of emerging market economies Numerous crises experienced thereafter gave rise to flourishing work on the links between financialization and economic

development Several decades of observations and lessons can now be integrated into economic and econometric models to give more sophisticated and multivariable approaches to financial development with respect to growth and development issues In the markets based and private enterprise dominated world economy two conditions for a successful growth enhancing financial evolution can at least be brought fore macroeconomic stability and consistent supervision But even after the 2007 2008 global crisis economists do not agree on the meaning of those conditions For liberal and equilibrium market economists good finance and supervision mean market friendly structures while for institutionalists post Keynesian and Marxist economists good finance and supervision must lie in collectively designed and managed public structures Drawing heavily on the tumultuous crises of the 1990s 2000s this book argues that those experiences can shed light on such a crucial issue and lead economic theory and policy to go beyond the blindness of efficient free markets doctrine to economic catastrophes It also points to new challenges to global stability in the wake of reconfiguration of international financial arena under the weight of major emerging market economies **The United States Government Manual** ,1994
